QUARTERLY RETURN

OF

MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE DIVISIONS, COUNTIES, AND DISTRICTS OF

ENGLAND;

WITH CERTAIN DETAILED INFORMATION RELATING TO THE DEATHS IN EACH REGISTRATION SUB-DISTRICT.

By Authority of the Registrar General.

Printed under the Superintendence of Her Majesty's Stationery Office,
AND SOLD BY EYRE AND SPOTTISWOODE, 9, EAST HARDING ST., FETTER LANE, E.C.

No. 153.] **Marriages**—*October, November, December,* 1886.
Births and **Deaths**—*January, February, March,* 1887. [Price 9*d.*

General Register Office, Somerset House,
30th April, 1887.

The POPULATION of the UNITED KINGDOM in the middle of 1887 is estimated at 37,091,564 persons; that of England and Wales at 28,247,151, of Scotland at 3,991,499, and of Ireland at 4,852,914.

In the United Kingdom 279,159 *births*, and 188,778 *deaths* were registered in the three months ending 31st March 1887. The natural increase of population was, therefore, 90,381. The registered number of persons married in the quarter ending 31st December 1886 was 138,670.

The birth-rate in the United Kingdom in the first quarter of 1887 was 30·5 and the death-rate 20·6 per 1000. The marriage-rate in the fourth quarter of 1886 was 15·0 per 1000.

The several facts concerning Scotland and Ireland are recorded in the Quarterly Returns of the Registrars-General for those parts of the United Kingdom.

ENGLAND.

This Return comprises the BIRTHS and DEATHS registered in the 2139 registration sub-districts of England and Wales during the quarter ending 31st March 1887; and the MARRIAGES in 14,817 churches or chapels, in 9766 registered places of worship unconnected with the Established Church, and in 632 Superintendent Registrars' Offices, in the three months ending 31st December 1886.

Marriages.

During the three months ending with December last, the marriages of 115,908 persons were registered in England and Wales, corresponding to an annual rate of 16·5 per 1000 of the estimated population in the middle of 1886. This rate corresponded with the rate in the fourth quarter of 1885, but was 1·4 below the mean rate in the corresponding quarters of the ten years 1876–85. The marriage-rates in the fourth quarters of 1885 and 1886 were considerably lower than

that recorded in the corresponding period of any year since the commencement of civil registration in 1837. The lowest county rates in the fourth quarter of 1886 were 11·8 in Rutlandshire, 12·5 in Herefordshire, and 12·6 in the extra-metropolitan portion of Middlesex. The rates in the other registration counties ranged upwards to 19·2 in Huntingdonshire, 19·3 in Cambridgeshire, 20·2 in Suffolk, and 20·7 in Norfolk. It may be noted that the three last mentioned counties also showed the highest marriage-rates in the fourth quarter of 1885.

The marriage-rate for the year 1886 was equal to 14·1 per 1000, and showed a further decline from the steadily decreasing rates in the four preceding years. The marriage-rate last year was 1·1 below the mean annual rate in the ten years 1876–85, and was lower than the rate recorded in any year since 1837.

Births.

The births registered in England and Wales during the three months ending with March last were 219,515, and corresponded to an annual rate of 31·5 per 1000 of the estimated population. The number of births was smaller than that registered in the first quarter of any year since 1875; and the birth-rate was 3·5 below the mean rate in the corresponding quarters of the ten years 1876–85, and was lower than the rate in the first quarter of any year since 1838, when registration of births was undoubtedly defective. The further decline in the birth-rate last quarter was general. The rate did not exceed 20·3 in Rutlandshire, 24·4 in North Wales, 26·1 in Sussex, and 26·5 in Herefordshire; whereas it ranged upwards in the other registration counties to 34·8 in Nottinghamshire and in Monmouthshire, 35·3 in Staffordshire, and 36·8 in Essex.

In the twenty-eight great towns the births registered last quarter corresponded to an annual rate of 32·9, which was 1·4 above the general English rate. The rate was 32·8 in London, and the mean rate in the twenty-seven provincial towns was 32·9. Among the provincial towns the lowest recorded rates were 26·9 in Halifax, 27·1 in Bradford, 27·4 in Huddersfield, and 27·6 in Brighton; the rates in the other towns ranged upwards to 36·9 in Manchester, 37·9 in Newcastle-upon-Tyne, 38·9 in Preston, and 42·3 in Cardiff. In fifty other large town districts the mean birth-rate was 32·9, and corresponded with the rate in the great towns. The lowest rates in these fifty towns were 18·5 in Southport, 21·2 in Hastings, 23·4 in Bath, 24·6 in Cheltenham, and 24·7 in Cambridge and in Rochdale; the highest rates were 41·6 in Newport (Mon.), 41·7 in Chatham, and 43·2 in Ystradyfodwg.

Movement of the Population.

The natural increase of the population of England and Wales, or the excess of births over deaths, which had been 84,234 and 73,763 in the first quarters of 1885 and 1886, was 76,169 in the three months ending March last. Thus the remarkable decrease in the number of births was more than balanced by a still larger decrease in the deaths. It appears from returns issued by the Board of Trade that 61,293 emigrants embarked during last quarter from the various ports of the United Kingdom at which emigration officers are stationed. Distributing 911 whose nationality was undistinguished, and excluding 16,023 foreigners, the emigrants of British origin were 45,270, including 28,879 English, 5817 Scotch, and 10,574 Irish. The numbers of British emigrants in the three preceding corresponding quarters were 37,829, 30,748, and 31,102 respectively. The proportions of emigrants last quarter to a million of the estimated population in the three divisions of the United Kingdom were 1022 from England, 1457 from Scotland, and 2179 from Ireland. Compared with the corresponding quarter of 1886 the

proportional amount of emigration last quarter showed an increase of 32 per cent. in England, 66 per cent. in Scotland, and 75 per cent. in Ireland.

Prices and Pauperism.

The average price of wheat during the three months ending with March last was 34*s.* 0*d.*, and was 2*s.* 8*d.* above the average price in the preceding quarter. The mean wholesale prices of beef and of mutton were $4\frac{2}{8}d.$ and $5\frac{3}{8}d.$ per lb. respectively; the mean price of beef and of mutton showed a further decline from the mean prices in preceding quarters. The average price of the best sea-borne coal in the London market, put in barge from the collier in the Thames, was 15*s.* 2*d.* per ton, against 15*s.* 9*d.* in the corresponding quarter of each of the years 1885 and 1886. The mean price of Consols was 101*l.*, $\frac{1}{8}l.$ less than the mean price in the quarter ending September 1886. The minimum annual rate of discount charged at the Bank of England, which had been raised to 5 per cent. on 16th December, was reduced to 4 per cent. on 3rd February, to $3\frac{1}{2}$ per cent. on 10th March, and to 3 per cent. on 24th March; the average rate during the quarter was 4·2 per cent.

The average number of paupers (exclusive of lunatics in asylums, and vagrants) relieved in England and Wales on the last day of each week in the quarter was 767,584, of whom 193,957 received in-door and 573,627 out-door relief. The proportion of the population in receipt of pauper relief during the three months ending with March was 27·2 per 1000, against 26·7, 26·8, and 27·8 in the three preceding corresponding quarters.

Meteorology.

The remarks upon the Meteorology of the quarter at the Royal Observatory, Greenwich, and at the various stations of observation, furnished by Mr. James Glaisher, F.R.S., with accompanying Tables, will be found on pages 65–72. The mean reading of the barometer at Greenwich was 29·956 inches, and was 0·193 above the mean reading for the corresponding periods of 46 years; the mean reading was above the average in each month of the quarter. The mean temperature of the air during the quarter was 37°·3, and was 1°·5 below the average for the corresponding periods of 116 years. The mean temperature corresponded with the average in February, but was below the average in January and in March.

The first 18 days of January were very cold and snow fell frequently, whereas the temperature of the latter part of the month was for the most part above the average; February was cold and dry, with frequent sharp frosts between the 6th and 18th; and cold with severe frosts at night prevailed during the first 21 days of March. Only nine times since the beginning of the century has the mean temperature of March been lower than it was last quarter. At 34 other stations of observation the mean temperature during the quarter ranged from 35·8 in Wolverhampton and 35°·9 in Rugby, to 41°·0 in Llandudno and in Guernsey, and 41°·3 in Barnstaple.

The amount of rain or melted snow measured at Greenwich during the quarter was 3·03 inches, and was 1·97 inches below the average amount in the corresponding periods of 72 years. The rainfall was below the average in each month of the quarter, the amount in February being but a third of the average. Rain or melted snow was measured at Greenwich on 14 days in January, 4 in February, and 10 in March; or on 28 of the 90 days in the quarter. The amount recorded

at 34 stations of observation ranged from 2·91 inches at Blackheath to 8·12 inches at Stonyhurst.

The number of hours of bright sunshine recorded during the quarter at the Royal Observatory, Greenwich, was 190·1, and was 21·9 above the average amount recorded in the corresponding periods of the nine years 1878–86.

State of the Public Health; Deaths.

During the three months ending with March last 143,346 deaths were registered in England and Wales, corresponding to an annual rate of 20·6 per 1000 of the estimated population. This death-rate was 1·6 below the mean rate in the corresponding quarters of the ten years 1877–86, and 2·2 below the rate in the first quarter of 1886. The lowest county rates last quarter were 16·1 in Rutlandshire, and 16·7 in Sussex and in Middlesex (extra-Metropolitan); the highest rates were 23·3 in Lancashire, 23·5 in South Wales, 24·3 in Monmouthshire, and 26·6 in Cornwall.

The 143,346 deaths last quarter included 72,420 of males, and 70,926 of females. The annual death-rate among males was 21·4, and among females 19·8 per 1000 estimated to be living of each sex. In equal numbers living the deaths of males were 108 to 100 of females; in the corresponding quarters both of 1885 and of 1886 the proportion was 109 of males to 100 of females.

Urban and Rural Mortality.—In the registration districts and sub-districts containing the largest proportion of urban population (see Table III.), and containing an estimated population of about eighteen millions, the death-rate was 21·0 per 1000; in the remaining and chiefly rural population of a little more than ten millions, the rate was 19·8. These urban and rural rates were respectively 1·4 and 0·5 below the mean rates in the corresponding quarters of the six years 1881–86. In equal numbers living, the deaths were 106 in the urban to 100 in the rural population, the average proportion in the first quarters of the six years 1881–86 being 110 to 100.

In the twenty-eight great English towns, including London, and having an estimated population of rather more than nine millions, the registered deaths corresponded to an annual rate of 22·0 per 1000, which was 1·0 above the general urban rate. The death-rate was 20·7 in London, and averaged 23·1 in the twenty-seven provincial towns, among which it ranged from 16·8 in Brighton, 17·1 in Derby, and 18·2 in Nottingham, to 26·3 in Preston, 26·9 in Huddersfield, 27·6 in Plymouth, and 30·6 in Manchester.

In fifty other large town districts, with an aggregate population estimated at nearly three millions, the mean death-rate was 21·0; this corresponded with the general urban rate, but was 1·0 below the rate in the twenty-eight larger towns. The lowest rates among these fifty town districts were 14·7 in Barrow-in-Furness, 15·2 in Maidstone, 15·2 in Darlington, and 15·4 in Burton-on-Trent; the rates in the other towns ranged upwards to 26·7 in Dudley, 29·0 in Merthyr Tydfil, and 29·9 in Stockport.

Mortality at different Ages.—The deaths last quarter included 31,364 of infants under one year of age, 67,810 of persons aged between one and 60 years, and 44,172 of persons aged upwards of 60 years.

Infant mortality, or the proportion of deaths under one year to registered births, was 143 per 1000; in the ten preceding corresponding quarters the mean proportion was 144, and ranged from 152 in 1880, to 134 in 1881 and 1884. The lowest county rates last quarter were 105 in Middlesex (extra-Met.), 114 in Kent (extra-Met.), 118 in Surrey (extra-Met.), and 119 in Essex and in Westmorland; while the highest rates were 162 in Staffordshire and in Worcestershire, 182 in South Wales, 192 in Cornwall, and 200 in Rutlandshire.

In the twenty-eight great towns the deaths of infants were in the proportion of 145 to 1000 registered births, and 2 above the general English rate. The rate was only 131 in London (12 below the general English rate), but averaged 156 in the twenty-seven provincial towns, among which it ranged from 120 in Portsmouth, 123 in Nottingham, and 126 in Bolton, to 171 in Bradford and in Cardiff, 194 in Oldham, and 212 in Plymouth. In fifty other large town districts the rate was 151 per 1000 births, and 6 above the rate in the largest towns. The proportion did not exceed 80 in Maidstone, 100 in Bath, and 101 in Gateshead; it ranged upwards, however, to 200 in Swansea, 204 in Shrewsbury, 207 in Cheltenham, 220 in Stockport, and 221 in Dudley.

Among persons aged between one and 60 years the deaths corresponded to an annual rate of 10·9 per 1000, against an average of 12·1 in the ten preceding third quarters. In the twenty-eight great towns the deaths at these ages corresponded to an annual rate of 12·9, ranging from 8·2 in Brighton, 8·8 in Derby, and 9·4 in Nottingham, to 17·3 in Liverpool, 18·9 in Huddersfield, and 20·1 in Manchester.

The deaths among persons aged upwards of 60 years were equal to an annual rate of 86·0 per 1000, which was 0·9 above the mean rate in the ten preceding first quarters; it was, however, below the rates that prevailed in the first quarters of 1885 and 1886. In the twenty-eight great towns the mean death-rate at these ages was 92·8, and 6·8 above the general English rate. In London the rate was 91·2, while the mean rate in the twenty-seven provincial towns was 94·3; it ranged from 70·8 and 71·4 in Brighton and Sunderland, to 107·1 in Preston, 108·1 in Wolverhampton, and 120·5 in Manchester.

During last quarter the death-rate of infants was 0·7 per cent., and that of persons aged from 1 to 60 years was 9·9 per cent., below the respective mean rates in the ten preceding corresponding quarters. The death-rate of persons aged upwards of 60 years, however, exceeded the same average by 1·1 per cent.

Zymotic Diseases.—The 143,346 deaths from all causes included—

4391	attributed to	measles,
2764	„	whooping-cough,
1624	„	scarlet fever,
1331	„	diarrhœa,
1209	„	fever,
973	„	diphtheria,
and 30	„	small-pox.

Thus 12,322 deaths were ascribed to these zymotic causes, corresponding to an annual rate of 1·77 per 1000 persons living, the average annual rate in the ten preceding first quarters having been 2·27.

The lowest rates from these diseases occurred in Huntingdonshire, Herefordshire, and Rutlandshire, while the highest rates were 2·34 in the West Riding, 2·77 in

Lancashire, and 3·33 in Cornwall. In the aggregate of the twenty-eight great towns the rate was 2·33, but ranged from 0·82 and 0·89 in Brighton and Bolton, to 4·27 in Manchester, 4·49 in Sunderland, and 5·44 in Huddersfield. In fifty other considerable towns the rate was 1·87, and ranged up to 4·13 in Swansea, 4·32 in Dudley, 4·33 in Stockport, and 6·34 in Warrington. In England and Wales, exclusive of these seventy-eight towns, the rate was 1·42.

The 4391 deaths from *measles* corresponded to an annual rate of 0·63 per 1000, against a mean rate of 0·38 in the ten preceding corresponding quarters. The rate was higher than in the first quarter of any year since 1874, when it was 0·65.

The lowest rates in the registration counties were 0·00 in Herefordshire, Rutlandshire, and Westmorland, 0·05 in Devonshire and in North Wales, and 0·06 in Cumberland, whilst the highest rates were 1·1 in Northumberland and in Worcestershire, 1·10 in Cornwall, and 1·14 in Lancashire. In the aggregate of the twenty-eight great towns the rate was 0·94, and ranged from 0·00 in Plymouth, and 0·04 in Nottingham, Birkenhead, and Bolton, to 1·53 in Bristol, 1·56 in Newcastle-upon-Tyne, 1·59 in Leeds, 1·84 in Liverpool, 1·89 in Manchester, 2·94 in Sunderland, and 3·17 in Huddersfield. In fifty other considerable towns the rate was 0·69, rising, however, to 2·42 in Stockport, 2·44 in Rotherham, 2·48 in West Bromwich, 2·61 in Swansea, 2·71 in Dudley, and 5·86 in Warrington. In the remainder of England and Wales the rate was 0·44, and showed a marked excess in Sudbury, St. Ives (Cornwall), Kidderminster, Bulwell, Much Woolton, Dukinfield, Padiham, Harwood, Keighley, Golcar, and Alnwick registration sub-districts.

The 2764 deaths from *whooping-cough* corresponded to an annual rate of 0·40 per 1000, against an average of 0·61 in the ten preceding first quarters. The rate was lower than in any previous corresponding quarter on record, the lowest previously recorded rate being 0·42 in 1877.

The lowest rates last quarter in the registration counties were 0·00 in Huntingdonshire and Rutlandshire, 0·02 in Shropshire, and 0·04 in Herefordshire, while the highest rates were 0·70 in Monmouthshire and in Buckinghamshire, 0·76 in Bedfordshire, and 1·47 in Cornwall. In the aggregate of the twenty-eight towns the rate was 0·55; it ranged from 0·04 in Birkenhead and 0·09 in Salford, to 1·17 in Oldham, 1·35 in Plymouth, and 1·52 in Huddersfield. In fifty other considerable towns the rate was 0·40, and ranged up to 1·18 in Swansea, 1·32 in Newport, and 1·45 in Tynemouth. In the remainder of England and Wales the rate was 0·31, and showed a marked excess in Lakenheath, Boscastle, St. Just-in-Penwith, Aspull, Lancaster, and Llansamlet sub-districts.

The 1624 deaths from *scarlet-fever* corresponded to an annual rate of 0·23 per 1000, against an average of 0·50 in the ten preceding first quarters. In the first quarter of 1886 the rate was only 0·18, but with this exception the rate last quarter was lower than in the first quarter of any year on record.

No death from this disease was recorded either in Worcestershire or in Westmorland; while the highest rates were 0·44 in Lancashire, 0·50 in Gloucestershire, 0·52 in the West Riding, and 0·72 in Monmouthshire. In the twenty-eight great towns the rate was 0·30; it ranged from 0·00 in Derby and 0·03 in Brighton, to 0·60 in Liverpool, 0·62 in Manchester, 0·77 in Salford, 0·84 in Sheffield, 0·89 in Blackburn, and 1·00 in Bristol. In fifty other considerable towns the rate was 0·27, the highest rates being 0·77 in South Shields and 2·57 in Merthyr Tydfil. In the remainder of England and Wales it was 0·19, but showed an excess in Midsomer Norton, Huyton, Kenarth, and Penbryn sub-districts.

The 1331 deaths from *diarrhœa* corresponded to an annual rate of 0·20 per 1000, against a mean rate of 0·25. This rate was lower than that in the first quarter of any year on record.

The lowest rates in the registration counties were 0·00 in Huntingdonshire and 0·07 in Wiltshire and in Herefordshire; while the highest rates were 0·32 in Cambridgeshire, and 0·37 in Bedfordshire. In the aggregate of the twenty-eight great towns the rate was 0·18, while it ranged from 0·05 in Halifax, 0·06 in Leicester, and 0·10 in Plymouth, to 0·32 in Bolton and 0·50 in Preston. In fifty other considerable towns the rate was 0·17, the highest rates being 0·46 in West Bromwich and 0·74 in Exeter. In the remainder of England and Wales the rate was 0·19.

The 1209 deaths from *fever*, including typhus, enteric fever, and simple and ill-defined forms of continued fever, corresponded to an annual rate of 0·17 per 1000, against an average of 0·29 in the ten preceding first quarters. This rate is lower than that in the first quarter of any year on record.

The rate was 0·00 in Rutlandshire and 0·04 in Hertfordshire and in Herefordshire, while it ranged upwards to 0·27 in Lancashire, 0·28 in Cumberland, and 0·30 in Nottinghamshire and Monmouthshire. The mean rate in the twenty-eight great towns was 0·18, and ranged from 0·00 in Hull and 0·02 in Bristol, to 0·36 in Liverpool and in Manchester, 0·42 in Plymouth, and 0·47 in Preston. In fifty other considerable towns the rate was 0·23, the highest rates being 0·55 in Yarmouth, 0·63 in Merthyr Tydfil, 1·02 in Ashton-under-Lyne, and 1·03 in Carlisle. In the remainder of England and Wales the rate was 0·16. Fever mortality, however, showed an excess in Richmond (Surrey), Whitwick, Barmborough, Aberford, Easington, and Bridgend sub-districts.

The 973 deaths from *diphtheria* gave an annual rate of 0·14 per 1000, corresponding with the average rate in the ten preceding first quarters.

No death from this disease was registered in Buckinghamshire, Huntingdonshire, or Rutlandshire; while the rates ranged up to 0·22 in Essex, 0·25 in Westmorland, 0·26 in Cornwall, 0·29 in Hampshire, and 0·45 in Cambridgeshire. The rate in the twenty-eight great towns was 0·17, and ranged from 0·00 in Derby and Blackburn, to 0·45 in Oldham, 0·47 in Preston, and 0·58 in Portsmouth. In fifty other considerable towns the rate was 0·10, the highest rates being recorded in Walsall, Burton-on-Trent, and Cambridge. In the remainder of England and Wales the rate was 0·13; high rates prevailed in Whitstable, Willingham, Worlington, Costessey, and Saltash sub-districts.

The 30 deaths from *small-pox* showed an increase of but 19 upon the unprecedently low number returned in the preceding three months. Fifteen occurred in the twenty-eight great towns, including 6 in Manchester, 2 in London, 2 in Portsmouth, 2 in Blackburn, 2 in Cardiff, and one in Newcastle-upon-Tyne; 5 were returned in the fifty other considerable towns, including 3 in Middlesbrough. The number in the rest of England and Wales was but 10.

The following Table shows the relative mortality from each of the above-mentioned zymotic diseases in England and Wales, in the twenty-eight great towns, in the fifty other considerable town districts, and in the remainder of the country:—

ANNUAL DEATH-RATE per 1,000 from several ZYMOTIC DISEASES during the First Quarter of 1887.

	From Diseases in Cols. 2-8.	Small-pox.	Measles.	Scarlet Fever.	Diph-theria.	Whoop-ing-cough.	Fever.	Diar-rhœa.
Cols.	1.	2.	3.	4.	5.	6.	7.	8.
England and Wales -	1·77	0·00	0·63	0·23	0·14	0·40	0·17	0·20
28 Great Towns - -	2·33	0·01	0·94	0·30	0·17	0·55	0·18	0·18
50 other Town Districts	1·87	0·01	0·69	0·27	0·10	0·40	0·23	0·17
England and Wales, less the 78 Towns -	1·42	0·00	0·44	0·19	0·13	0·31	0·16	0·19

CERTIFICATION OF CAUSES OF DEATH.—The causes of 130,205, or 90·8 per cent., of the 143,346 deaths in England and Wales were duly certified by registered medical practitioners, and 7967, or 5·6 per cent., by coroners in inquest cases. The causes of the remaining 5174, or 3·6 per cent., of the deaths were not certified. The proportion of uncertified deaths did not exceed 1·3 per cent. in London, whereas it was 4·0 per cent. in the rest of England and Wales. The per-centage of uncertified deaths was only 1·0 in Middlesex (extra-metropolitan) and 1·1 in Wiltshire, while it ranged upwards to 5·3 in Shropshire and in Cornwall, 5·9 in Durham, and 8·2 in Herefordshire. In Wales 8·6 per cent. of the causes of death were uncertified, the proportions being 9·4 in North Wales and 8·2 in South Wales.

In the twenty-eight great towns the mean proportion of uncertified deaths was 2·6 per cent.; but while it did not exceed 1·3 per cent. in London, it averaged 3·5 in the twenty-seven provincial towns. The per-centages of uncertified deaths in these provincial towns ranged from 0·7 in Portsmouth and 1·2 in Norwich, to 5·7 in Halifax, 5·9 in Sunderland, 6·4 in Sheffield, and 6·9 in Oldham.

VIOLENT DEATHS.—The deaths referred to different forms of violence were 4413, and corresponded to an annual rate of 0·63 per 1000 of the estimated population; they were equal to 3·1 per cent. of the total deaths, against 3·0, the mean rate in the ten preceding corresponding quarters. The death-rates from violence ranged from 0·23 and 0·29 per 1000 in Bedfordshire and Buckinghamshire, to 0·75 in Lancashire, 0·78 in Monmouthshire, and 0·91 in South Wales, in each of which a considerable proportion of the population is engaged in mining.

In the twenty-eight great towns the deaths from violence corresponded to an annual rate of 0·75 per 1000; the lowest rates in these towns were 0·17 in Norwich, and 0·30 in Bradford and in Oldham, and the highest 1·05 in Newcastle-upon-Tyne, 1·30 in Cardiff, and 1·31 in Birkenhead.

INQUESTS.—Inquests were held in 7967 cases, or in 5·6 per cent. of the total deaths; the mean proportion in the ten preceding first quarters was 5·1 per cent. In the twenty-eight great towns the proportion of inquest cases to total deaths was 6·9 per cent.; the percentage ranged from 2·0 in Oldham, 2·4 in Halifax, and 2·6 in Huddersfield and in Hull, to 8·2 per cent. in London, 8·5 in Birmingham, 9·1 in Birkenhead, and 11·2 in Leicester.

Deaths in Public Institutions.—The deaths registered in workhouses, hospitals, and public lunatic asylums numbered 15,692, and were equal to 10·9 per cent. of the total deaths; the mean proportion in the ten preceding corresponding quarters was 10·5 per cent. In the twenty-eight great towns 8443, or 16·6 per cent., of the deaths were recorded in these public institutions; the per-centage of institution deaths in these towns ranged from 7·0 and 8·1 per cent. in Huddersfield and Plymouth, to 18·2 per cent. in Liverpool, 18·6 in Manchester, and 21·4 in London.

Health of Colonial and Foreign Cities.

A summary of the Weekly Returns, with which the Registrar-General is favoured by various local authorities abroad, shows that the average annual death-rate during the quarter ending with March last in thirty Colonial and Foreign cities, having an aggregate population of nearly sixteen millions of persons, was equal to 27·3 per 1000. In the twenty-one European cities the mean rate was 27·4 per 1,000, against 22·0 in the twenty-eight large English towns. Among the thirty Colonial and Foreign cities the lowest death-rates were 18·5 in Baltimore, 20·9 in Brooklyn, 21·1 in Christiania, and 21·8 in Stockholm and in Dresden; in the other towns the rates ranged upwards to 35·8 in Trieste, 36·0 in Buda-Pesth, 38·7 in Alexandria, 39·3 in Cairo, and 41·2 in Madras. The rate of mortality in Paris was equal to 27·2 per 1000, and exceeded the rate recorded in London by as much as 6·5; the 15,334 deaths included 897 from diarrhœal diseases, 634 from measles, 492 from diphtheria and croup, 400 from typhoid fever, and 59 from small-pox; the fatal cases of each of these zymotic diseases, except diarrhœa, showed an increase upon those returned in the preceding quarter. Small-pox caused 240 deaths in Buda-Pesth (against 174, 327, and 827 in the previous three quarters), 103 in Rome, 88 in St. Petersburgh, 46 in Prague, 30 in Alexandria, and 24 in Venice. Measles caused 573 deaths in New York (against 97 and 483 in the preceding two quarters), and 215 in Bombay. The prevalence of scarlet fever showed a decline in many of the European cities, while in each of the American cities it had markedly increased. The mortality from diphtheria also showed a general decline, although in Paris and St. Petersburgh it showed a considerable increase upon that recorded in the preceding quarter. The deaths referred to typhoid fever in Paris, which had risen from 160 to 315 in the three preceding quarters, further increased during the quarter under notice to 400, and were equal to an annual rate of 0·71 per 1000, while the death-rate from this disease in London did not exceed 0·12 per 1000. Fever was also fatally prevalent during the quarter in St. Petersburgh, Hamburg, Cairo, and Philadelphia.

PRELIMINARY TABLES.

* Furnished by the Chief Cashier of the Bank of England.
† As published by the Comptroller of Corn Returns to the Board of Trade.
‡ These are the average prices at which the best seaborne Newcastle, Sunderland, and Hartlepool coals are put in barge from the collier in the Thames; the difference between these prices and those charged to the consumer represents the cost of distribution and merchant's profit. These figures are derived from returns with which the Registrar-General has been favoured by Mr. Richard Meade of the Mineral Statistics Department, Home Office.

555	Gateshead - - - M† -	78,838	762	379	39·2	19·5	1·90	101	Gateshead Sub-district.
557	Tynemouth - - - M† -	50,432	379	273	30·5	22·0	2·57	166	Nrth. Shields & Tynemouth Sub-ds.
572	Carlisle - - - - M† -	43,513	310	214	28·9	19·9	1·49	139	St. Cuthbert & St. Mary Sub-dists.
	XI.—MONMOUTHSH. & WALES.								
585	Newport (Monmouth) M† -	36,742	377	203	41·6	22·4	2·43	133	Newport Sub-district.
587	Ystradyfodwg - L. G. D.†	55,893	596	319	43·2	23·1	0·73	191	Ystradyfodwg Sub-dist. of Pontypridd.
588	Merthyr Tydfil - - P -	89,849	830	642	37·5	29·0	3·75	186	Lower and Upper Merthyr Tydfil and Aberdare Sub-districts.
592	Swansea - - - M -	96,217	804	613	33·9	25·8	4·13	200	Llangafelach, Swansea, and Llansamlet Sub-districts.

Note.—The letter M or P affixed to the name of each Town denotes whether the limits, which the district or sub-districts named in the last column approximately represent, are Municipal or Parliamentary. Imp^{t} D. signifies an Improvement District, and L. G. D. a Local Government District.

† The rates of mortality for these towns have been corrected by the exclusion of a proportional number of deaths occurring in County Hospitals and Lunatic Asylums, situate within the districts or sub-districts here taken as representing the towns, or by the exclusion or addition of a proportion of the deaths in Union Workhouses in cases where only a portion of the Union is embraced by the area taken, or where the Workhouse is situated outside that area.

‡ The rate of increase of population in Barrow-in-Furness and in Ystradyfodwg was so abnormally large between 1871 and 1881 as to preclude the probability of the rate being maintained between 1881 and 1891. The present population of these towns has therefore been estimated from special returns of inhabited houses with which the Registrar-General has been favoured by the local authorities.

TABLE VIII.—LONDON—OUTER RING. **Population; Births; Deaths** from **All Causes,** and from the **principal Zymotic Diseases;** and **Annual Rate of Mortality;** in the **First Quarter of 1887.**

Districts and Sub-districts.	Estimated Population in the middle of the year 1887.	Births.	Deaths.	Deaths from Diseases in cols. 8–14, Table V.	Annual Rate per 1000 living.

Romford (*part of*)	23,213	229	90	3	39·6	15·6	0·52

Note.—In estimating the populations of these Districts, upon which the birth and death-rates have been calculated, it has been assumed that the rate of increase in Greater London since 1881 has been the same as that which prevailed between 1871 and 1881; the estimate for the Outer Ring is obtained by the deduction of the estimated population of Inner London from that of Greater London, and the estimates for its component districts have been adjusted to cast to the estimated total. In calculating the rates of mortality, a proportion of the deaths recorded in the three Middlesex County Lunatic Asylums, situated in the Districts of Epsom, Uxbridge, and Barnet, has been excluded as belonging to the Middlesex portion of Registration or Inner London, and the remainder distributed among the Middlesex Districts of the Outer Ring; a similar correction has been made for the deaths registered in the Surrey County Lunatic Asylum situated in the District of Croydon.

TABLE IX.—**Births** and **Deaths** in the **First Quarter** of 1887, in 30 **Foreign Cities,** having an estimated aggregate Population of 15,965,290 persons.

[a] The *Registration* or *Union Counties* consist of groups of Superintendent Registrars' Districts, which are generally co-extensive with the Poor Law Unions. Those Districts which extend into two or more Counties (proper) are included entirely in that County in which the principal town of the district, or the greater part of the population, is located. The boundaries of Registration or Union Counties therefore differ more or less from the boundaries of Counties (proper).

[b] The averages of Marriages and Births are given only for the Eleven Divisions and for Registration Counties.

[c] See page 14, note b.

NOTE.—*The Registrars alone must be considered responsible for the accuracy of the figures shown in their Returns, and for the opinions expressed in the foot notes.*

[a] The *Superintendent Registrars' Districts*, 632 in number, are collections of contiguous Parishes or Places, combined for purposes connected with the Registration of Births, Deaths, and Marriages, and are nearly always identical with the Poor Law Unions of the same names; they are here arranged topographically under the Registration Counties.

[b] These areas, which were partly revised by the Ordnance Survey Department, are the same as those published in the Census Report of 1881. They do not include space occupied by foreshore or tidal water of rivers and creeks.

[c] See page 14, note b.

II.—SOUTH EASTERN COUNTIES.—Superintendent Registrars' Districts—*continued.*

No.	Superintendent Registrars' Districts.	Area in Statute Acres.	Enumerated Population, 1881.	Marriages: Registered in Quarter ending 31 Dec. 1886.	Births: Registered in Quarter ending 31 Mar. 1887. [a] The *Registration Sub-districts* (2139 in number) are sub-divisions of the *Superintendent Registrars' Districts* in which the Births and Deaths are registered by Registrars severally appointed for that purpose. The letter *W* denotes that the Sub-district contains within its limits a Workhouse belonging to the District or Union; *w* indicates that a Workhouse Establishment receiving inmates from other Districts than the one in which it stands is included; *H* indicates Hospital or Infirmary; and *L* Lunatic Asylum.

[b] For London, the numbers of Births and Deaths, as well as the details given under "Infants under 1 year of age" and the twelve subsequent headings in this Table, are derived from the Weekly Returns made by the Registrars, and relate to 13 weeks ending 2nd April 1887.

[c] 4: 1.—Prior to the 1st January 1887 the sub-district of *Mayfair* was comprised in two sub-districts, viz., Hanover Square and Mayfair.

I.—LONDON.—REGISTRATION SUB-DISTRICTS—*continued.*

[a] 625 : 2.—The 3 deaths from scarlet fever occurred in Festiniog Urban Sanitary District. The 5 deaths from whooping-cough occurred in the Rural Sanitary District.

[b] 625 : 3.—Of the 4 deaths from whooping cough, 3 occurred in the Rural Sanitary District.

METEOROLOGY OF ENGLAND.

Remarks on the Weather during the Quarter ending March 31st, 1887.

By James Glaisher, Esq., F.R.S., *&c.*

The weather in January till the 18th was very cold, snow fell frequently, and the ground at many parts of the country was covered with snow till after the 18th; from the 19th the weather was milder, with some days of fine weather. The temperature was very low on the 1st and 2nd; at Barnet on the 2nd it was as low as 8°, the mean temperature of these two days was nearly 14° below their average; low temperatures with severe frosts were experienced on every night till the 18th, at Rugby on the 17th the temperature of the air was as low as 6°·5, and the frost was severe at all stations. A change took place between the 18th and 19th, and to the end of the month the temperature was mostly above the average. The atmospheric pressure was below its average till the 10th, particularly from the 4th to the 9th; on both the 5th and 6th it was more than one inch below the average, and from the 11th to the end of the month it was constantly above the average. The fall of rain was small; fogs were frequent, particularly in the Midland Counties.

The weather in February was cold and dry, with frequent sharp frosts at night between the 6th and the 18th; at times the weather was pleasant. The temperature of the air was generally above the average till the 5th, and from the 19th to the 25th, and below on all other days. The pressure of the atmosphere was very remarkable, it was steadily high throughout the month; at the height of 160 feet above the mean level of the sea it was 30·145 inches, being higher than in any February back to 1841, the instances back to 1841 in which the mean pressure in February has exceeded 30 inches are the following:—In 1854, when it was 30·041 inches; in 1863, when it was 30·141; in 1878, when it was 30·101; and in 1882, when it was 30·051. Back to 1841 there have been but six instances in any month in which the atmosphere has exceeded 30·145 inches, viz., in 1882, in January, when it was 30·182; in 1880, January, when it was 30·204; in 1858, in January, when it was 30·171; in 1857, in December, when it was 30·158; in 1854, in November, when it was 30·186; and in 1843, December, when it was 30·245 inches, being the highest of any month in 47 years. The fall of rain was generally very small, and generally much below the average. Snow fell on a few days and fog was rather prevalent.

The weather in March till the 21st day was very cold, with severe frosts every night; very severe winter weather was experienced from the 11th to the 21st. Snow fell generally over the country on nearly every one of these days. The temperature was continuously low to the 21st, particularly from the 13th, the mean temperature of the nine days ending the 21st was 10½° below their average; from the 21st the weather was milder. The mean temperature of the month was 4° below the average of 46 years. The atmospheric pressure was above the average till the 8th day, having been above the average since January 11th; from March 9th to the 16th it was low, and after this it was for a few days together above, and then for a few days below the average to the end of the month.

The fall of rain was less than the average at most stations. Snow fell on every day from the 11th to the 22nd at one or other station; on some days the fall was general over the whole country. Fog was prevalent. At the end of the quarter all vegetation was very backward.

About London the mean daily temperature of the air was below its average till the 18th day, the mean daily deficiency of temperature was 5°·3; then from January 19th to February 5th there was an average excess of 3°·8 of daily temperature; from February 6th to 18th was cold, the average daily deficiency of temperature was 5°·2; then for seven days there was an average excess of daily temperature of 3°·1; a cold period then set in and extended to March 21st, the average daily deficiency of these 24 days was 7°; the most severe cold was from the 13th to the 21st, the mean temperature of these nine days was 31°·1, being 10°·5 below their average; and from March 21st to the end of the quarter the average daily excess of mean temperature was 1°·4.

The mean temperature of the air for January was 35°·6, being 1°·0 and 2°·8 below the average of 116 years and 46 years respectively; it was 0°·5, 1°·0, and 8°·3 lower than in 1886, 1885, and 1884 respectively.

The mean temperature of the air for February was 38°·8, being of the same value as the average of 116 years, and 0°·8 below that of 46 years; it was 5°·1 higher than in 1886; 5°·1 lower than in 1885 and 3°·1 lower than in 1884.

The mean temperature of the air for March was 37°·6, being 3°·5 and 4°·1 lower than the average of 116 years and 46 years respectively; it was 2°·0 lower than in 1886, 2°·7 lower than in 1885, and 6°·9 lower than in 1884. The previous instances back to 1800 of mean temperatures about or lower than 37°·6 are as follows:—

1883	it was 36°·1.	1845	it was 35°·2.	1814	it was 35°·1.
1869	„ 37°·5.	1840	„ 37°·6.	1808	„ 37°·1.
1867	„ 37°·7.	1837	„ 35°·8.	1807	„ 37°·0.
1865	„ 36°·6.	1833	„ 37°·6.	1800	„ 37°·5.
1855	„ 37°·9.				

The mean temperature of the quarter was 37°·3, being 1°·5 and 2°·6 lower than the average of 116 years and 46 years respectively; it is 0°·8 higher than in 1886; of the same value as that of 1881; 0°·2 higher than in 1879; 0°·8 higher than in 1865, and 3°·2 higher than in 1855, which was the lowest of any back to 1840.

The mean high day temperature of the air in January was 40°·2, being 2°·7 below the average of 46 years; it was 0°·6 lower than in 1886; of the same value as in 1885, and 7°·6 lower than in 1884.

NOTE.—In reading this table it will be borne in mind that the plus sign (+) signifies *above* the average, and the minus sign (−) signifies *below* the average.

Average duration of the different directions of the wind referred to eight points of the compass, and duration in days of each direction in each month in the quarter, were as follows:—

Direction of Wind.	JANUARY. 1887.	JANUARY. Average.	JANUARY. Departure from Average.	FEBRUARY. 1887.	FEBRUARY. Average.	FEBRUARY. Departure from Average.	MARCH. 1887.	MARCH. Average.	MARCH. Departure from Average.
	d.	d.	d.	d.	d.	d.	d.	d.	d.
N.W.	4	2	+ 2	2	2½	− ½	3	3	0
N.	2	3½	− 1½	4	3	+ 1	5	4	+ 1
N.E.	2	3½	− 1½	9	4	+ 5	6	4	+ 2
E.	1	1	0	1	2	− 1	6	3	+ 3
S.E.	7	3¼	+ 3¾	3	1½	+ 1½	0	2½	− 2½
S.	4	4¼	− ¼	0	3	− 3	0	3	− 3
S.W.	8	9½	− 1¼	8	9	− 1	5	8	− 3
W.	3	3¾	− ¾	1	3	− 2	6	3½	+ 2½

The sign (+) denotes excesses over averages; the numbers affected by this sign in January, are opposite to N.W. and S.E.; in February to N.E. and S.E.; and in March to E., N.E. and W.

The sign (−) denotes deficiencies below averages. In January this sign is opposite to N., N.E., and S.W.; in February to S. and W.; and in March to S. and S.W.

The mean high day temperature of the air in February was 45°·4, being 0°·1 lower than the average of 46 years; it was 7°·4 higher than in 1886; 4°·0 lower than in 1885 and 2°·3 lower than in 1884.

The mean high day temperature of the air in March was 45°·3, being 4°·6 below the average of 46 years; it was 2°·0 lower than in 1886; 3°·7 lower than in 1885, and 7°·4 lower than in 1884.

The mean low night temperature of the air for January was 30°·6, being 2°·9 below the average of 46 years; it was 0°·3 lower than in 1886; 1°·7 lower than in 1885, and 8°·6 lower than in 1884.

The mean low night temperature for February was 32°·5, being 2°·0 below the average of 46 years; it was 2°·7 higher than in 1886; 6°·1 and 4°·3 lower than in 1885 and 1884 respectively.

The mean low night temperature for March was 31°·2, being 3°·9 below the average of 46 years; it was 2·3, 1°·3, and 6°·2 lower than in the years 1886, 1885, and 1884 respectively.

Therefore the days and nights were cold in January and March; in February the days were about their average value, but the nights were cold.

The mean daily range of temperature in January was 9°·6, being about the average; in February was 12°·9, being 1°·8 greater than the average; and in March was 14°·1, being 0°·6 smaller than the average.

The mean temperature of the air in January was 0°·9 lower than in December; in February was 3°·2 warmer than in January; and in March was 1°·2 colder than in February.

(From the preceding 46 years' observations the decrease of temperature from December to January is 1°·5; the increase from January to February is 1°·2, and the increase from February to March is 2°·1.)

From December to January at stations south of 53°, there was a decrease of temperature of about 1°, but at stations north of this parallel there was an increase of temperature exceeding 1°.

From January to February there was an increase at stations, amounting to 1°·2 south of 51°; to 2°·8 at stations between 51° and 52°; to 3°·6 between 52° and 53°; and to 2°·5 at stations north of 53°.

From February to March there was a decrease at all stations to about 1°.

The mean readings of the barometer at the height of 159 ft. above the level of the sea for the month of January was 29·831 ins., being 0·084 in. above the average of 46 years, 0·356 in. higher than in 1886, 0·118 in. higher than in 1885, and 0·084 in. lower than in 1884.

The mean reading of the barometer in February was 30·145 ins., being 0·356 in. above the average of 46 years; 0·200 in., 0·602 in., and 0·401 in. higher than in the years 1886, 1885, and 1884 respectively.

The mean reading of the barometer in March was 29·891 ins., being 0·138 in. above the average, 0·099 higher than in 1886; 0·009 in. lower than in 1885, and 0·129 in. higher than in 1884.

The mean reading of the barometer in January was 0·309 in. higher than in December; in February was 0·31 in. higher than in January, and in March was 0·25 in. lower than in February.

(From the preceding 46 years observations the mean reading in January is 0·04 in. lower than in December; in February is 0·04 in. higher than in January, and March is 0·04 in. lower than in February.)

From December to January there was an increase of atmospheric pressure at all stations; at those south of latitude 51°, amounting to 0·26 in.; at those between 51° and 52°, to 0·29 in.; those between 52° and 53°, to 0·33 in.; and north of 53° to 0·30 in.

From January to February there was an increase of pressure, amounting to 0·31 in. at stations south of 51°; of 0·32 in. at those between 51° and 52°; to 0·33 in. at those between 52° and 53°; and north of this parallel the mean increase was 0·36 in.

From February to March there was a mean decrease at stations south of 51° of 0·23 in.; between 51° and 52° of 0·25 in.; between 52° and 53° of 0·26 in.; and north of this parallel of 0·20 in.

About London the barometric pressure on January 1st and 2nd was a little above the average, the reading then declined quickly and at the height of 160 feet was below 29 ins.; on the 5th, 6th, 7th, and 8th, and below the average till the 10th day; the average daily deficiency of pressure to the 10th was 0·46 in.; on the 11th there was an excess of pressure above the average, and from this day to March 8th (with the solitary exception of February 1st, when the pressure was slightly below the average), the atmospheric pressure was constantly high, the average daily excess of the 58 days ending March 8th was 0·34 in.; then till the 16th, the average daily deficiency of pressure was 0·11 in.; for four days to the 20th, the average excess of pressure was 0·15 daily; then five days when the pressure was below the average, amounting to 0·40 in. daily; then from the 26th to the end of the quarter there was a mean daily excess of 0·18 in.

Thunderstorms occurred at Truro on January 8th, and at Lowestoft on March 27th.

Thunder was heard but lightning was not seen at Hull on March 24th, at Halifax on March 25th, and at Somerleyton on March 27th.

Lightning was seen but thunder was not heard at Guernsey on January 5th, at Liverpool on February 2nd, and at Oxford on February 23rd.

Solar halos were seen in January, on the 3rd at Halifax; on the 6th at Halifax and Stonyhurst; and on the 10th and 27th at Torquay.

In February, at Stonyhurst on the 2nd; and at Torquay and Oxford on the 5th.

In March, on the 6th at Oxford, Liverpool, and Halifax; on the 11th at Halifax; on the 18th and 24th at Torquay; on the 26th at Halifax; on the 28th at Torquay and Liverpool; and on the 30th at Halifax.

Lunar halos were seen in January on the 2nd at Lowestoft; on the 4th at Oxford, Liverpool, and Stonyhurst; on the 10th at Torquay, Oxford, Liverpool, Halifax, and Stonyhurst; and on the 13th at Torquay.

In February, on the 1st at Liverpool, Halifax, and Stonyhurst; on the 3rd at Stonyhurst; on the 4th at Leicester and Liverpool; and on the 7th at Torquay.

In March, on the 4th at Torquay and Bath; on the 6th at Salisbury, Bath, Oxford, Wolverhampton, Burslem, Liverpool, and Stonyhurst; and on the 28th and 30th at Halifax.

Aurora borealis was seen at Stonyhurst on March 15th.

Snow fell in January, on the 1st at Lowestoft, Wolverhampton, and Burslem; on the 2nd at Guernsey, Ventnor, Bath, Blackheath, Oxford, Royston, Rugby, Lowestoft, Wolverhampton, Burslem, Halifax, and Hull; on the 3rd at Torquay, Ventnor, Salisbury, Whitchurch, Oxford, Cardington, Wolverhampton, Nottingham, and Burslem; on the 4th at Ventnor, Osborne, Whitchurch, Blackheath, Oxford, Royston, Cardington, and generally at all stations up to Carlisle; on the 5th at Torquay, Salisbury, Bath, Whitchurch, Blackheath, Royston, and at most other stations to Carlisle; on the 6th at Salisbury, Bath, Blackheath, Oxford, Royston, Cardington, Cambridge, Rugby, Wolverhampton, Burslem, Llandudno, Liverpool, Leeds, and Carlisle; on the 7th, it fell generally over the country from Torquay in the south to Carlisle in the north; on the 8th at Torquay, Bath, Whitchurch, Rugby, Wolverhampton, Leicester, Burslem, Liverpool, Halifax, Stonyhurst, Bradford, and Carlisle; on the 9th at Torquay, Whitchurch, Blackheath, Oxford, Cardington, Cambridge, Rugby, Wolverhampton, Burslem, Liverpool, Halifax, Hull, Stonyhurst, Bradford, and Carlisle; on the 10th at Whitchurch; on the 11th at Hull; on the

16th at Torquay, Ventnor, Osborne, Blackheath, Oxford, Royston, Cardington, Cambridge, Rugby, Burslem, and Halifax; on the 17th at Guernsey, Bath, Blackheath, Oxford, Royston, Lowestoft, Somerleyton, Wolverhampton, Burslem, Liverpool, Halifax, Hull, Stonyhurst, Bradford, and Carlisle; and on the 18th at Holkham and Hull.

In February, on the 1st at Royston, Cardington, Rugby, Wolverhampton, Liverpool, and Halifax; on the 10th at Guernsey; on the 11th at Guernsey, Torquay, Ventnor, Osborne, and Salisbury; on the 13th and 14th at Halifax; on the 18th at Royston and Cambridge.

In March, on the 11th at Whitchurch, Oxford, Royston, Lowestoft, Somerleyton, Wolverhampton, Burslem, Halifax, Hull, Stonyhurst, Bradford, and Carlisle; on the 12th at Guernsey and at most stations north of latitude 51°; on the 13th at Lowestoft, Somerleyton, and Hull; on the 14th at Plymouth, Torquay, Bath, Oxford, Royston, Cardington, Cambridge, Rugby, Lowestoft, Burslem, Liverpool, and Hull; on the 15th at Guernsey, Plymouth, Torquay, Ventnor, Osborne, Salisbury, Bath, Whitchurch, Blackheath, and at most northern stations; on the 16th at Guernsey, in the Isle of Wight, and at most stations; on the 17th at Guernsey, Osborne, Whitchurch, Blackheath, and at many stations to Carlisle; on the 18th at Whitchurch, Blackheath, and at almost all stations; on the 19th at Torquay, Ventnor, Royston, Cardington, Cambridge, Rugby, Lowestoft, Burslem, Halifax, and Hull; on the 20th at Torquay, Ventnor, Osborne, Salisbury, Bath, Oxford, Royston, Cardington, Cambridge, Rugby, Burslem, Liverpool, Halifax, Hull, and Bradford; on the 21st at Torquay, Whitchurch, Cardington, Rugby, Burslem, Halifax, and Hull; on the 22nd at Royston, Rugby, Liverpool, Halifax, Stonyhurst, and Bradford; and on the 24th at Rugby.

Hail fell in January, on the 3rd at Truro, Torquay, and Llandudno; on the 4th at Truro, Ventnor, and Liverpool; on the 5th at Guernsey, Truro, and Liverpool; on the 6th at Truro, Plymouth, Osborne, and Liverpool; on the 7th at Plymouth and Torquay; on the 8th at Truro; and on the 14th at Ventnor and Carlisle.

In February, on the 1st at Royston and Stonyhurst; on the 2nd at Bath and Liverpool; and on the 25th at Hull and Carlisle.

In March, on the 10th at Torquay, Royston, and Carlisle; on the 11th at Hull; on the 12th at Oxford and Hull; on the 13th at Hull; on the 14th at Torquay; on the 15th at Torquay; on the 20th at Truro; on the 22nd at Torquay, Bath, and Royston; on the 23rd at Torquay; on the 24th at Torquay and Bath; on the 25th at Bradford; and on the 31st at Osborne and Carlisle.

Fog was prevalent in January, on the 1st at Bath, Blackheath, Oxford, Royston, Cambridge, Rugby, Wolverhampton, Leicester, and Nottingham; on the 2nd at Blackheath, Royston, Cambridge, Wolverhampton, and Leicester; on the 3rd at Whitchurch, Rugby, Wolverhampton, and Leicester; on the 6th at Cardington, Cambridge, Rugby, Wolverhampton, Leicester, Nottingham, and Bradford; on the 7th at Cardington, Rugby, Lowestoft, Somerleyton, Wolverhampton, Leicester, Liverpool, Hull, and Bradford; on the 8th at Bath, on the 10th at Salisbury, Bath, Lowestoft, Somerleyton, Burslem, and Stonyhurst; on the 13th at Plymouth, Osborne, Bath, Whitchurch, Blackheath, Oxford, Royston, Cardington, Cambridge, Rugby, Somerleyton, Wolverhampton, Leicester, Nottingham, Burslem, Hull, Stonyhurst, Bradford, and Leeds; on the 14th at Osborne, Blackheath, Royston, Cardington, Cambridge, Rugby, Somerleyton, Wolverhampton, Leicester, Liverpool, and Bradford; on the 17th at Torquay and Bradford; on the 18th at Guernsey, Torquay, Ventnor, Osborne, Salisbury, Bath, Blackheath, Oxford, Cambridge, Rugby, Lowestoft, Leicester, Nottingham, and Leeds; on the 24th at Bath and Cambridge; on the 25th at Bath, Barnet, Oxford, Cardington, Cambridge, Lowestoft, Somerleyton, Wolverhampton, Leicester, and Hull; on the 26th at Bath, Barnet, Cambridge, and Hull; on the 27th at Salisbury, Bath, Whitchurch, Blackheath, Barnet, Oxford, Royston, Cardington, Lowestoft, Somerleyton, Leicester, Bradford, and Leeds; on the 28th at Guernsey, Plymouth, Torquay, Bath, Whitchurch, Blackheath, and Cambridge; on the 29th at Guernsey, Plymouth, Torquay, Ventnor, Osborne, Bath, Whitchurch, and Blackheath; on the 30th at Guernsey, Torquay, Bath, Whitchurch, Blackheath, Royston, Cambridge, Lowestoft, and Somerleyton.

In February, on the 5th at Guernsey and Bath; on the 6th at Lowestoft; on the 7th at Bath, Royston, Cardington, Cambridge, Lowestoft, Somerleyton, Nottingham, Hull, and Bradford; on the 8th at Cardington and Bradford; on the 14th and 15th at Leicester; on the 16th at Guernsey, Bath, Oxford, Rugby, and Leicester; on the 17th at Guernsey, Plymouth, Osborne, Bath, Whitchurch, Blackheath, Oxford, Somerleyton, Leicester, and Bradford; on the 18th at Guernsey, Torquay, Bath, Whitchurch, Blackheath, Lowestoft, Somerleyton, and Wolverhampton; on the 19th at Leicester and Bradford; on the 21st at Somerleyton and Leicester; on the 22nd at Blackheath, Barnet, and Cambridge; on the 26th at Bradford; on the 27th at Bath, Whitchurch, Blackheath, Barnet, Oxford, Cambridge, and Somerleyton; on the 28th at Bath, Whitchurch, Blackheath, Oxford, Cambridge, and Bradford.

In March, on the 1st at Guernsey, Plymouth, Torquay, Osborne, Bath, Whitchurch, Blackheath, Oxford, Cardington, Rugby, and Wolverhampton; on the 2nd at Guernsey, Blackheath, Oxford, Cambridge, Lowestoft, Somerleyton, Nottingham, and Hull; on the 3rd at Guernsey, Torquay, Ventnor, Osborne, Bath, Whitchurch, Blackheath, Oxford, Royston, Cardington, Cambridge, Lowestoft, Somerleyton, Nottingham, and Hull; on the 4th at Guernsey, Plymouth, Torquay, Ventnor, Osborne, Salisbury, Bath, Whitchurch, Blackheath, Barnet, Oxford, Cardington, Cambridge, Rugby, Lowestoft, Somerleyton, Wolverhampton, Nottingham, Liverpool, Hull, Stonyhurst, and Bradford; on the 5th at Guernsey, Plymouth, Torquay, Osborne, Bath, Whitchurch, Blackheath, Barnet, Oxford, Cardington, Cambridge, Rugby, Wolverhampton, Liverpool, Halifax, Hull, Stonyhurst, Bradford, and Carlisle; on the 6th at Guernsey and Torquay; on the 10th at Cambridge; on the 11th at Blackheath, Oxford, Cambridge, and Wolverhampton; on the 15th at Blackheath, Somerleyton, and Wolverhampton; on the 16th at Wolverhampton; on the 17th at Wolverhampton, Liverpool, and Bradford; on the 19th and 20th at Wolverhampton; on the 29th at Stonyhurst; and on the 30th and 31st at Plymouth.

MONTHLY METEOROLOGICAL TABLE FOR THE QUARTER ENDING MARCH 31st, 1887.

The Observations have been reduced to Mean values by Glaisher's Barometrical and Diurnal Range Tables, and the Hygrometrical results have been deduced from the seventh edition of his Hygrometrical Tables.

Names of Stations and Observers.	Height of Station above Sea Level.	Year 1887. Months.	Pressure of Atmosphere in Month. Mean.	Pressure of Atmosphere in Month. Range.	Temperature of Air in Month. Highest.	Lowest.	Range.	Mean of all Highest.	Mean of all Lowest.	Mean Daily Range.	Mean Temperature. Air.	Dew Point.	Vapour. Elastic Force.	Vapour. In a cubic foot of Air. Mean.	Short of Saturation. Names of Stations and Observers.	Height of Station above Sea Level.	Year 1887. Months.	Pressure of Atmosphere in Month. Mean.	Pressure of Atmosphere in Month. Range.	Temperature of Air in Month. Highest.	Lowest.	Range.	Mean of all Highest.	Mean of all Lowest.	Mean Daily Range.	Mean Temperature. Air.	Dew Point.	Vapour. Elastic Force.	Vapour. In a cubic foot of Air. Mean.	Short of Saturation.	Mean Degree of Humidity. Sat^n. = 100.	Mean Weight of a cubic foot of Air.	Mean Reading of Thermometer. Maximum in Rays of Sun.	Minimum on Grass.	Wind. Estimated Strength.	Relative Proportion of N.	E.	S.	W.	Mean Amount of Ozone.	Mean Amount of Cloud.	Rain. Number of Days it fell.	Amount collected.

The highest temperatures of the air were at Carlisle, 63°·2; at Salisbury and Rugby, 61°·0.
The lowest temperatures of the air were at Rugby, 6°·5; at Barnet, 8°·0; and at Holkham, 10°·8.
The greatest ranges of temperature were at Rugby, 54°·5; at Barnet, 50°·0; and at Salisbury, 48°·0.
The least ranges of temperature were at Guernsey, 26°·9; at Liverpool, 30°·2; and at Llandudno, 31°·7.
The greatest number of days of rain were at Guernsey, 49; at Burslem, 44; and at Salisbury and Nottingham, 42.
The least number of days of rain were at Barnet 24; at Cardington, 24; and at Greenwich and Blackheath, 28.
The greatest falls of rain were at Stonyhurst, 8·12 inches; at Bath, 7·60 inches; and at Salisbury, 6·48 inches.
The least falls of rain were at Blackheath, 2·91 inches; at Greenwich, 3·03 inches; and at Holkham, 3·11 inches.

Quarterly Meteorological Table for different Parallels of Latitude.

PARALLELS OF LATITUDE, &c.	Mean Pressure of dry Air reduced to the level of the Sea.	Mean of all Highest Readings of the Thermometer.	Mean of all Lowest Readings of the Thermometer.	Mean Range of Temperature in the Quarter.	Mean of all Highest.	Mean of all Lowest.	Mean Monthly Range of Temperature.	Mean Daily Range of Temperature.	Mean Temperature of the Air.	Mean Temperature of the Dew Point.	Mean Elastic Force of Vapour.	Mean Weight of Vapour in a cubic foot of Air.	Mean additional Weight required for saturation	Mean degree of Humidity.	Mean Weight of a cubic foot of Air.	Mean Reading of Maximum in Rays of Sun.	Mean Reading of Minimum on Grass.	Wind. Mean Estimated Strength.	Wind. Relative Proportion of N.	Wind. Relative Proportion of E.	Wind. Relative Proportion of S.	Wind. Relative Proportion of W.	Mean Amount of Ozone.	Mean Amount of Cloud.	Rain. Mean Number of Days it fell.	Rain. Mean Amount col-

INDEX OF SUPERINTENDENT REGISTRARS' DISTRICTS.

The following Index furnishes a reference to the *Number** of each SUPERINTENDENT REGISTRAR'S DISTRICT. In forming the alphabetical arrangement, the principle adopted has been to place compound names in the order in which they are pronounced.

Aberayron, 604.
Abergavenny, 582.
Aberystwith, 605.
Abingdon, 115.
Alcester, 397.
Alderbury (Salisbury), 254.
Alnwick, 563.
Alresford, 105.
Alston, 568.
Alton, 106.
Altrincham, 445.
Alverstoke, 89.
Amersham, 140.
Amesbury, 253.
Ampthill, 173.
Andover, 110.
Anglesey, 630*a*.
Ashborne, 438.
Ashby-de-la-Zouch, 406.
Ashton-under-Lyne, 468.
Aston, 387.
Atcham (Shrewsbury), 351.
Athorstone, 389.
Auckland, 545.
Axbridge, 315.
Axminster, 269.
Aylesbury, 143.
Aylsham, 223.
Aysgarth, 539.

Bakewell, 440.
Bala, 623.
Banbury, 155.
Bangor, 628.
Barnet, 128.
Barnsley, 506.
Barnstaple, 285.
Barrow-in-Furness, 482.
Barrow-upon-Soar, 408.
Barton Regis, 321.
Barton-upon-Irwell, 463.
Basford, 430.
Basingstoke, 108.
Bath, 317.
Battle, 69.
Beaminster, 267.
Bedale, 537.
Bedford, 171.
Bedminster, 319.
Bedwelty, 583.
Belford, 564.
Bellingham, 561.
Belper, 437.
Berkhampstead, 139.
Berwick, 565.
Bethnal Green, 16.
Beverley, 519.
Bicester, 151.
Bideford, 287.
Biggleswade, 172.
Billericay, 191.
Billesden, 403.
Bingham, 434.
Birkenhead, 452.
Birmingham, 386.
Bishop Stortford, 131.
Blaby, 403.
Blackburn, 474.
Blandford, 260.
Blean, 58.
Blofield, 228.
Blything, 216.
Bodmin, 294.
Bolton, 461.
Bootle, 576.
Bosmere, 211.
Boston, 417.
Bourn, 414.
Brackley, 156.
Bradfield, 118.
Bradford-on-Avon, 249.
Bradford (Yorks), 497.
Braintree, 199.
Bramley, 500.
Brampton, 570.
Brecknock, 608.
Brentford, 126.
Bridge, 56.
Bridgend, 589.
Bridgnorth, 348.
Bridgwater, 307.
Bridlington, 525.
Bridport, 263.
Brighton, 77.
Bristol, 320.
Brixworth, 162.
Bromley, 41.
Bromsgrove, 384.
Bromyard, 341.
Buckingham, 146.
Builth, 607.
Burnley, 472.
Burton-upon-Trent, 367.
Bury, 462.
Bury St. Edmunds, 206.

Caistor, 424.
Calne, 245.
Camberwell, 26.
Cambridge, 179.
Camelford, 290.
Cannock, 370.
Canterbury, 57.
Cardiff, 586.
Cardigan, 601.
Carlisle, 572.
Carmarthen, 597.
Carnarvon, 627.
Castle Ward, 553.
Catherington, 103.
Caxton, 177.
Chapel-en-le-Frith, 441.
Chard, 309.
Cheadle, 365.
Chelmsford, 192.
Chelsea, 3.
Cheltenham, 335.
Chepstow, 580.
Chertsey, 31.
Chester, 450.
Chesterfield, 439.
Chester-le-Street, 552.
Chesterton, 178.
Chichester, 84.
Chippenham, 244.
Chipping Norton, 154.
Chipping Sodbury, 322.
Chorley, 475.
Chorlton, 464.
Christchurch, 93.
Church Stretton, 346.
Cirencester, 331.
Cleobury Mortimer, 347.
Clitheroe, 473.
Clun, 345.
Clutton, 316.
Cockermouth, 574.
Colchester, 196.
Congleton, 448.
Conway, 629.
Cookham, 121.
Corwen, 622.
Cosford, 204.
Coventry, 392.
Cranbrook, 52.
Crediton, 282.
Crickhowell, 609.
Cricklade, 242.
Croydon, 38.
Cuckfield, 75.

Darlington, 542.
Dartford, 42.
Daventry, 161.
Depwade, 230.
Derby, 436.
Devizes, 247.
Dewsbury, 502.
Docking, 235.
Dolgelly, 624.
Doncaster, 511.
Dorchester, 265.
Dorking, 35.
Dover, 64.
Downham, 238.
Driffield, 524.
Droitwich, 333.
Droxford, 102.
Dudley, 374.
Dulverton, 304.
Dunmow, 200.
Durham, 549.
Dursley, 324.

Easington, 550.
Easingwold, 528.
East Ashford, 55.
Eastbourne, 70.
East Grinstead, 74.
Easthampstead, 122.
East Preston (Worthing), 82.
East Retford, 427.
Eastry, 63.
East Stonehouse, 278.
East Ward, 577.
Ecclesall Bierlow, 508.
Edmonton, 129.
Elham, 65.
Ellesmere, 353.
Ely, 182.
Epping, 187.
Epsom, 30.
Erpingham, 222.
Eton, 141.
Evesham, 381.
Exeter, 272.

Falmouth, 298.
Fareham, 90.

QUARTERLY RETURN

OF

MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE DIVISIONS, COUNTIES, AND DISTRICTS OF

ENGLAND;

WITH CERTAIN DETAILED INFORMATION RELATING TO THE DEATHS IN EACH REGISTRATION SUB-DISTRICT.

By Authority of the Registrar General.

Printed under the Superintendence of Her Majesty's Stationery Office,
AND SOLD BY EYRE AND SPOTTISWOODE, 9, EAST HARDING ST., FETTER LANE, E.C.

No. 153.] **Marriages**—*January, February, March,* 1887.
Births and **Deaths**—*April, May, June,* 1887. [Price 9*d.*

General Register Office, Somerset House,
28th July, 1887.

The POPULATION of the UNITED KINGDOM in the middle of 1887 is estimated at 37,091,564 persons; that of England and Wales at 28,247,151, of Scotland at 3,991,499, and of Ireland at 4,852,914.

In the United Kingdom 288,782 *births*, and 170,442 *deaths* were registered in the three months ending 30th June 1887. The natural increase of population was, therefore, 18,340. The registered number of persons married in the quarter ending 31st March 1887 was 104,312.

The birth-rate in the United Kingdom in the second quarter of 1887 was 31·2 and the death-rate 18·4 per 1000. The marriage-rate in the first quarter of 1887 was 11·4 per 1000.

The several facts concerning Scotland and Ireland are recorded in the Quarterly Returns of the Registrars-General for those parts of the United Kingdom.

ENGLAND.

This Return comprises the BIRTHS and DEATHS registered in the 2137 registration sub-districts of England and Wales during the quarter ending 30th June 1887; and the MARRIAGES in 14,829 churches or chapels, in 9814 registered places of worship unconnected with the Established Church, and in 632 Superintendent Registrars' Offices, in the three months ending 31st March 1887.

Marriages.

During the three months ending with March last, the marriages of 77,608 persons were registered in England and Wales, corresponding to an annual rate of 11·1 per 1000 of the estimated population in the middle of this year. This rate showed a further decline from the rates that prevailed in recent corresponding quarters, and was lower than that recorded in the first quarter of any year since civil registration commenced in 1837; the rate was 1·2 below the mean rate in the first quarters of the ten years 1877–86. The lowest county rates in the first quarter of this year were 7·4 in Huntingdonshire, 7·7 in Hertfordshire, and 7·9 in the extra-metropolitan portion of Middlesex. The rates in the other registration counties ranged upwards to 12·5 in Northumberland, 12·7 in Devonshire, 12·8 in Lancashire, 13·0 in the East Riding of Yorkshire and in South Wales, and 13·1 in Durham.

Births.

The births registered in England and Wales during the three months ending with June last were 226,371, and corresponded to an annual rate of 32·1 per 1000 of the estimated population. This rate was lower than that recorded in the corresponding quarter of any year since 1838, when the registration of births was undoubtedly defective; it was 2·6 below the mean rate in the second quarters of the ten years 1877–86. The rates in the various registration counties ranged from 26·5 in Sussex, 27·1 in North Wales, and 27·9 in the extra-metropolitan portion of Surrey and in Westmorland, to 36·0 in Nottinghamshire, 36·4 in Northumberland, 36·6 in Durham, 37·1 in Essex, and 38·3 in Monmouthshire.

In the twenty-eight great towns the births registered last quarter corresponded to an annual rate of 32·4, which was 0·3 above the general English rate. The rate was 31·5 in London, while the mean rate in the twenty-seven provincial towns was 33·2. Among the provincial towns the lowest recorded rates were 24·8 in Brighton, 26·6 in Huddersfield, 28·2 in Bradford, and 28·5 in Halifax; ; the rates in the other towns ranged upwards to 37·0 in Portsmouth, 38·5 in Newcastle-upon-Tyne, 39·8 in Preston, and 41·5 in Cardiff. In fifty other large town districts the mean birth-rate was 33·2, and exceeded the rate in the twenty-eight large towns by 0·8. The lowest rates in these fifty towns were 21·4 in Southport, 21·9 in Cheltenham, 22·1 in Bath, and 22·8 in Hastings; the highest rates were 39·4 in Wigan, 39·9 in South Shields, 40·3 in Stoke-upon-Trent, and 43·6 in Ystradyfodwg.

Movement of the Population.

The natural increase of the population of England and Wales, or the excess of births over deaths, which had been 89,802 and 105,752 in the second quarters of 1885 and 1886, was 97,935 in the three months ending June last. Compared with the registered numbers in the second quarter of 1886, the births last quarter showed a decline, while the deaths had increased. It appears from returns issued by the Board of Trade that 145,940 emigrants embarked during the quarter from various ports of the United Kingdom at which emigration officers are stationed. Distributing 760 whose nationality was undistinguished, and excluding 42,899 foreigners, the emigrants of British origin were 103,041, including 51,145 English, 12,090 Scotch, and 39,806 Irish. The numbers of British emigrants in the four preceding corresponding quarters were 134,707, 92,451, 76,604, and 82,122 respectively. The proportions of emigrants last quarter to a million of the estimated population in the three divisions of the United Kingdom were 1811 from England, 3029 from Scotland, and 8202 from Ireland. Compared with the corresponding quarter of 1886 the proportional amount of emigration last quarter showed an increase of 15 per cent. in England, 41 per cent. in Scotland, and 35 per cent. in Ireland.

Prices and Pauperism.

The average price of wheat during the three months ending with June last was 33*s.* 9*d.*, and was 0*s.* 3*d.* below the average price in the preceding quarter. The mean wholesale prices of beef and of mutton were $4\frac{3}{8}$*d.* and $5\frac{3}{8}$*d.* per lb. respectively; the mean prices both of beef and of mutton corresponded with the mean prices in the preceding quarter. The average price of the best sea-borne coal in the London market, put in barge from the collier in the Thames, was 15*s.* 2*d.* per ton, against 15*s.* 9*d.* and 14*s.* 5*d.* in the corresponding quarters of 1885 and 1886. The mean price of Consols was $102\frac{4}{8}$*l.*, which after correction for the value of the accruing dividend, showed an increase upon the mean price in the preceding quarter. The minimum annual rate of discount charged at the Bank of England, which was raised to 5*l.* per cent. on 16th December last, has since steadily declined. The changes during last quarter were to $2\frac{1}{2}$*l.* per cent. on 14th April, and to 2*l.* per cent. on 28th April; the average rate during the quarter being 2·23*l.* per cent.

The average number of paupers (exclusive of lunatics in asylums, and vagrants) relieved in England and Wales on the last day of each week in the quarter was 722,128, of whom 178,652 received in-door and 543,476 out-door relief. The proportion of the population in receipt of pauper relief during the three months ending with June was 25·6 per 1000, against 25·7, 25·4, and 26·3 in the three preceding corresponding quarters.

Meteorology.

The remarks upon the Meteorology of the quarter at the Royal Observatory Greenwich, and at the various stations of observation, furnished by Mr. James Glaisher, F.R.S., with accompanying Tables, will be found on pages 65–72. The mean reading of the barometer at Greenwich was 29·888 inches, and was 0·108 above the mean reading for the corresponding periods of 46 years; the mean reading was above the average in each month of the quarter. The mean temperature of the air during the quarter was 51°·6, and was 0°·7 below the average for the corresponding periods of 116 years. The mean temperature was considerably below the average in April and May, but showed an excess in June. The weather in April was very cold and dry, and the temperature, excepting on two days, was below the average throughout that month; in May also the weather was cold and unseasonable, the temperature being almost constantly below the average. In June the weather was very fine and dry. At 30 stations of observation the mean temperature during the quarter ranged from 48°·2 at Somerleyton and 48°·3 at Halifax, to 53°·3 at Plymouth and 54°·4 at Barnstaple.

The amount of rain or melted snow measured at Greenwich during the quarter was 4·70 inches, and was 1·11 inches below the average amount in the corresponding periods of 72 years. The rainfall was below the average in each month of the quarter; and the amount measured in the first half of this year was 3·1 inches below the average. Rain was measured at Greenwich on 11 days in April, 18 in May, and 3 in June; or on 32 of the 91 days in the quarter. The amount recorded at 30 stations of observation ranged from 3·01 inches at Torquay to 5·78 inches at Bath.

The number of hours of bright sunshine recorded during the quarter at the Royal Observatory, Greenwich, was 502·8, and was 28·9 above the average amount recorded in the corresponding periods of the ten years 1877–86.

State of the Public Health; Deaths.

During the three months ending with June last 128,436 deaths were registered in England and Wales, corresponding to an annual rate of 18·2 per 1000 of the estimated population. This death-rate very slightly exceeded the unprecedentedly low rate that prevailed in the corresponding quarter of last year, and was 1·4 below the mean rate in the second quarters of the ten years 1877–86. The lowest county rates during the quarter were 14·6 in the extra-metropolitan portion of Surrey, and 14·9 in the extra-metropolitan portion of Middlesex, in Sussex, and in Westmorland; the highest rates were 20·8 in Cornwall, 21·1 in Monmouth, 21·2 in Northumberland, and 21·7 in Lancashire.

The 128,436 deaths last quarter included 66,785 of males, and 61,651 of females. The annual death-rate among males was 19·5, and among females 17·1 per 1000 estimated to be living of each sex. In equal numbers living the deaths of males were 114 to 100 of females; corresponding with the proportion in the second quarter of each of the years 1884, 1885, and 1886.

Urban and Rural Mortality.—In the registration districts and sub-districts containing the largest proportion of urban population (see Table III.), and containing an estimated population of about eighteen millions, the death-rate was 18·8 per 1000; in the remaining and chiefly rural population of a little more than ten millions, the rate was 17·2. These urban and rural rates were each 0·8 below the mean rates in the corresponding quarters of the six years 1881–86. In equal numbers living, the deaths were 109 in the urban to 100 in the rural population, the average proportion in the second quarters of the six years 1881–86 being also 109 to 100.

In the twenty-eight great English towns, including London, and having an estimated population of rather more than nine millions, the registered deaths corresponded to an annual rate of 19·8; this rate exceeded the general urban rate by 1·0. The death-rate was 18·0 in London, and averaged 21·3 in the twenty-seven provincial towns, among which it ranged from 15·2 in Derby, 16·2 in Leicester, and 16·3 in Brighton, to 25·0 in Oldham, 25·4 in Preston, 25·7 in Huddersfield, and 30·2 in Manchester.

In fifty other large town districts, with an aggregate population estimated at nearly three millions, the death-rate was 18·1; it was 0·7 below the general urban rate, and 1·7 below the rate in the twenty-eight larger towns. The lowest rates among these fifty town districts were 9·0 in Maidstone, 11·5 in Burton-on-Trent, and 11·6 in Gloucester; the rates in the other towns ranged upwards to 24·1 in Newport (Monmouth), 24·4 in Merthyr Tydfil, and 26·0 in Wigan.

Mortality at different Ages.—The deaths last quarter included 28,522 of infants under one year of age, 64,517 of persons aged between one and 60 years, and 35,397 of persons aged upwards of 60 years.

Infant mortality, or the proportion of deaths under one year to registered births, was 126 per 1000, and corresponded with the mean proportion in the second quarters of the ten preceding years. The lowest county rates last quarter were 78 in Huntingdonshire, 83 in the extra-Metropolitan portion of Surrey, and 85 in the Extra-Metropolitan portion of Kent; while the highest rates were 140 in Leicestershire, 146 in Cornwall and in the West Riding of Yorkshire, and 154 in Lancashire.

In the twenty-eight great towns the deaths of infants were in the proportion of 142 per 1000 registered births, and 16 above the general English rate. The lowest rates in these towns were 101 in Portsmouth and in Derby, 117 in Halifax, and 118 in Sunderland; the highest rates were 180 in Liverpool and in Oldham, 188 in Manchester, 201 in Blackburn, and 224 in Huddersfield. In fifty other large town districts the mean rate was 131 and 11 below the rate in the largest towns. The proportion was but 59 in Maidstone, 68 in Burton-upon-Trent, and 75 in Reading; it ranged upwards, however, to 177 in Worcester, 180 in Wigan, 183 in Newport (Monmouth), and 190 in Bury.

Among persons aged between one and 60 years the deaths corresponded to an annual rate of 10·2 per 1000, against an average of 11·3 in the ten preceding second quarters. In the twenty-eight great towns the deaths at these ages corresponded to an annual rate of 12·2, ranging from 8·4 in Leicester, 8·7 in Derby, and 9·4 in Nottingham, to 15·9 in Huddersfield, 17·1 in Liverpool, and 20·0 in Manchester.

The deaths among persons aged upwards of 60 years were equal to an annual rate of 68·1 per 1000, which was 1·4 below the mean rate in the ten preceding corresponding quarters. In the twenty-eight great towns the mean death-rate at these ages was 69·1, and 1·0 above the general English rate. In London the rate was 63·7, while the mean rate in the twenty-seven provincial towns was 74·2; it ranged from 54·2 in Norwich, 56·6 in Leicester, and 57·1 in Brighton, to 96·0 in Oldham, 101·0 in Manchester, and 103·4 in Wolverhampton.

During last quarter the death-rate of infants corresponded with the average rate in the ten preceding corresponding quarters, while the death rate of persons aged from 1 to 60 years was 9·7 per cent., and that of persons aged upwards of 60 years was 2·0 per cent., below the mean rates in those quarters.

Zymotic Diseases.—The 128,436 deaths from all causes included—

6144	attributed to	measles,
2986	„	whooping-cough,
1632	„	diarrhœa,
1354	„	scarlet fever,
1066	„	fever,
786	„	diphtheria,
and 47	„	small-pox,

Thus 14,015 deaths were ascribed to these zymotic causes, corresponding to an annual rate of 1·99 per 1000 persons living, the average annual rate in the ten preceding second quarters having been 2·16.

The rate was less than 1·00 in the extra-metropolitan portion of Kent, in Herts, Hunts, Suffolk, Wilts, Dorsetshire, Herefordshire, Salop, Rutlandshire, and Westmorland, while it was 3·24 in Lancashire, and 3·82 in Northumberland. In the twenty-eight great towns the rate was 2·91, varying from 0·74 in Wolverhampton, 0·81 in Halifax, and 0·90 in Derby to 5·00 in Oldham, 6·04 in Manchester, and 6·48 in Norwich. In fifty other considerable town districts the rate was 1·75, while in the remainder of England and Wales, after excluding the seventy-eight towns, the rate was 1·50.

The 6144 deaths from *measles* corresponded to an annual rate of 0·87 per 1000, against an average of 0·45 in the ten preceding second quarters. The rate was higher than any as yet recorded in the Quarterly Returns, that is, in the course of the previous seventeen years.

The rate was less than 0·10 in Hertfordshire, Northamptonshire, Huntingdonshire, Dorsetshire, Herefordshire, Westmorland, and Monmouthshire, while it was 1·50 in Norfolk, 1·69 in Lancashire, and 2·51 in Northumberland. In the twenty-eight great towns the rate was 1·35, varying from 0·06 in Portsmouth and in Plymouth, and 0·09 in Nottingham, to 2·42 in Liverpool and in Sheffield, 2·61 in Newcastle, 2·69 in Oldham, 3·21 in Salford, 3·98 in Manchester, and 5·27 in Norwich. In fifty other considerable town districts the rate was 0·66, rising, however, to 1·40 in Worcester, 1·49 in Middlesborough, 1·98 in Gateshead, 3·75 in Swansea, and 4·83 in Warrington. In the remainder of England and Wales the rate was 0·64. Among districts and sub-districts in which the rate was excessively high were Ripley, Chipping Norton, Bocking, Braintree, Barnstaple, Penryn, Bilston, Darlaston, Hinckley, Loughborough, Stamford, Over, Farnworth, Barton, Audenshaw, Denton, Lockwood, Morley, Batley, Whickham, Blyth, Morpeth, Bedlington, Cadoxton, Llandilotalybont, and Gower Eastern.

The 2986 deaths from *whooping-cough* corresponded to an annual rate of 0·42 per 1000, against an average of 0·54 in the ten preceding second quarters.

The highest rates in counties were 0·69 in Buckinghamshire and 0·79 in Warwickshire. In the twenty-eight great towns the rate was 0·77, rising to 1·00 in Nottingham, 1·20 in Liverpool, 1·24 in Birmingham, and 1·48 in Blackburn. In fifty other considerable town districts the rate was 0·32, rising to 0·94 in York, 1·07 in Devonport, and 1·12 in Gateshead. In the remainder of England and Wales the rate was 0·25. Among sub-districts in which the rate was very high were Ottery St. Mary, North Curry, and Ardsley.

The 1632 deaths from *diarrhœa* corresponded to an annual rate of 0·24 per 1000, against an average of 0·29 in the ten preceding second quarters.

The highest rates were 0·30 in Monmouthshire, 0·33 in Lancashire, 0·38 in Northamptonshire, and 0·41 in Staffordshire. The rate in the twenty-eight great towns was 0·25, rising however to 0·54 in Preston, and 0·55 in Manchester. In fifty other considerable town districts the rate was 0·30, being as high as 1·01 in Dudley; while in the remainder of England and Wales it was 0·21.

The 1354 deaths from *scarlet-fever* corresponded to an annual rate of 0·19 per 1000, against an average of 0·42 in the ten preceding second quarters, in only one of which (1886) had the rate been lower than on the present occasion.

No deaths from this disease were registered in Oxfordshire, Suffolk, Herefordshire, Rutlandshire, or Westmorland, while the rate was 0·34 in South Wales, 0·35 in Lancashire, 0·43 in Gloucestershire, and 0·45 in the West Riding. In the twenty-eight great towns the rate was 0·26, varying from 0·00 in Derby and in Sunderland to 0·53 in Salford, 0·56 in Sheffield, 0·79 in Bristol, and 1·48 in Blackburn. In fifty other considerable town districts the rate was 0·19, rising however to 0·64 in Southampton, 0·79 in Ystradyfodwg, 0·81 in Accrington, and 1·56 in Merthyr Tydfil. In the remainder of England and Wales the rate was

0·15; being, however, among other sub-districts excessively high in Woburn, Blackwell, Haworth, and Penistone.

The 1066 deaths from *fever*, including typhus, enteric fever, and simple and ill-defined forms of continued fever, corresponded to an annual rate of 0·15 per 1000, against an average of 0·26 in the ten preceding second quarters. Once only since quarterly rates have been published, had the fever rate been so low as on the present occasion. This was in the second quarter of 1886.

No death from fever was registered in the little counties of Hunts, Rutlandshire, and Westmorland, while the rate was 0·24 in Lancashire, 0·25 in South Wales, 0·28 in Monmouthshire, and 0·35 in Northumberland. In the twenty-eight great towns the rate was 0·14, and somewhat lower than in the country as a whole; but while no death from this cause was registered in Halifax, the rate was 0·30 in Liverpool and in Manchester, 0·35 in Portsmouth, 0·37 in Birkenhead, and 0·41 in Newcastle. In fifty other considerable town districts the rate was 0·18, rising to 0·43 in Walsall and in St. Helens, 0·55 in Barrow-in-Furness and in Carlisle, 0·64 in Dover, and 0·66 in Newport (Monmouth). In the remainder of England and Wales the rate was 0·15; but, among sub-districts, the rate was excessively high in Bideford, Stapleford, and Flint.

The 786 deaths ascribed to *diphtheria* corresponded to an annual of 0·11 per 1000, a rate which exactly tallied with the average for the ten preceding second quarters.

No death was registered from this disease in the little county of Rutlandshire, and only one each in Northamptonshire, Huntingdonshire, Dorsetshire, Herefordshire, and the East Riding, while the rate was 0·26 in Essex, 0·28 in Middlesex (extra-Met.), and 0·42 in Cambridgeshire. In the twenty-eight great towns the rate was 0·14, varying from 0·00 in Norwich, Plymouth, Halifax, and Hull, to 0·36 in Huddersfield, and 0·48 in Oldham. In fifty other considerable towns districts the rate was 0·07, rising, however, to 0·37 in Wigan, and 0·82 in Cambridge. In the remainder of England and Wales the rate was 0·10; but among sub-districts was excessively high in Maresfield.

The 47 deaths from *small-pox* corresponded to a rate of 0·01 per 1000, the lowest rate as yet recorded in the second quarter of the year, the average for the ten preceding second quarters having been 0·10. Of the 47 deaths only 3 belonged to London, including the outer ring; 14 occurred in Middlesborough, 6 in Cardiff, and 4 in Walsall sub-districts.

The following Table shows the relative mortality from each of the above-mentioned zymotic diseases in England and Wales, in the twenty-eight great towns, in the fifty other considerable town districts, and in the remainder of the country :—

Annual Death-rate per 1,000 from several Zymotic Diseases during the Second Quarter of 1887.

Watering Places and Summer Resorts.—The deaths registered in the registration districts and sub-districts taken as approximately representing the forty-six principal English Watering-places (Table viii.) corresponded to an annual death-rate of 15·5 per 1000 living, against 16·0, 16·1, and 15·6 in the three preceding second quarters. Of this death-rate 1·03 was due to the principal zymotic diseases, a rate considerably below that of the comparatively rural parts of the country that remain after excluding the seventy-eight chief towns or urban districts, as shown in the foregoing Table.

Certification of Causes of Death.—The causes of 117,098, or 91·2 per cent., of the 128,436 deaths in England and Wales were duly certified by registered medical practitioners, and 7076, or 5·5 per cent., by coroners in inquest cases. The causes of the remaining 4262, or 3·3 per cent., of the deaths were not certified. The proportion of uncertified deaths did not exceed 1·0 per cent. in London, whereas it was 3·7 per cent. in the rest of England and Wales. The per-centage of uncertified deaths was only 0·7 in the extra-metropolitan portion of Middlesex, and 1·4 in the extra-metropolitan portion of Surrey, in Sussex, and in Monmouthshire, while it ranged upwards to 5·3 in Huntingdonshire and in Durham, 5·5 in Cornwall, and 5·9 in Westmorland. In Wales 7·3 per cent. of the causes of death were uncertified, the proportions being 8·3 in North Wales and 6·8 in South Wales.

In the twenty-eight great towns the mean proportion of uncertified deaths was 2·2 per cent.; but while it did not exceed 1·0 in London, it averaged 3·1 in the twenty-seven provincial towns. The per-centages of uncertified deaths in these provincial towns ranged from 0·7 in Portsmouth and 1·2 in Wolverhampton, to 4·7 in Salford, Huddersfield, and Halifax, 5·2 in Sheffield, and 5·9 in Sunderland.

Violent Deaths.—The deaths referred to different forms of violence were 4220, and corresponded to an annual rate of 0·60 per 1000 of the estimated population; they were equal to 3·3 per cent. of the total deaths, against a mean per-centage of 3·2 per cent. in the ten preceding corresponding quarters. The death-rates from violence ranged from 0·33 and 0·37 per 1000 in Sussex and Wiltshire, to 0·72 in Warwickshire, 0·80 in Huntingdonshire and Herefordshire, and 0·92 in Monmouthshire.

In the twenty-eight great towns the deaths from violence corresponded to an annual rate of 0·69 per 1000; the lowest rates in these towns were 0·31 in Plymouth, 0·35 in Halifax, and 0·39 in Bolton, and the highest were 0·84 in Cardiff, 0·85 in Liverpool, and 1·02 in Manchester.

Inquests.—Inquests were held in 7076 cases, or in 5·5 per cent. of the total deaths; the mean proportion in the ten preceding second quarters was 5·1 per cent. In the twenty-eight great towns the proportion of inquest cases to total deaths was 6·6 per cent.; the percentage ranged from 2·2 and 2·6 in Halifax and Oldham, to 9·5 in Birmingham, and 14·0 in Leicester.

Deaths in Public Institutions.—The deaths registered in workhouses, hospitals, and public lunatic asylums numbered 14,099, and were equal to 11·0 per cent. of the total deaths; the mean proportion in the ten preceding corresponding quarters was 10·6 per cent. In the twenty-eight great towns 7556, or 16·6 per cent., of the deaths registered occurred in these public institutions; the per-centage of these deaths in institutions ranged in the twenty-eight towns from 7·1 in Preston and 7·9 in Bolton, to 17·8 in Manchester, 17·9 in Wolverhampton, and 21·7 in London.

Health of Colonial and Foreign Cities.

A summary of the Weekly Returns, with which the Registrar-General is favoured by various local authorities abroad, shows that the average annual death-rate during the quarter ending with June last in twenty-nine Colonial and Foreign cities, having

an aggregate population of nearly sixteen millions of persons, was equal to 26·1 per 1000. In the twenty-one European cities the mean rate was 25·8 per 1000, against 19·8 in the twenty-eight large English towns. Among the twenty-nine Colonial and Foreign cities the lowest death-rates were 18·1 in Baltimore, 19·9 in Rotterdam, 20·1 in Christiania, and 20·2 in the Hague; in the other towns the rates ranged upwards to 33·3 in Madras, 34·3 in Alexandria, 36·1 in Munich, and 44·6 in Cairo. The rate of mortality in Paris was equal to 25·0 per 1000, and exceeded by as much as 7·0 the rate recorded in London; the 14,073 deaths included 863 from diarrhœal diseases, 657 from measles, 433 from diphtheria and croup, 253 from typhoid fever, and 152 from small-pox. Small-pox caused 87 deaths in Prague, 84 in Buda-Pesth, 83 in St. Petersburg, 48 in Trieste and in Bombay, and 47 in Rome. Measles caused the highest proportional fatality in Philadelphia, Bombay, Rome, Vienna, Stockholm, and Munich; and scarlet fever in Stockholm, St. Petersburg, Vienna, Prague, and New York. The mortality from diphtheria and croup showed a general decline, although in Breslau, New York, and Brooklyn it showed a marked increase upon that recorded in the preceding quarter. The deaths referred to typhoid fever in Paris, which had increased in the four preceding quarters from 160 to 400, declined during the quarter under notice to 253, but were equal to an annual rate of 0·45 per 1000, while the death-rate from this disease in London did not exceed 0·07 per 1000. The mortality from "fever" in the European and American cities showed a general decline from that recorded in the previous quarter. Diarrhœal diseases were fatally prevalent during the last few weeks of the quarter in Berlin, Breslau, Buda-Pesth, and in each of the principal American cities.

Note.—The letter M or P affixed to the name of each Town denotes whether the limits, which the district or sub-districts named in the last column approximately represent, are Municipal or Parliamentary. Imp‡ D. signifies an Improvement District, and L. G. D. a Local Government District.

† The rates of mortality for these towns have been corrected by the exclusion of a proportional number of deaths occurring in County Hospitals and Lunatic Asylums, situate within the districts or sub-districts here taken as representing the towns, or by the exclusion or addition of a proportion of the deaths in Union Workhouses in cases where only a portion of the Union is embraced by the area taken, or where the Workhouse is situated outside that area.

‡ The rate of increase of population in Barrow-in-Furness and in Ystradyfodwg was so abnormally large between 1871 and 1881 as to preclude the probability of the rate being maintained between 1881 and 1891. The present population of these towns has therefore been estimated from special returns of inhabited houses with which the Registrar-General has been favoured by the local authorities.

TABLE VIII.—**Mortality** in **Districts** or **Sub-districts** containing the principal **English Watering Places** during the **Second** or **Spring Quarter** of 1887.

District Number.	Watering Place.	Area in Acres.	Estimated Population in the middle of the Year 1887.	Deaths registered in the Quarter ending 30th June 1887.	Deaths from Principal Zymotic Diseases.	Deaths from Small-pox.	Deaths from Measles.	Deaths from Scarlet Fever.	Deaths from Diphtheria.	Deaths from Whooping-cough.	Deaths from Fever.	Deaths from Diarrhœa.	Annual Death-rate per 1000 living. All Causes.	Annual Death-rate per 1000 living. Diseases in Cols. 5 to 11.	Districts and Sub-districts taken as approximately representing the Watering Place.

Note.—In estimating the populations of these Districts, upon which the birth and death-rates have been calculated, it has been assumed that the rate of increase in Greater London since 1881 has been the same as that which prevailed between 1871 and 1881; the estimate for the Outer Ring is obtained by the deduction of the estimated population of Inner London from that of Greater London, and the estimates for its component districts have been adjusted to cast to the estimated total. In calculating the rates of mortality, a proportion of the deaths recorded in the three Middlesex County Lunatic Asylums, situated in the Districts of Epsom, Uxbridge, and Barnet, has been excluded as belonging to the Middlesex portion of Registration or Inner London, and the remainder distributed among the Middlesex Districts of the Outer Ring; a similar correction has been made for the deaths registered in the Surrey County Lunatic Asylum situated in the District of Croydon.

TABLE X.—**Births** and **Deaths** in the **Second Quarter** of 1887, in 29 **Foreign Cities,** having an estimated aggregate Population of 15,578,695 persons.

[a] The *Registration* or *Union Counties* consist of groups of Superintendent Registrars' Districts, which are generally co-extensive with th Poor Law Unions. Those Districts which extend into two or more Counties (proper) are included entirely in that County in which the principa town of the district, or the greater part of the population, is located. The boundaries of Registration or Union Counties therefore differ more o less from the boundaries of Counties (proper).

[b] The averages of Marriages and Births are given only for the Eleven Divisions and for Registration Counties.

[c] See page 14, note [b].

NOTE.—*The Registrars alone must be considered responsible for the accuracy of the figures shown in their Returns, and for the opinions expresse in the foot notes.*

REGISTRATION COUNTIES, and SUPERINTENDENT REGISTRARS' DISTRICTS of ENGLAND. f INFANTS under one year of Age, and of PERSONS aged 60 years and upwards from WHOOPING-COUGH, FEVER, DIARRHŒA, CHOLERA, and VIOLENCE, also INQUEST CASES and n the DIVISIONS, REGISTRATION COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and f ENGLAND.

[a] The *Superintendent Registrars' Districts*, 632 in number, are collections of contiguous Parishes or Places, combined for purposes connected with the Registration of Births, Deaths, and Marriages, and are nearly always identical with the Poor Law Unions of the same names; they are here arranged topographically under the Registration Counties.

[b] These areas, which were partly revised by the Ordnance Survey Department, are the same as those published in the Census Report of 1881. They do not include space occupied by foreshore or tidal water of rivers and creeks.

[c] See page 14, note b.

II.—SOUTH EASTERN COUNTIES.—Superintendent Registrars' Districts—*continued.*

No.	Superintendent Registrars' Districts.	Area in Statute Acres.	Enumerated Population, 1881.	Marriages: Registered in Quarter ending 31 Mar. 1887.	Births: Registered in Quarter ending 30 June 1887. [a] The *Registration Sub-districts* (2137 in number) are sub-divisions of the *Superintendent Registrars' Districts* in which the Births and Deaths are registered by Registrars severally appointed for that purpose. The letter *W* denotes that the Sub-district contains within its limits a Workhouse belonging to the District or Union; *w* indicates that a Workhouse Establishment receiving inmates from other Districts than the one in which it stands is included; *H* indicates Hospital or Infirmary; and *L* Lunatic Asylum.

[b] For London, the numbers of Births and Deaths, as well as the details given under "Infants under 1 year of age" and the twelve subsequent headings in this Table, are derived from the Weekly Returns made by the Registrars, and relate to 13 weeks ending 2nd July 1887.

I.—LONDON.—Registration Sub-districts—*continued.*

[a] 625 : 2.—The 3 deaths from scarlet fever, and 8 of the deaths from measles occurred in Festiniog Urban Sanitary District.
[b] 625 : 3.—The 2 deaths from diphtheria occurred in one house in the parish of Llanfihangel-y-Pennant.
[c] 626 : 2.—The 7 deaths from whooping-cough occurred in the Rural Sanitary District.
[d] 628 : 3.—The 2 deaths from fever (typhoid), occurred in Bethesda Urban Sanitary District.

METEOROLOGY OF ENGLAND.

Remarks on the Weather during the Quarter ending June 30th, 1887.

By James Glaisher, Esq., F.R.S., *&c.*

The weather in April was very cold and dry. The temperature of the air was below its average on every day excepting from the 19th to the 23rd, and particularly so from the 14th to the 17th. The atmospheric pressure was below its average till the 7th, and from the 21st. The fall of rain was small. The N.E. wind was prevalent. It was an ungenial month and vegetation was very backward.

The weather in May was generally cold, sunless, and unseasonable, with an unusual prevalence of winds from the N., N.E., and N.W. The temperature with the exception of the five days between the 8th and 12th, was constantly below the average, and particularly so on the 21st and 22nd, on which day snow fell at some places and rain and hail at others, with a cold high wind. It was the sixth month in succession with the mean temperature below the average. The mean temperature of the six months ending May from 116 years observation is 42°·4, and from 46 years observation is 43°·2; the following are the instances back to 1880 of mean temperature at about or lower than that year—

In 1887 was 40°·4.	In 1875 was 40°·5.	In 1823 was 40°·6.	In 1814 was 38°·2.
„ 1879 „ 39°·4.	„ 1847 „ 39°·2.	„ 1816 „ 40°·3.	„ 1800 „ 40°·6.

So that back to the beginning of this century there have been but three instances of somewhat lower temperature than in this year, viz., in 1879, 1847, and 1814. This is remarkable, but yet more so is the mean temperature of the months of March, April, and May; the mean temperature of these three months from 116 years observation is 46°·6 and from 46 years is 47°·1; back to 1800, the instances of the mean temperature of the three months ending May of about or of lower value than in this year are—

In 1887 was 43°·8.	In 1819 was 43°·3.	In 1816 was 43°·8.	In 1812 was 43°·7.
„ 1845 „ 43°·6.	„ 1837 „ 40°·9	„ 1814 „ 43°·9.	

So that we have to go back for 42 years, for so low a temperature for these important months for vegetation, and practically there was only one instance of a decided lower temperature, viz., in the year 1837 in this century.

The atmospheric pressure in May was above its average from the 7th to the 17th, and from the 23rd to the 27th, and was mostly below on the other days.

The fall of rain was less than the average at most stations. Snow fell on several days in the Midland and Northern counties.

The weather in June was very fine and dry. The temperature till the 5th day was rather low. on the 6th there was a sudden change to warmth, and from this day to the 20th, the weather was very fine and hot, from the 21st to the end of the month, it was fine, but rather cool. The atmospheric pressure was below the average till the 4th, and constantly above from the 5th. There was a preponderance of N.E. wind, and almost an absolute freedom from thunderstorms.

The fall of rain was deficient at all stations, and a severe drought was experienced at many places. There were heavy falls of rain generally on the 3rd and 4th, and scarcely any afterwards till the end of the month. The drought was not felt till the middle of this month, but the weather has been dry since January. Up to the end of June the average fall of rain from the 72 years previous observations is 10·8 inches, and the fall this year is 3·1 inch. short of the average. Back to 1815, the following are the instances of a small or smaller falls of rain in the six months ending June—

Inches.	Inches.	Inches.
In 1887 it was 7·73.	In 1864 it was 7·90.	In 1842 it was 7·50.
„ 1874 „ 6·60.	„ 1855 „ 6·50.	„ 1840 „ 7·60.
„ 1870 „ 5·22.	„ 1847 „ 7·50.	„ 1834 „ 7·30.

About London the mean daily temperature was below its average till the 18th day, the mean daily deficiency was 5°; from April 19th to the 23rd there was an average daily excess 2°·3; from April 24th to May 7th there was a deficiency of 5°·2 daily; from May 8th to 12th there was an average excess of 1°·3 daily; on May 13th a cold period set in and continued to June 5th, the average daily deficiency for these 24 days was 4°·9; from June 6th to the 20th there was a warm period, the daily excess was 3°·9; and from the 21st to the end of the month the mean daily deficiency was 2°·0.

The mean temperature of the air for April was 44°·1, being 2°·0 and 3°·0 below the average of 116 years and 46 years respectively; it was 2°·3, 3°·6, and 1°·0 lower than in 1886, 1885, and 1884 respectively.

The mean temperature of the air for May was 49°·8, being 2°·7 and 2°·7 below the average of 116 years and 46 years respectively; it was 3°·5, 0°·1, and 4°·5 lower than in 1886, 1885, and 1884 respectively.

The mean temperature of the air for June was 60°·9, being 2°·6 and 2°·1 above the average of 116 years and 46 years respectively; it was 3°·1, 1°·4, and 2°·9 higher than in 1886, 1885, and 1884 respectively and higher than any June back to 1877.

The mean high day temperature of the air in April was 55°·0, being 2°·5 below the average of 46 years; it was 0°·8 and 2°·7 lower than in 1886 and 1885, and 0°·7 higher than in 1884.

The mean high day temperature of the air in May was 59°, being 5°·2 below the average of 46 years; it was 5°·0, 1°·3, and 6°·7 lower than in 1886, 1885, and 1884 respectively.

The mean high day temperature of the air for June was 73°·4, being 2°·6 above the average of 46 years; it was 3°·8, 2°·5, and 4°·1 higher than in 1886, 1885, and 1884 respectively.

The mean low night temperature of the air for April was 35°·3, being 3°·8 below the average of 46 years; it was 3°·6, 3°·6, and 1°·8 lower than in 1886, 1885, and 1884 respectively.

The mean low night temperature of the air for May was 42°·3, being 1°·4 below the average of 46 years; it was 1°·3 lower than in 1886, 1° higher than in 1885, and 1°·5 lower than in 1884.

The mean low night temperature of the air for June was 49°·7, being 0°·2 below the average of 46 years; it was 1°·8, 0°·5, and 0°·6 higher than in 1886, 1885, and 1884 respectively.

Therefore the days were cold in April, and very cold in May, and were warm in June. The nights were very cold in April, and cold in May, and about their average value in June.

The mean daily range of temperature in April was 19°·8, being 1°·4 greater than the average. In May it was 16°·7, being 3°·8 smaller than the average, and in June was 23°·7, being 2°·7 greater than the average.

NOTE.—In reading this table it will be borne in mind that the plus sign (+) signifies *above* the average, and the minus sign (−) signifies *below* the average.

Average duration of the different directions of the wind referred to eight points of the compass, and duration in days of each direction in each month in the quarter, were as follows:—

Direction of Wind.	April. 1887.	April. Average.	April. Departure from Average.	May. 1887.	May. Average.	May. Departure from Average.	June. 1887.	June. Average.	June. Departure from Average.
	d.	d.	d.	d.	d.	d.	d.	d.	d.
N.W.	2	2¼	− ¼	9	1⅝	+ 7⅜	4	2¼	+ 1¾
N.	3	4¼	− 1¼	6	4⅝	+ 1⅜	3	3⅛	− ⅛
N.E.	10	6¼	+ 3¾	9	7⅛	+ 1⅞	10	3⅜	+ 6⅝
E.	1	3⅛	− 2⅛	1	2¼	− 1¼	1	2¼	− 1¼
S.E.	1	2¼	− 1¼	1	1⅜	− ⅜	1	1⅜	− ⅜
S.	2	2¼	− ¼	0	2¼	− 2¼	0	2¼	− 2¼
S.W.	7	6¼	+ ¾	3	8½	− 5½	8	10	− 2
W.	4	2¼	+ 1¾	2	2¼	− ¼	3	4	− 1

The sign (+) denotes excesses over averages; the numbers affected by this sign in April are opposite to N.E., W., and S.W.; in May to N.W., N.E., and N.; in June to N.E. and N.W.

The sign (−) denotes deficiencies below averages. In April these signs are opposite to E., S.E., N., S., and N.W.; in May to S.W. and S.; in June are opposite to N. and W. and compounds of S.

The mean temperature in April was 6°·5 warmer than in March; in May it was 5°·7 warmer than in April; in June it was 11°·1 warmer than in May.

(From the preceding 46 years' observations the increase of temperature from March to April is 5°·4; from April to May is 5°·4; and from May to June is 6°·3.)

From March to April at stations south of 53°, there was an increase of temperature of about 5°, and at stations north of this parallel there was an increase of 4°5.

From April to May there was an increase of 6° at stations south of 52°; and about 5°·2 north of this parallel.

From May to June there was an increase of 9° at stations south of 51°; and about 11° at stations north of this parallel.

The mean readings of the barometer at the height of 159 ft. above the level of the sea for the month of April was 29·818 ins., being 0·072 in. above the average of 46 years, 0·075 in. higher than in 1886, 0·202 in. higher than in 1885, and 0·173 in. higher than in 1884.

The mean reading of the barometer for May was 29·834 ins., being 0·047 in. above the average of 46 years; 0·076 in. higher than in 1886, 0·206 in. higher than in 1885, and 0·010 in. higher than in 1884.

The mean reading of the barometer in June was 30·013 ins., being 0·207 in. above the average of 46 years; 0·208 in. higher than in 1886, 0·156 in. higher than in 1885, and 0·156 in. higher than in 1884.

The mean reading of the barometer in April was 0·073 in. lower than in March; in May was 0·016 in. higher than in April, and in June was 0·179 in. higher than in May.

From March to April there was a decrease of atmospheric pressure at all stations; at those south of 51°, amounting to 0·08 in.; between 51° and 52° amounting to 0·07 in.; and north of this parallel to 0·05 in.

From April to May there was an increase at all stations; at those south of 53° to 0·02 in., and north of this parallel of 0·04 in.

From May to June there was an increase of 0·14 in. at stations south of 51°; at stations between 51° and 53° there was an increase of 0·17 in. north of this parallel of 0·16 in.

About London the barometric pressure on the first seven days was below the average by 0·11 in.; from the 8th to the 20th it was above by 0·33 in.; it was generally below its average from April 21st to May 6th; the average daily deficiency being 0·17 in., and then in excess of average for the next 11 days by 0·33 in., and then below from May 18th to 22nd by 0·16 in.; from May 23rd to end of the month was above the average by 0·12 in., and below from June 1st to 4th by 0·16 in., and from June 5th to end of month there was a daily excess of 0·27 in.

Thunderstorms occurred on April 5th at Liverpool; on the 23rd at Rugby, Halifax, Hull, and Stonyhurst. In May on the 19th at Royston; on the 21st at Ventnor, Osborn, Royston, Cardington, and Wolverhampton; on the 26th at Plymouth and Oxford.

Thunder was heard but lightning was not seen on April 15th, at Rugby; on the 21st at Halifax; on the 23rd at Burslem; on the 24th at Oxford and Stonyhurst.

In May on the 3rd at Blackheath; on the 20th at Whitchurch; on the 21st at Plymouth, Oxford, Cambridge, and Somerleyton; on the 22nd at Royston.

In June on the 3rd at Cardington.

Lightning was seen but thunder was not heard on April 10th, at Plymouth. In May on the 21st at Rugby.

Solar halos were seen on April 7th at Oxford; on the 18th at Liverpool and Halifax; on the 21st at Halifax; on the 25th at Torquay; on the 26th at Oxford; on the 28th at Torquay.

In May on the 5th at Torquay; on the 8th at Liverpool and Halifax; on the 9th at Oxford; on the 11th, 12th, and 18th at Torquay; on the 23rd at Torquay, Oxford, and Halifax; on the 24th at Torquay.

In June on the 2nd at Halifax; on the 5th at Liverpool; on the 10th and 16th at Barnet; on the 17th and 20th at Torquay; on the 21st at Torquay, Oxford, and Halifax; on the 24th at Torquay; on the 27th and 28th at Halifax.

Lunar halos were seen on April 7th at Oxford; in May, on the 1st at Oxford; on the 7th at Liverpool, and on the 10th at Oxford.

Snow fell on April 1st at Royston and Cambridge; on the 5th at Torquay and in the Midland Counties; on the 6th at Halifax; on the 9th at Royston; on the 13th at Somerleyton and in the Northern Counties; on the 14th at Whitchurch, Blackheath, Oxford, and in the Midland and Northern Counties; on the 24th at Carlisle; on the 25th at Halifax and Carlisle; on the 26th at Oxford, Royston, Wolverhampton, Burslem, Hull, and Stonyhurst; on the 27th at Bath and in the Midland and Northern Stations.

In May on the 3rd at Carlisle; on the 13th and 19th at Blackheath; on the 20th at Torquay, Whitchurch, and Burslem; on the 21st at Torquay, Royston, Leicester, Burslem, and Halifax.

Hail fell on April 1st at Rugby; on the 5th at Liverpool and Stonyhurst; on the 6th at Hull and Bradford; on the 12th at Lowestoft; on the 13th at Hull; on the 14th at Cardington, Lowestoft, and Hull; on the 15th at Lowestoft; on the 16th at Cambridge, on the 23rd at Truro, Torquay, and in the Midland and Northern Counties; on the 24th at Truro, Plymouth, Torquay, Salisbury, and the Midland Counties; on the 25th at Truro, Torquay, and Burslem; on the 26th at Torquay, Salisbury, Bath, Royston, Liverpool, Stonyhurst, and Carlisle; on the 27th at Torquay, Salisbury, Whitchurch, and in the Midland and Northern Counties.

In May on the 13th at Royston; on the 19th at Oxford; on the 20th and 21st hail fell at nearly all stations; on the 22nd at Cardington, Cambridge, and Liverpool.

[*Continued on page* 71.]

MONTHLY METEOROLOGICAL TABLE FOR THE QUARTER ENDING JUNE 30TH, 1887.

The Observations have been reduced to Mean values by Glaisher's Barometrical and Diurnal Range Tables, and the Hygrometrical results have been deduced from the seventh edition of his Hygrometrical Tables.

Names of Stations and Observers.	Height of Station above Sea Level.	Year 1887. Months.	Pressure of Atmosphere in Month. Mean.	Pressure of Atmosphere in Month. Range.	Temperature of Air in Month. The highest temperatures of the air were at Barnstaple, 88°·0; at Cardington, 87°·2°, and at Osborne and Salisbury, 87°·0.
The lowest temperatures of the air were at Barnet, 17°·8; at Somerleyton, 19°·4; and at Salisbury, 20°·6.
The greatest ranges of temperature were at Barnet, 66°·7; at Salisbury, 66°·4; and at Cardington, 64°·7.
The least ranges of temperature were at Ventnor, 38°·3; at Guernsey, 40°·4; and at Liverpool, 48·8°.
The greatest number of days of rain were at Guernsey, 40; and at Leicester and Nottingham, 36.
The least number of days of rain were at Truro 19; and at Osborne, Barnstaple, and Carlisle, 24.
The greatest falls of rain were at Bath, 5·78 inches; at Stonyhurst, 5·16 inches; and at the Royal Observatory, 4·70 inches.
The least falls of rain were at Torquay, 3·01 inches; at Osborne, 3·14 inches; and at Wolverhampton and Halifax, 3·15 inches.

Quarterly Meteorological Table for different Parallels of Latitude.

PARALLELS OF LATITUDE, &c.	Mean Pressure of dry Air reduced to the level of the Sea.	Mean of all Highest Readings of the Thermometer.	Mean of all Lowest Readings of the Thermometer.	Mean Range of Temperature in the Quarter.	Mean of all Highest.	Mean of all Lowest.	Mean Monthly Range of Temperature.	Mean Daily Range of Temperature.	Mean Temperature of the Air.	Mean Temperature of the Dew Point.	Mean Elastic Force of Vapour.	Mean Weight of Vapour in a cubic foot of Air.	Mean additional Weight required for saturation	Mean degree of Humidity	Mean Weight of a cubic foot of Air.	Mean Reading of Maximum in Rays of Sun.	Mean Reading of Minimum on Grass.	Wind. Mean Estimated Strength.	Wind. Relative Proportion of N.	E.	S.	W.	Mean Amount of Ozone	Mean Amount of Cloud.	Rain. Mean Number of Days it fell.	Rain. Mean Amount col-

QUARTERLY RETURN

OF

MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE DIVISIONS, COUNTIES, AND DISTRICTS OF

ENGLAND;

WITH CERTAIN DETAILED INFORMATION RELATING TO THE DEATHS IN EACH REGISTRATION SUB-DISTRICT.

By Authority of the Registrar General.

Printed under the Superintendence of Her Majesty's Stationery Office,
AND SOLD BY EYRE AND SPOTTISWOODE, 9, EAST HARDING ST., FETTER LANE, E.C.

No. 155.] **Marriages**—*April, May, June*, 1887.
Births and **Deaths**—*July, August, September*, 1887. [Price 9*d.*

General Register Office, Somerset House,
31st October, 1887.

The POPULATION of the UNITED KINGDOM in the middle of 1887 is estimated at 37,091,564 persons; that of England and Wales at 28,247,151, of Scotland at 3,991,499, and of Ireland at 4,852,914.

In the United Kingdom 280,696 *births* and 160,707 *deaths* were registered in the three months ending 30th September 1887. The natural increase of population was, therefore, 119,989. The registered number of persons married in the quarter ending 30th June 1887 was 126,284.

The birth-rate in the United Kingdom in the third quarter of 1887 was 30·0 and the death-rate 17·2 per 1000. The marriage-rate in the second quarter of 1887 was 13·7 per 1000.

The several facts concerning Scotland and Ireland are recorded in the Quarterly Returns of the Registrars-General for those parts of the United Kingdom.

ENGLAND.

This Return comprises the BIRTHS and DEATHS registered in the 2134 registration sub-districts of England and Wales during the quarter ending 30th September 1887; and the MARRIAGES in 14,843 churches or chapels, in 9845 registered places of worship unconnected with the Established Church, and in 632 Superintendent Registrars' Offices, in the three months ending 30th June 1887.

Marriages.

During the three months ending with June last, the marriages of 104,864 persons were registered in England and Wales, corresponding to an annual rate of 14·9 per 1000 of the estimated population in the middle of 1887. This marriage rate, although 0·4 above the rate in the second quarter of 1886, was 0·3 below the mean rate in the corresponding quarters of the ten years 1877–86. The lowest county rates in the second quarter of this year were 8·0 in Rutlandshire, 10·4 in Hertfordshire, 11·2 in Suffolk, and 11·6 in Sussex; the rates in the other registration counties ranged upwards to 16·1 in Monmouthshire, 16·3 in Leicestershire, 16·4 in Devonshire, 16·6 in Lincolnshire, 16·7 in Nottinghamshire, and 16·8 in Northumberland. In the registration division of London the rate was 16·9.

A 52175. Wt. 10.

Births.

The births registered in England and Wales during the three months ending with September last were 222,382, corresponding to an annual rate of 31·2 per 1000 of the estimated population. This birth-rate was 2·0 below the mean rate in the third or summer quarters of the ten years 1877–86, and was lower than the rate in the summer quarter of any year since 1849. The rate did not exceed 24·9 in Rutlandshire, 26·3 in Sussex, 26·9 in Herefordshire, and 27·1 in North Wales; whereas it ranged upwards to 34·1 in Leicestershire, 34·4 in Essex, 35·0 in Northumberland, 35·2 in Durham, and 36·6 in Monmouthshire.

In the twenty-eight great towns the births registered last quarter corresponded to an annual rate of 31·9 per 1000, which was 0·7 above the general English rate. The rate was 31·2 in London, and the mean rate in the twenty-seven provincial towns was 32·5, ranging from 25·2 in Brighton, 28·3 in Huddersfield, and 28·7 in Halifax, to 36·0 in Portsmouth, 36·2 in Blackburn, 38·0 in Preston, 39·8 in Newcastle-upon-Tyne, and 40·3 in Cardiff. In fifty other large town districts the mean birth-rate was 31·8, and 0·1 below the rate in the great towns. The lowest rates among these fifty towns were 20·8 in Hastings, 21·3 in Cheltenham, and 21·9 in Bath; while the highest were 39·2 in St. Helens and in Gateshead, 40·2 in Newport (Monmouth), and 40·7 in Ystradyfodwg.

Movement of the Population.

The natural increase of the population of England and Wales, or the excess of births over deaths, which had been 104,250 and 98,777 in the third quarters of 1885 and 1886, further declined last quarter to 97,379.

It appears from returns issued by the Board of Trade that 118,733 emigrants embarked during last quarter from the various ports of the United Kingdom at which emigration officers are stationed. Distributing 2742 whose nationality was undistinguished, and excluding 32,082 foreigners, the emigrants of British origin were 86,651, including 56,280 English, 10,441 Scotch, and 19,930 Irish. The numbers of British emigrants in the three preceding corresponding quarters were 72,631, 62,859, and 76,890 respectively. The proportions of emigrants last quarter to a million of the population in the three divisions of the United Kingdom were 1992 from England, 2616 from Scotland, and 4107 from Ireland. Compared with the corresponding quarter of 1886 the proportional amount of emigration showed an increase in each portion of the United Kingdom.

Prices and Pauperism.

The average price of wheat during the three months ending with September last was 32*s.* 1*d.*, showing a further decline from the mean prices in the two preceding quarters of the year. The mean wholesale prices of beef and of mutton were $4\frac{3}{8}d.$ and $5\frac{2}{8}d.$ per lb. respectively; the mean price of beef slightly exceeded, while that of mutton was slightly below, the mean prices in the preceding quarter. The average price of the best sea-borne coal in the London market, put in barge from the collier in the Thames, was 13*s.* 11*d.* per ton, against 15*s.* 2*d.* in each of the two preceding quarters of the year; the mean price of best coal last quarter was lower than in any quarter of any year since the beginning of 1870, when these returns were first furnished. The mean price of Consols was $101\frac{4}{8}l.$, which, after correction for the value of the accruing dividend, showed a decline of $\frac{6}{8}l.$ from the mean price in the preceding quarter. The minimum annual rate of discount charged at the Bank of England, which had been reduced to 2*l.* per cent. on 28th April last, was raised to 3*l.* per cent. on 4th August, and further to 4*l.* on 1st September; the average rate during the quarter was 2·95*l.* per cent.

The average number of paupers (exclusive of lunatics in asylums, and vagrants) relieved in England and Wales on the last day of each week in the quarter was

698,400, of whom 171,551 received in-door and 526,849 out-door relief. The proportion of the population in receipt of pauper relief during the three months ending September was 24·7 per 1000, against 24·7 and 25·0 in the two preceding corresponding quarters.

Meteorology.

The remarks upon the Meteorology of the quarter at the Royal Observatory Greenwich, and at the various stations of observation, furnished by Mr. James Glaisher, F.R.S., with accompanying Tables, will be found on pages 65–72. The mean reading of the barometer at Greenwich was 29·811 inches, and was ·018 above the mean reading for the corresponding periods of 46 years; the mean reading was above the average in July and August, but fell below the average in September. The mean temperature of the air during the quarter was 61°·0, and was 0°·9 above the average for the corresponding periods of 116 years. The mean temperature was considerably above the average in July and August, while it was exceptionally low in September. The weather in July was fine and warm, and, excepting on 3 days, the temperature was above the average throughout the month. In August the weather was also fine and dry; the temperature was below the average at the beginning of the month, and from the 10th to the 20th, but above on other days. In September the weather was cold and unsettled, the temperature being below the average on nearly every day. At 34 stations of observation the mean temperature during the quarter ranged from 56·1 at Stonyhurst, and 56·2 at Halifax, to 61·0 at the Royal Observatory, and 62·1 at Barnstaple.

The amount of rain measured at Greenwich during the quarter was 5·85 inches, and 1·44 inches below the average amount in the corresponding periods of 72 years. The rainfall has been below the average in each month of this year, and the deficiency in the nine months ending with September amounted to 4·52 inches. Rain was measured at Greenwich on 10 days in July, 9 days in August, and 16 days in September; or on 35 of the 92 days in the quarter. The amount recorded in the quarter at 34 stations of observation ranged from 3·22 inches at Rugby, and 3·66 inches at Cardington, to 10·43 inches at Stonyhurst, and 10·62 inches at Carlisle.

The number of hours of bright sunshine recorded during the quarter at the Royal Observatory, Greenwich, was 582·0, and was 153·3 above the average amount recorded in the corresponding periods of the ten years 1877–86. The amount of bright sunshine recorded both in July and August was unprecedentedly large.

Deaths.

During the three months ending with September last 125,003 deaths were registered in England and Wales, corresponding to an annual rate of 17·6 per 1000 of the estimated population. This death-rate was 0·4 below the mean rate in the third or summer quarters of the ten years 1877–86, and 0·2 below the rate in the corresponding quarter of 1886. The lowest county rates during the quarter were 13·4 in Herefordshire, 13·5 in Suffolk, 13·6 in Westmorland, 13·8 in Huntingdonshire, and 13·9 in Shropshire and in Somersetshire; while the highest were 18·7 and 18·9 in the East and West Ridings of Yorkshire, 19·1 in Leicestershire, 20·1 in Northumberland, and 20·8 in Lancashire.

The 125,003 deaths included 64,850 of males, and 60,153 of females. The annual death-rate among males was 18·7, and among females 16·5 per 1000 estimated to be living of each sex. In equal numbers living the deaths of males were 113 to 100 of females; in the corresponding quarters of 1884, 1885, and 1886 the proportions were respectively 114, 112, and 113 of males to 100 females.

Urban and Rural Mortality.—In the registration districts and sub-districts having the largest proportion of urban population (see Table III.), and con-

taining an estimated population of about eighteen millions, the death-rate was 18·9 per 1000; in the remaining and chiefly rural population of a little more than ten millions, the rate was 15·2. The urban rate was 0·1 below, while the rural rate corresponded with the mean rates in the third quarters of the six years 1881–86. In equal numbers living, the deaths were 124 in the urban to 100 in the rural population, against 125 to 100 in the third quarters of the six years 1881–86.

In the twenty-eight great towns, including London, and having an estimated population of rather more than nine millions, the registered deaths corresponded to an annual rate of 20·4; this rate exceeded the general urban rate by 1·5. The death-rate was 19·6 in London, and averaged 21·1 in the twenty-seven provincial towns. The lowest rates in the large provincial towns were 15·3 in Derby, 17·6 in Bristol, 17·7 in Huddersfield, and 17·9 in Nottingham; while the highest were 23·4 in Blackburn, 24·9 in Newcastle-upon-Tyne, 26·4 in Manchester, and 31·2 in Preston.

In fifty other large town districts, with an aggregate population estimated at nearly three millions, the death-rate was 17·6; it was 1·3 below the general urban rate, and 2·8 below the rate in the twenty-eight great towns. The lowest rates in these fifty town districts were 11·3 in Gloucester, 12·2 in Darlington, 12·3 in Bath, and 12·5 in Maidstone and in Burton-on-Trent; the rates in the other towns ranged upwards to 22·0 in Ashton-under-Lyne, 22·1 in Chatham, 23·4 in South Shields, 24·0 in Exeter*, and 24·1 in Wigan.

Mortality at different Ages.—The deaths last quarter included 38,983 of infants under one year of age, 56,772 of persons aged between one and 60 years, and 29,248 of persons aged upwards of 60 years.

Infant mortality, or the proportion of deaths under one year to registered births, was 175 per 1000, the mean proportion in the corresponding periods of the ten years 1877–86 having been 158 per 1,000. The lowest county rates were 71 in Dorsetshire, 82 in Herefordshire, 84 in Huntingdonshire, and 92 in Westmorland; while the highest were 203 in the extra-Metropolitan portion of Middlesex, 206 in Warwickshire, 212 in Lancashire, 222 in the East Riding of Yorkshire, and 231 in Leicestershire.

In the twenty-eight great towns the deaths of infants were in the proportion of 232 per 1000 registered births. The lowest rates in these towns were 138 in Halifax, 165 in Derby, 170 in Bristol, 177 in Oldham, and 178 in Huddersfield; while the highest were 283 in Plymouth, 306 in Salford, 328 in Leicester, and 345 in Preston. In fifty other large town districts the mean rate was 183, but ranged from 87 in Bath, 95 in Gloucester, 114 in Devonport, 120 in Rochdale, 123 in Darlington, and 126 in West Bromwich and in Carlisle, to 243 in Rotherham, 246 in Northampton, 252 in Wigan, 264 in York, and 304 in Lincoln.

Among persons aged between one and 60 years the deaths corresponded to an annual rate of 8·9 per 1000 persons estimated to be living at those ages, against an average of 9·7 in the ten preceding third quarters. In the twenty-eight great towns the deaths at these ages corresponded to an annual rate of 10·5, ranging from 7·5 in Derby, 7·7 in Nottingham, and 7·9 in Norwich, to 14·0 in Newcastle-upon-Tyne, 14·6 in Preston, and 15·6 in Manchester.

The deaths among persons aged upwards of 60 years were equal to an annual rate of 55·7 per 1000, which was 0·8 above the mean rate in the ten preceding corresponding quarters. In the twenty-eight great towns the mean rate at these ages was 58·0, and was 2·3 above the general English rate. In London the rate was 52·7, while the mean rate in the twenty-seven provincial towns was 62·9; it ranged from 51·1 in Nottingham, 52·9 in Portsmouth, and 53·8 in Sunderland, to 77·2 in Halifax, 81·7 in Preston, and 84·7 in Blackburn.

---

* The deaths in Exeter include those of 67 persons killed in a fire at the theatre. Omitting these, the rate would be only 17·1.

The death-rate of persons aged between one and 60 years was 8·2 per cent. below the average rate in the ten preceding corresponding quarters, while the death rates of infants and of persons aged upwards of 60 years were respectively 10·8 and 1·5 per cent. above the mean rates of those quarters.

Zymotic Diseases.—The 125,003 deaths from all causes included—

14,625	attributed to	diarrhœa,
2658	„	measles,
2447	„	whooping-cough,
1820	„	scarlet fever,
1543	„	fever,
1017	„	diphtheria,
and 70	„	small-pox.

Thus 24,180 deaths were ascribed to these zymotic causes, corresponding to an annual rate of 3·40 per 1000 persons living, the average annual rate in the ten preceding third quarters having been 3·34.

The rate was 0·88 in Shropshire, 0·93 in Westmorland, 1·08 in Wiltshire, and 1·13 in Herefordshire; while it ranged upwards to 4·26 in Warwickshire, 4·27 in Essex, 4·70 in Lancashire, and 5·29 in Leicestershire. In the twenty-eight great towns the rate was 5·11, varying from 1·52 in Halifax, 1·96 in Huddersfield, and 3·12 in Derby, to 6·34 in Manchester, 6·96 in Salford, 7·32 in Leicester, and 9·61 in Preston. In fifty other considerable towns the rate was 3·31, the highest rates being 7·84 in Chatham, and 7·95 in Wigan. In the remainder of England and Wales, after excluding the seventy-eight towns, the rate was 2·44.

The 14,625 deaths attributed to *diarrhœa* corresponded to an annual rate of 2·06 per 1000, against a mean of 1·83 in the ten preceding third quarters. The diarrhœa rate last quarter was slightly lower than that which prevailed in the summer quarter of 1886, but was nearly twice as high as that in the corresponding quarter of 1885. The rate was 0·31 in North Wales, 0·40 in Wiltshire, 0·57 in Suffolk, and 0·58 in Shropshire, ranging upwards to 2·89 in Lancashire, 3·11 in Warwickshire, 3·12 in the extra-metropolitan portion of Middlesex, and 4·12 in Leicestershire. In the twenty-eight great towns the mean rate was 3·26, ranging from 0·76 in Halifax, 1·12 in Huddersfield, and 1·58 in Bristol, to 4·61 in Wolverhampton, 4·71 in Salford, 6·42 in Leicester, and 7·61 in Preston. In fifty other considerable towns the rate was 2·16, the highest rates being 4·60 in St. Helen's, 5·46 in Chatham, and 6·29 in Wigan. In the remainder of England and Wales the rate was 1·35. Diarrhœa also showed excessive mortality in Tottenham, Luton, West Ham, Walthamstow, Barking Town, Wigston, Great Grimsby, Farnworth (Prescot), Westleigh, Burnley, and Goole registration sub-districts. Special tables dealing with the rates of mortality from diarrhœa will be found on pages xiv–xv.

The 2658 deaths from *measles* corresponded to an annual rate of 0·37 per 1000, against a mean rate of 0·28 in the ten preceding third quarters. No death from this disease was registered in Huntingdonshire, Herefordshire, Rutlandshire, or Westmorland, and the rate was only 0·06 in Cambridgeshire, 0·07 in Shropshire, and 0·08 in Devonshire; while the highest rates were 0·63 in Durham, 0·71 in North Wales, 0·73 in Cheshire, and 0·97 in Northumberland. In the twenty-eight great towns the rate was 0·44, ranging from 0·00 in Halifax, 0·03 in Sunderland, and 0·05 in Plymouth, to 1·00 in Newcastle-upon-Tyne, 1·02 in Oldham, 1·27 in Birkenhead, and 1·40 in Manchester. In fifty other considerable towns the rate was 0·27, rising, however, to 1·19 in Ashton-under-Lyne, and 1·29 in South Shields. In the remainder of England and Wales the rate was 0·35. Measles showed excessive mortality in Folkestone, Ashover, Eckington, Runcorn, Northwich, Oswaldtwisle, Alston (Preston), Sandal, Bedlington, Egremont, Neath, Ruabon, and Festiniog sub-districts.

The 2447 deaths from *whooping-cough* corresponded to an annual rate of 0·34 per 1000, against a mean rate of 0·35 in the ten preceding third quarters. No

death from this disease was registered in Huntingdonshire or Westmorland, and the rate did not exceed 0·03 in Herefordshire, 0·06 in Shropshire, and 0·07 in Dorsetshire, while it was 0·38 in Buckinghamshire, 0·58 in Essex, 0·62 in Warwickshire, and 0·87 in Rutlandshire. In the twenty-eight great towns the rate was 0·61, and ranged from 0·13 in Huddersfield, 0·14 in Brighton, and 0·21 in Plymouth, to 0·78 in London and in Birkenhead, and 0·91 in Birmingham and in Bradford. In fifty other considerable towns the rate was 0·26, the highest rates being 1·09 in Ashton-under-Lyne, and 1·74 in Chester. In the remainder of England and Wales the rate was 0·21. The death-rates from this disease were high in Downham, Glossop, and Holywell sub-districts.

The 1820 deaths from *scarlet-fever* corresponded to an annual rate of 0·26 per 1000, against a mean rate of 0·45 in the ten preceding third quarters. No death from this disease was registered in Westmorland and only one death in Shropshire, in Leicestershire, and in Herefordshire, while the rate was 0·44 in the West Riding of Yorkshire, 0·49 in Lancashire, 0·51 in Gloucestershire, and 0·87 in Rutlandshire. In the twenty-eight great towns the rate was 0·39, being 0·40 in London and 0·38 in the twenty-seven provincial towns; the rate ranged from 0·00 in Leicester and in Derby, 0·02 in Nottingham, and 0·04 in Cardiff, to 0·74 in Birkenhead, 0·90 in Oldham, 0·97 in Bristol, and 1·41 in Blackburn. In fifty other considerable towns the rate was 0·21, being, however, 0·96 in Macclesfield and 2·01 in Accrington. In the remainder of England and Wales the rate was 0·19. The death-rates from this disease were exceptionally high in Glossop, Todmorden, Sowerby, and Milford sub-districts.

The 1543 deaths from *fever*, including typhus, enteric fever, with simple and ill-defined forms of continued fever, corresponded to an annual rate of 0·22 per 1000, against a mean rate of 0·28 in the ten preceding third quarters. No death from this disease was registered in Rutlandshire, and the rate did not exceed 0·02 in Somersetshire, 0·05 in Wiltshire, and 0·07 in Herefordshire; while it was 0·32 in the extra-metropolitan portion of Kent and in Northumberland, 0·37 in South Wales, and 0·46 in Leicestershire. In the twenty-eight great towns the rate was 0·23, ranging from 0·00 in Plymouth, 0·09 in Derby, 0·10 in Brighton, and 0·13 in Bristol and in Huddersfield, to 0·39 in Leicester, 0·41 in Birkenhead, 0·50 in Salford, 0·63 in Preston, and 0·64 in Portsmouth. In fifty other considerable towns the rate was 0·28, rising, however, to 0·50 in Accrington, 0·54 in Yarmouth, 0·55 in Chester, 0·64 in Ystradyfodwg, 0·74 in Stockport, 0·78 in Swansea, and 1·08 in Barrow-in-Furness. In the remainder of England and Wales the rate was 0·20; this disease caused high death-rates in Great Wakering and in Pontypridd sub-districts.

The 1017 deaths ascribed to *diphtheria* corresponded to an annual rate of 0·14 per 1000, the mean rate in the ten preceding third quarters having been 0·11. No death from this disease was registered in Rutlandshire, and the rate did not exceed 0·03 in Worcestershire, and 0·05 in Northamptonshire, Derbyshire, and North Wales, while it was 0·29 in Cambridgeshire, 0·31 in Herefordshire, 0·32 in Huntingdonshire, and 0·33 in Monmouthshire. In the twenty-eight great towns the rate was 0·16; no death from this disease was registered in Wolverhampton, Bolton, Blackburn, or Sunderland, whereas the highest rates were 0·26 in Norwich, 0·39 in Oldham, 0·40 in Huddersfield, and 0·41 in Portsmouth. In fifty other considerable towns the rate was 0·11, the highest rates being 0·51 in Bath, 0·56 in Chatham, and 0·62 in Middlesbrough. In the remainder of England and Wales the rate was 0·14, and the disease showed fatal prevalence in Hellingley, Havant, Watford, Aylesbury, Sutton (York), and Workington sub-districts.

The 70 deaths from *small-pox*, an increase of 23 upon the number in the preceding quarter of the year, corresponded to a rate of 0·01 per 1000, the mean rate in the ten preceding corresponding quarters having been 0·04. Of the 70 deaths, 52 were registered in Yorkshire (including 45 in the borough of Sheffield) and 4 in Bury, while but 14 occurred in the rest of England and Wales.

The following Table shows the relative mortality from each of the above-mentioned zymotic diseases in England and Wales, in the twenty-eight great

towns, in the fifty other considerable town districts, and in the remainder of the country :—

ANNUAL DEATH-RATE per 1,000 from several ZYMOTIC DISEASES during the Third Quarter of 1887.

	Principal Zymotic Diseases.	Small-pox.	Measles.	Scarlet Fever.	Diph-theria.	Whoop-ing-cough.	Fever.	Diar-rhœa.

CERTIFICATION OF CAUSES OF DEATH.—The causes of 114,364, or 91·5 per cent., of the 125,003 deaths in England and Wales were duly certified by medical practitioners, and of 6873, or 5·5 per cent., by coroners after inquest. The causes of the remaining 3766, or 3·0 per cent., of the deaths were not certified. The proportion of uncertified deaths did not exceed 1·0 per cent. in London, whereas it was 3·4 per cent. in the rest of England and Wales. The per-centage of uncertified deaths was only 0·7 in the extra-metropolitan portion of Middlesex and Surrey, while it ranged upwards to 4·7 in Shropshire, in Derbyshire, and in the West Riding of Yorkshire, and 5·4 in Durham. In Wales 6·8 per cent. of the causes of death were uncertified, the proportions being 7·3 in North Wales and 6·5 in South Wales.

In the twenty-eight great towns the mean proportion of uncertified deaths was 2·1 per cent.; but, while it did not exceed 1·0 in London, it averaged 2·9 in the twenty-seven provincial towns. The per-centages of uncertified deaths in these provincial towns ranged from 0·0 in Plymouth and 0·6 in Derby, to 4·6 in Liverpool, 5·4 in Sheffield, 6·1 in Oldham, and 7·9 in Halifax.

VIOLENT DEATHS.—The deaths referred to different forms of violence were 4524, and corresponded to an annual rate of 0·64 per 1000 of the estimated population; they were equal to 3·6 per cent. of the total deaths, against a mean per-centage of 3·7 in the ten preceding corresponding quarters. The death-rates from violence ranged from 0·23 and 0·39 per 1000 in Bedfordshire and Huntingdonshire, to 0·86 in Cumberland, 0·87 in Rutlandshire, and 1·14 in Devonshire. The high death-rate from violence in Devonshire was due to a disaster at the Exeter theatre.

In the twenty-eight great towns the deaths from violence corresponded to an annual rate of 0·68 per 1000, but ranged from 0·30 in Halifax and in Oldham, and 0·36 in Leicester, to 0·89 in Wolverhampton, 0·93 in Liverpool, 0·95 in Bristol, and 1·04 in Cardiff.

INQUESTS.—Inquests were held in 6873, or 5·5 per cent. of the total deaths; the mean proportion in the ten preceding third quarters having been 5·4 per cent. In the twenty-eight great towns the proportion of inquest cases to total deaths was 5·7 per cent., the percentage ranging from 1·9 in Preston, 2·4 in Oldham, and 2·5 in Huddersfield and in Halifax, to 6·8 in Leicester, 8·3 in Cardiff, 8·8 in Birmingham, and 9·2 in Bristol.

DEATHS IN PUBLIC INSTITUTIONS.—The deaths registered in workhouses, hospitals, and public lunatic asylums numbered 12,577, and were 10·1 per cent. of the total deaths; the mean proportion in the ten preceding corresponding quarters

having been 9·5 per cent. In the twenty-eight great towns 7104, or 15·1 per cent., of the registered deaths occurred in these public institutions, the percentage of these deaths in institutions ranging from 5·0 per cent. in Bolton and 5·5 in Preston, to 16·4 in Wolverhampton, 17·5 in Manchester, 17·6 in Brighton, and 19·4 in London.

Health of Colonial and Foreign Cities.

A summary of the Weekly Returns, with which the Registrar-General is favoured by various local authorities abroad, shows that the average annual death-rate during the quarter ending with September last in twenty-nine Colonial and Foreign cities, having an aggregate population of nearly sixteen millions of persons, was 26·1 per 1000.

In the twenty European cities the mean rate was 24·1 per 1000, against 20·4 in the twenty eight large English towns. Among the twenty-nine Colonial and Foreign cities the lowest death-rates were 18·1 in the Hague, 19·0 in Rotterdam, 20·3 in Paris, and 20·4 in Amsterdam; in the other towns the rates ranged upwards to 34·5 in Munich, 39·0 in Alexandria, 42·2 in Madras, and 48·6 in Cairo.

The rate of mortality in Paris was 20·3 per 1000, exceeding by 0·7 the rate recorded in London; the 11,443 deaths included 1661 from diarrhœal diseases, 274 from diphtheria and croup, 201 from measles, and 99 from small-pox. The deaths referred to typhoid fever, which had been 400 and 253 in the preceding two quarters, increased again last quarter to 322, and corresponded to an annual rate of 0·57 per 1000, while the death-rate from this disease in London did not exceed 0·15 per 1000. Small-pox caused 84 deaths in Trieste, 45 in St. Petersburg, 32 in Prague, and 19 in Buda-Pesth. Measles showed the highest proportional fatality in Copenhagen, Munich, Stockholm, Vienna, and Rotterdam; and scarlet fever in Trieste, Christiania, Prague, and Stockholm. The mortality from diphtheria and croup showed a general decline from that recorded in the previous quarter, although in Christiania, Buda-Pesth, and Cairo there was a marked increase. The mortality from diarrhœal diseases was excessive in most of the Foreign Cities from which Returns are received; the annual death-rate from these diseases, which ranged from 0·76 to 7·61 in the twenty-eight large English towns, was last quarter 6·80 in Christiania, 7·01 in New York, 7·46 in Hamburg, 7·60 in Buda-Pesth, 8·39 in Berlin, 8·75 in Breslau, 8·90 in Madras, 9·49 in Dresden, 11·17 in Alexandria, 12·59 in Munich, and 18·83 in Cairo.

Note.—The letter M or P affixed to the name of each Town denotes whether the limits, which the district or sub-districts named in the st column approximately represent, are Municipal or Parliamentary. Imp† D. signifies an Improvement District, and L. G. D. a Local overnment District.

† The rates of mortality for these towns have been corrected by the exclusion of a proportional number of deaths occurring in County ospitals and Lunatic Asylums, situate within the districts or sub-districts here taken as representing the towns, or by the exclusion or ddition of a proportion of the deaths in Union Workhouses in cases where only a portion of the Union is embraced by the area taken, or where e Workhouse is situated outside that area.

‡ The rate of increase of population in Barrow-in-Furness and in Ystradyfodwg was so abnormally large between 1871 and 1881 as to preclude e probability of the rate being maintained between 1881 and 1891. The present population of these towns has therefore been estimated from pecial returns of inhabited houses with which the Registrar-General has been favoured by the local authorities.

§ The 233 deaths include those of 67 persons killed in a Fire at Exeter Theatre.

[a] The *Registration* or *Union Counties* consist of groups of Superintendent Registrars' Districts, which are generally co-extensive with the Poor Law Unions. Those Districts which extend into two or more Counties (proper) are included entirely in that County in which the principal town of the district, or the greater part of the population, is located. The boundaries of Registration or Union Counties therefore differ more or less from the boundaries of Counties (proper).

[b] The averages of Marriages and Births are given only for the Eleven Divisions and for Registration Counties.

[c] See page 14, note b.

Note.—*The Registrars alone must be considered responsible for the accuracy of the figures shown in their Returns, and for the opinions expressed in the foot notes.*

REGISTRATION COUNTIES, and SUPERINTENDENT REGISTRARS' DISTRICTS of ENGLAND. of INFANTS under one year of Age, and of PERSONS aged 60 years and upwards from WHOOPING-COUGH, FEVER, DIARRHŒA, CHOLERA, and VIOLENCE, also INQUEST CASES and in the DIVISIONS, REGISTRATION COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and of ENGLAND.

[a] The *Superintendent Registrars' Districts*, 632 in number, are collections of contiguous Parishes or Places, combined for purposes connected with the Registration of Births, Deaths, and Marriages, and are nearly always identical with the Poor Law Unions of the same names; they are here arranged topographically under the Registration Counties.

[b] These areas, which were partly revised by the Ordnance Survey Department, are the same as those published in the Census Report of 1881. They do not include space occupied by foreshore or tidal water of rivers and creeks.

[c] See page 14, note [b].

II.—SOUTH EASTERN COUNTIES.—Superintendent Registrars' Districts—*continued.*

No.	Superintendent Registrars' Districts.	Area in Statute Acres.	Enumerated Population, 1881.	Marriages: Registered in Quarter ending 30 June 1887.	Births: Registered in Quarter ending 30 Sept. 1887. a The *Registration Sub-districts* (2134 in number) are sub-divisions of the *Superintendent Registrars' Districts* in which the Births and Deaths are registered by Registrars severally appointed for that purpose. The letter *W* denotes that the Sub-district contains within its limits a Workhouse belonging to the District or Union; *w* indicates that a Workhouse Establishment receiving inmates from other Districts than the one in which it stands is included; *H* indicates Hospital or Infirmary; and *L* Lunatic Asylum.

b For London, the numbers of Births and Deaths, as well as the details given under "Infants under 1 year of age" and the twelve subsequent headings in this Table, are derived from the Weekly Returns made by the Registrars, and relate to 13 weeks ending 1st October 1887.

I.—LONDON.—Registration Sub-districts—*continued.*

[a] 618 : 2.—The 15 deaths from measles (including 7 registered in September), occurred in the parish of Ruabon. In the first two weeks of October 5 more deaths from the disease were registered.
[b] 618 : 3.—Of the 24 deaths from measles, 21 occurred in Wrexham Urban Sanitary District.
[c] 621 : 1.—The 8 deaths from whooping-cough occurred in the parish of Llanrwst.
[d] 621 : 3.—The Registrar reports that measles is prevalent in the parish of Penmachno.
[e] 625 : 2.—The 19 deaths from measles occurred in Festiniog Urban Sanitary District.
[f] 627 : 1.—Of the 8 deaths from measles, 6 occurred in the parish of Llanllyfni.
[g] 628 : 3.—The 3 cases of fever were described as typhoid or enteric.

METEOROLOGY OF ENGLAND.

Remarks on the Weather during the Quarter ending September 30th, 1887.

By James Glaisher, Esq., F.R.S., *&c.*

The weather in July was very fine and warm. The temperature of the air was above its average on every day excepting the 17th, 18th, and 19th, and particularly so on the 2nd, 3rd, 4th, and 8th days. The atmospheric pressure was above its average excepting only a few days. The fall of rain was much below its average at all stations. The drought mentioned last month, which generally began on June 4 was broken on July 4, thus showing an absolute drought of 30 days duration.

The following table shows the period without rain at our stations:

Name of Stations.	No Rain fell.	Number of consecutive Days without Rain.	Name of Stations.	No Rain fell.	Number of consecutive Days without Rain.
Guernsey	From June 7th to July 9th	32 days.	Royston	From June 4th to July 5th	31 days.
Truro	From June 6th to July 8th	32 days.	Cardington	From June 3rd to July 8th	35 days.
Plymouth	From June 6th to July 7th	31 days.	Cambridge	From June 3rd to July 4th	31 days.
Torquay	From June 6th to July 8th	32 days.	Rugby	From June 3rd to July 4th	31 days.
Ventnor	From June 3rd to July 4th	31 days.	Lowestoft	From June 8th to July 4th	26 days.
Eastbourne	From June 3rd to July 9th	36 days.	Somerleyton	From June 8th to July 4th	26 days.
Osborne	From June 7th to July 9th	32 days.	Wolverhampton	From June 8th to July 4th	26 days.
Southbourne	From June 3rd to July 5th	32 days.	Leicester	From June 8th to July 4th	26 days.
Salisbury	From June 4th to July 4th	30 days.	Nottingham	From June 15th to July 5th	20 days.
Barnstaple	From June 9th to July 8th	29 days.	Burslem	From June 9th to July 5th	26 days.
Bath	From June 3rd to July 4th	31 days.	Llandudno	From June 8th to July 4th	26 days.
Whitehurch	From June 5th to July 5th	30 days.	Liverpool	From June 8th to July 5th	27 days.
Royal Observatory	From June 8th to July 5th	27 days.	Halifax	From June 8th to July 6th	28 days.
Blackheath	From June 8th to July 5th	27 days.	Hull	From June 3rd to July 4th	31 days.
Camden Square	From June 8th to July 4th	26 days.	Bradford	From June 9th to July 5th	26 days.
Barnet	From June 4th to July 10th	36 days.	Stonyhurst	From June 7th to July 4th	27 days.
Oxford	From June 4th to July 5 h	31 days.	Carlisle	From June 9th to July 3rd	24 days.

The fall of rain both preceding and following those days was generally very small, so that the drought was of much longer duration, consequently water supplies were very low, and pastures were burnt up. The hay crop was gathered without rain, and harvest work began early.

The weather in August was very fine and dry, with a more than average amount of sunshine. The temperature of the air was a little below the average at the beginning of the month, and from the 10th to the 20th, and above on other days. The atmospheric pressure was above its average till the 15th, and below from the 16th. The fall of rain was less than its average at most places. On the 16th and 17th there were thunderstorms over the country, and that on the 17th was most severe over London. The fall of rain varied from one inch to two inches in London and places a little south of London. At Blackheath 0·84 inch fell on the evening of the 17th within 20 minutes, and 1·75 fell in the day. This heavy fall was not experienced at Barnet, where 0·54 inch fell. The fall at Wolverhampton was 0·85, and at Carlisle was 1·14 inch, the largest fall at any other station was 0·47 inch at Southbourne. These refreshing showers were far from being general, and pastures at many places were dried up and streams very low.

The weather in September was cold and unsettled; the temperature of the air was below its average on nearly every day, particularly so at the end of the month. The atmospheric pressure was below its average during the first half of the month, and again from the 26th. The fall of rain was above its average at some places and below it at others. The first part of the month the S.W. wind was prevalent, and again from the 25th to the 28th; at other times the N.E. was the most prevalent.

Up to the end of September the average fall of rain from the 72 years previous observations is 18·1 inches, and the fall this year is 13·6 inches, being 4·5 inch short of the average. Back to 1815 the following are the instances of less rain in the nine months ending September:—

In 1884 it was 13·48°.	In 1864 it was 12·40°.	In 1847 it was 11·80°.
„ 1874 „ 12·80°.	„ 1861 „ 12·90°.	„ 1840 „ 13·30°.
„ 1870 „ 10·88°.	„ 1854 „ 13·30°.	

About London in July the mean daily temperature of the air was above its average on nearly every day throughout the month, the mean daily excess over the average of 60 years was 3°·4; from August 1st to the 5th there was a deficiency of 1°·2 daily; from August 6th to the 9th there was an average daily excess of 6°·1; from August 10th to the 21st the average daily deficiency was 4°·0; from August 22nd to the 31st it was warm, the average daily excess was 2°·5; a cold period set in and continued to the end of September, the average daily deficiency for these 30 days was 3°·5.

The mean temperature of the air for July was 66°·5, being 4°·8 and 4°·3 above the average of 116 years and 46 years respectively; it was 3°·5, 2°·7, and 3°·1 higher than in 1886, 1885, and 1884 respectively.

The mean temperature of the air for August was 62°·5, being 1°·6 and 1°·1 above the average of 116 years and 46 years respectively; it was 0°·5 and 4°·0 higher than in 1886 and 1885, and 3°·8 lower than in 1884 respectively.

The mean temperature of the air for September was 54°·0, being 2°·6 and 3°·1 below the average of 116 years and 46 years respectively; it was 4°·7, 1°·1, and 5°·3 lower than in 1886, 1885, and 1884 respectively.

The mean high day temperature of the air in July was 80°·5, being 6°·3 above the average of 46 years; it was 5°·5, 3°·5, and 5°·2 higher than in 1886, 1885, and 1884 respectively.

The mean high day temperature of the air in August was 75°4, being 2°·5 above the average of 46 years; it was 1°·6 and 5°·6 higher than in 1886 and 1885, and 3°·3 lower than in 1884 respectively.

The mean high day temperature of the air in September was 62°·9, being 4°·5 below the average of 46 years; it was 6°·3, 1°·8, and 6°·3 lower than in 1886, 1885, and 1884 respectively.

The mean low night temperature of the air in July was 54°·1, being 1°·0 above the average of 46 years; it was 1°·3, 1°·6, and 0°·6 higher than in 1886, 1885, and 1884 respectively.

The mean low night temperature of the air in August was 51°·7, being 1°·4 below the average 46 years; it was 1°·6 lower than in 1886, 1°·9 higher than in 1885, and 1°·9 lower than in 1884 respectively.

NOTE.—In reading this table it will be borne in mind that the plus sign (+) signifies *above* the average, and the minus sign (−) signifies *below* the average.

Average duration of the different directions of the wind referred to eight points of the compass, and duration in days of each direction in each month in the quarter, were as follows:—

Direction of Wind.	July. 1887.	July. Average.	July. Departure from Average.	August. 1887.	August. Average.	August. Departure from Average.	September. 1887.	September. Average.	September. Departure from Average.
	d.	d.	d.	d.	d.	d.	d.	d.	d.
N.W.	4	3	+ 1	8	3	+ 5	3	4	− 1
N.	1	4	− 3	1	3	− 2	2	6	− 4
N.E.	8	3½	+ 4½	6	3	+ 3	8	2	+ 6
E.	1	2	− 1	0	1½	− 1½	0	2	− 2
S.E.	1	1½	− ½	2	1½	+ ½	0	3	− 3
S.	2	3	− 1	2	3	− 1	3	8	− 5
S.W.	12	10	+ 2	8	12	− 4	12	3	+ 9
W.	2	4	− 2	4	4	0	2	2	0

The sign (+) denotes excesses over averages; the numbers affected by this sign in July are opposite to N.E., S.W., and N.W.; in August to N.W., N.E., and S.E.; in September to S.W. and N.E.

The sign (−) denotes deficiencies below averages. In July these signs are opposite to N., W., E., S., and S.E.; in August to S.W., N., E., and S.; in September to S., N., and compounds of S.

The mean low night temperature of the air in September was 46°·9, being 2°·2 below the average of 46 years; it was 3°·4, 0°·3, and 4°·4 lower than in 1886, 1885, and 1884 respectively. Therefore the days were warm in July and August, and cold in September. The nights were warm in July and cold in August and September.

The mean daily range of temperature in July was 26°·4, being 5°·4 greater than the average. In August it was 23°·8, being 4°·0 greater than the average, and in September it was 16°·0, being 2°·2 smaller than the average.

The mean temperature in July was 5°·6 warmer than in June; in August it was 4°·0 colder than in July; and in September it was 8°·5 colder than in August.

(From the preceding 46 years' observations the increase of temperature from June to July is 3°·4; the decrease from July to August is 0°·8; and the decrease from August to September is 4°·3.)

From June to July at stations south of 53° there was an increase of temperature of 4°·4, and at stations north of this parallel there was an increase of 2°·6.

From July to August there was a decrease of 1°·7 at stations south of 51°, and about 3°·3 at stations north of this parallel.

From August to September there was a decrease of 6°·1 at stations south of 51°; at stations between 51° and 53° there was a decrease of 7°·5; and a decrease about 5°·7 at stations north of this parallel.

The mean readings of the barometer at the height of 159 ft. above the level of the sea for the month of July was 29·866 ins., being 0·069 in. above the average of 46 years, 0·119 in. higher than in 1886, 0·130 in. lower than in 1885, and 0·086 in. higher than in 1884 respectively.

The mean reading of the barometer in August was 29·807 ins., being 0·023 in. above the average of 46 years; 0·009 in. lower than in 1886, 0·011 in. higher than in 1885, and 0·028 in. lower than in 1884, respectively.

The mean reading of the barometer in September was 29·759 ins., being 0·039 in. below the average of 46 years; 0·097 in. lower than in 1886, 0·046 in. higher than in 1885, and 0·076 in. lower than in 1884, respectively.

The mean reading of the barometer in July was 0·147 in. lower than in June; in August was 0·059 in. lower than in July, and in September was 0·048 in. lower than in August.

From June to July there was a decrease of atmospheric pressure at all stations; at those south of 51°, amounting to 0·13 in.; between 51° and 53° amounting to 0·15 in.; and those north of this parallel amounting to 0·21 in.

From July to August there was a decrease at all stations; at those south of 51° to 0·07 in., between 51° and 52° to 0·08 in.; between 52° and 53° to 0·05 in., and those north of this parallel to 0·03 in.

From August to September there was a decrease at all stations at those south of 52° to 0·04 in.; between 52° and 53° to 0·06 in.; and those north of this parallel to 0·09 in.

About London the barometric pressure was generally above its average till August 15th; the average daily excess for these 46 days was 0·11 in.; from August 16th to September 15th the mean daily deficiency was 0·30 in.; from September 16th to 26th the average daily excess was 0·31 in.; then from September 26th to end of quarter the average daily deficiency was 0·35 in.

Thunderstorms occurred in July on 13th at Halifax, Hull, and Bradford; on the 14th at Bath, Whitchurch, and Somerleyton; on the 15th at Oxford and Hull; on the 16th at Cambridge and Halifax; on the 17th at Torquay, Osborne, and Liverpool; and on the 31st at Royston, Cardington, Lowestoft, Halifax, and Stonyhurst.

In August on the 16th at Plymouth, Bath, and Wolverhampton; on the 17th general over the country; on the 18th at Liverpool and Carlisle; on the 19th at Guernsey and Llandudno; on the 27th at Liverpool and Carlisle; on the 28th at Truro, Barnet, Lowestoft, and in the Northern counties; on the 29th at Lowestoft, Somerleyton, Halifax, and Hull; and on the 31st at Oxford and Hull.

In September on the 3rd at Burslem and Stonyhurst; on the 6th at Liverpool and Halifax; on the 7th at Osborne, and on the 27th at Oxford, Royston, Cardington, Cambridge, Lowestoft, and Somerleyton.

Thunder was heard but lightning was not seen in July on the 7th at Bath; on the 8th at Osborne and Wolverhampton; on the 9th at Barnet; on the 13th at Royston, Wolverhampton, and Hull; on the 14th at Royston, Cambridge, and Rugby; on the 15th at Whitchurch, Blackheath, and Rugby; on the 16th at Royston; on the 17th at Torquay, Bath, Wolverhampton, Leicester, and Llandudno; on the 20th at Wolverhampton; on the 26th at Barnet; and on the 31st at Royston, Cambridge, Leicester, Llandudno, and Carlisle.

In August on the 13th at Ventnor; on the 17th at Plymouth, Torquay, Salisbury, Cardington, Leicester, and Halifax; on the 18th at Cardington, Cambridge, Leicester, and Hull; on the 19th at Somerleyton; on the 27th at Llandudno; on the 28th at Ventnor, Royston, Cambridge, Somerleyton, Burslem, and Liverpool; on the 29th at Torquay, Rugby, Leicester, and Bradford; on the 30th at Halifax; and on the 31st at Salisbury.

In September on the 3rd at Rugby; on the 6th at Bath, Royston and Rugby; on the 27th and 28th at Rugby; and on the 29th at Carlisle.

Lightning was seen but thunder was not heard in July on the 8th at Bath; on the 9th at Barnet; on the 15th at Whitchurch and Royston; on the 16th at Cambridge; on the 18th at Salisbury; and on the 31st at Torquay, Osborne, Blackheath, Oxford, and Cambridge.

[*Continued on page* 71.]

MONTHLY METEOROLOGICAL TABLE FOR THE QUARTER ENDING SEPTEMBER 30TH, 1887.

The Observations have been reduced to Mean values by Glaisher's Barometrical and Diurnal Range Tables, and the Hygrometrical results have been deduced from the seventh edition of his Hygrometrical Tables.

The highest temperatures of the air were at the Royal Observatory, 92°·2; and at Cardington and Cambridge, 91°·0.
The lowest temperatures of the air were at Salisbury, 27°·0; at Barnet, 28°·9; and at Nottingham, 29°·9.
The greatest ranges of temperature were at Salisbury, 63°·0; and at Cardington and Cambridge, 61°·0.
The least ranges of temperature were at Liverpool, 40°·3; at Guernsey, 41°·9; and at Lowestoft, 43°·5.
The greatest number of days of rain were at Carlisle, 48; at Nottingham, 47; and Liverpool, 46.
The least number of days of rain were at Oxford 26; and at Truro, Osborne, and Southbourne, 27.
The greatest falls of rain were at Carlisle, 10·62 inches; at Stonyhurst, 10·33 inches; and at Bath, 8·19 inches.
The least falls of rain were at Rugby, 3·22 inches; at Cardington, 3·66 inches; and at Cambridge, 3·71 inches.

Quarterly Meteorological Table for different Parallels of Latitude.

PARALLELS OF LATITUDE, &c.	Mean Pressure of dry Air reduced to the level of the Sea.	Mean of all Highest Readings of the Thermometer.	Mean of all Lowest Readings of the Thermometer.	Mean Range of Temperature in the Quarter.	Mean of all Highest.	Mean of all Lowest.	Mean Monthly Range of Temperature.	Mean Daily Range of Temperature.	Mean Temperature of the Air.	Mean Temperature of the Dew Point.	Mean Elastic Force of Vapour.	Mean Weight of Vapour in a cubic foot of Air.	Mean additional Weight required for saturation.	Mean degree of Humidity.	Mean Weight of a cubic foot of Air.	Mean Reading of Maximum in Rays of Sun.	Mean Reading of Minimum on Grass.	Wind. Mean Estimated Strength.	Wind. Relative Proportion of N.	Wind. Relative Proportion of E.	Wind. Relative Proportion of S.	Wind. Relative Proportion of W.	Mean Amount of Ozone.	Mean Amount of Cloud.	Rain. Number of Days it fell.	Rain. Mean Amount collected.

INDEX OF SUPERINTENDENT REGISTRARS' DISTRICTS.

The following Index furnishes a reference to the *Number** of each SUPERINTENDENT REGISTRAR'S DISTRICT. In forming the alphabetical arrangement, the principle adopted has been to place compound names in the order in which they are pronounced.

Aberayron, 604.
Abergavenny, 582.
Aberystwith, 605.
Abingdon, 115.
Alcester, 397.
Alderbury (Salisbury), 254.
Alnwick, 563.
Alresford, 105.
Alston, 568.
Alton, 106.
Altrincham, 445.
Alverstoke, 89.
Amersham, 140.
Amesbury, 253.
Ampthill, 173.
Andover, 110.
Anglesey, 630*a*.
Ashborne, 438.
Ashby-de-la-Zouch, 406.
Ashton-under-Lyne, 468.
Aston, 387.
Atcham (Shrewsbury), 351.
Atherstone, 389.
Auckland, 545.
Axbridge, 315.
Axminster, 269.
Aylesbury, 143.
Aylsham, 223.
Aysgarth, 539.

Bakewell, 440.
Bala, 623.
Banbury, 155.
Bangor, 628.
Barnet, 128.
Barnsley, 506.
Barnstaple, 285.
Barrow-in-Furness, 482.
Barrow-upon-Soar, 408.
Barton Regis, 321.
Barton-upon-Irwell, 463.
Basford, 430.
Basingstoke, 108.
Bath, 317.
Battle, 69.
Beaminster, 267.
Bedale, 537.
Bedford, 171.
Bedminster, 319.
Bedwelty, 583.
Belford, 564.
Bellingham, 561.
Belper, 437.
Berkhampstead, 139.
Berwick, 565.
Bethnal Green, 16.
Beverley, 519.
Bicester, 151.
Bideford, 287.
Biggleswade, 172.
Billericay, 191.
Billesden, 402.
Bingham, 434.
Birkenhead, 452.
Birmingham, 386.
Bishop Stortford, 131.
Blaby, 403.
Blackburn, 474.
Blandford, 260.
Blean, 58.
Blofield, 228.
Blything, 216.
Bodmin, 294.
Bolton, 461.
Bootle, 576.
Bosmere, 211.
Boston, 417.
Bourn, 414.
Brackley, 156.
Bradfield, 118.
Bradford-on-Avon, 249.
Bradford (Yorks), 497.
Braintree, 199.
Bramley, 500.
Brampton, 570.
Brecknock, 608.
Brentford, 126.
Bridge, 56.
Bridgend, 589.
Bridgnorth, 348.
Bridgwater, 307.
Bridlington, 525.
Bridport, 268.
Brighton, 77.
Bristol, 320.
Brixworth, 162.
Bromley, 41.
Bromsgrove, 384.
Bromyard, 341.
Buckingham, 146.
Builth, 607.
Burnley, 472.
Burton-upon-Trent, 367.
Bury, 462.
Bury St. Edmunds, 208.

Caistor, 424.
Calne, 245.
Camberwell, 26.
Cambridge, 179.
Camelford, 290.
Cannock, 370.
Canterbury, 57.
Cardiff, 586.
Cardigan, 601.
Carlisle, 572.
Carmarthen, 597.
Carnarvon, 627.
Castle Ward, 558.
Catherington, 103.
Caxton, 177.
Chapel-en-le-Frith, 441.
Chard, 309.
Cheadle, 365.
Chelmsford, 192.
Chelsea, 3.
Cheltenham, 335.
Chepstow, 580.
Chertsey, 31.
Chester, 450.
Chesterfield, 439.
Chester-le-Street, 552.
Chesterton, 178.
Chichester, 84.
Chippenham, 244.
Chipping Norton, 154.
Chipping Sodbury, 322.
Chorley, 475.
Chorlton, 464.
Christchurch, 93.
Church Stretton, 346.
Cirencester, 331.
Cleobury Mortimer, 347.
Clitheroe, 473.
Clun, 345.
Clutton, 316.
Cockermouth, 574.
Colchester, 196.
Congleton, 448.
Conway, 629.
Cookham, 121.
Corwen, 622.
Cosford, 204.
Coventry, 392.
Cranbrook, 52.
Crediton, 282.
Crickhowell, 609.
Cricklade, 242.
Croydon, 38.
Cuckfield, 75.

Darlington, 542.
Dartford, 42.
Daventry, 161.
Depwade, 230.
Derby, 436.
Devizes, 247.
Dewsbury, 502.
Docking, 235.
Dolgelly, 624.
Doncaster, 511.
Dorchester, 265.
Dorking, 35.
Dover, 64.
Downham, 238.
Driffield, 524.
Droitwich, 383.
Droxford, 102.
Dudley, 374.
Dulverton, 304.
Dunmow, 200.
Durham, 549.
Dursley, 324.

Easington, 550.
Easingwold, 528.
East Ashford, 55.
Eastbourne, 70.
East Grinstead, 74.
Easthampstead, 122.
East Preston (Worthing), 82.
East Retford, 427.
Eastry, 63.
East Stonehouse, 278.
East Ward, 577.
Ecclesall Bierlow, 508.
Edmonton, 129.
Elham, 65.
Ellesmere, 353.
Ely, 182.
Epping, 187.
Epsom, 30.
Erpingham, 222.
Eton, 141.
Evesham, 381.
Exeter, 272.

Falmouth, 298.
Fareham, 90.

QUARTERLY RETURN

OF

MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE DIVISIONS, COUNTIES, AND DISTRICTS OF

ENGLAND;

WITH CERTAIN DETAILED INFORMATION RELATING TO THE DEATHS IN EACH REGISTRATION SUB-DISTRICT.

By Authority of the Registrar General.

Printed under the Superintendence of Her Majesty's Stationery Office,
AND SOLD BY EYRE AND SPOTTISWOODE, 9, EAST HARDING ST., FETTER LANE, E.C.

No. 156.] **Marriages**—*July, August, September,* 1887.
Births and **Deaths**—*October, November, December,* 1887. [Price 9*d.*

General Register Office, Somerset House,
31st January, 1888.

The POPULATION of the UNITED KINGDOM in the middle of 1887 is estimated at 37,091,564 persons; that of England and Wales at 28,247,151, of Scotland at 3,991,499, and of Ireland at 4,852,914.

In the United Kingdom 275,246 *births* and 173,875 *deaths* were registered in the three months ending 31st December 1887. The natural increase of population was, therefore, 101,371. The registered number of persons married in the quarter ending 30th September 1887 was 119,720.

The birth-rate in the United Kingdom in the fourth quarter of 1887 was 29·4 and the death-rate 18·6 per 1000. The marriage-rate in the third quarter of 1887 was 12·8 per 1000.

The several facts concerning Scotland and Ireland are recorded in the Quarterly Returns of the Registrars-General for those parts of the United Kingdom.

ENGLAND.

This Return comprises the BIRTHS and DEATHS registered in the 2134 registration sub-districts of England and Wales during the quarter ending 31st December 1887; and the MARRIAGES in 14,857 churches or chapels, in 9895 registered places of worship unconnected with the Established Church, and in 632 Superintendent Registrars' Offices, in the three months ending 30th September 1887.

Marriages.

During the three months ending with September last, the marriages of 99,436 persons were registered in England and Wales, corresponding to an annual rate of 14·0 per 1000 of the estimated population in the middle of 1887. This marriage rate, although 0·2 above the exceptionally low rate in the third quarter of 1886, was 0·7 below the mean rate in the corresponding quarters of the ten years 1877–86. The lowest county rates in the third quarter of 1887 were (excluding the small county of Rutland) 10·4 in Shropshire, 10·6 in Lincolnshire, 10·7 in Suffolk, and 10·9 in Cambridgeshire; the rates in the other counties ranged upwards to 14·7 in Monmouthshire, 14·9 in Hampshire, 15·1 in Lancashire, and 15·4 in Northumberland. In North Wales the marriage-rate was but 9·4, while in Registration London it was 17·4 per 1000.

Births.

The births registered in England and Wales during the three months ending with December last were 217,749, and corresponded to an annual rate of 30·6 per 1000 of the estimated population. This birth-rate showed a further decline from the rates recorded in the corresponding quarters of recent years, and was 2·4 below the mean rate in the fourth quarters of the ten years 1877–86. The birth-rate in the last three months of 1887 was lower than that recorded in the fourth quarter of any year since 1849, at which date the registration of births is known to have been defective. The rate last quarter did not exceed 25·0 in North Wales, 26·1 in Shropshire, 26·2 in Sussex, and 26·7 in Herefordshire, whereas it ranged upwards to 32·7 in the extra-metropolitan part of Middlesex and in Durham, 33·9 in Northumberland, 35·4 in Monmouthshire, and 35·6 in Essex.

In the twenty-eight great towns the registered births corresponded to an annual rate of 31·8 per 1000, which was 1·2 above the general English rate. The rate was 31·2 in London, and 32·3 in the twenty-seven provincial towns; the rates in these provincial towns ranging from 25·5 in Brighton, 26·2 in Bradford, 28·2 in Bristol, and 28·5 in Huddersfield, to 37·2 in Preston, 38·0 in Portsmouth, 40·2 in Newcastle-upon-Tyne, and 40·5 in Cardiff. In fifty other large town districts the birth-rate was 30·9, and 0·9 below the rate in the great towns. The lowest rates in these fifty towns were 19·6 in Hastings, 19·7 in Southport, 22·6 in Bath, and 23·3 in Cambridge; while the highest rates were 37·3 in Wigan, 38·3 in St. Helens, 38·9 in South Shields, and 39·8 in Newport (Monmouth).

Movement of the Population.

The natural increase of the population of England and Wales, or the excess of births over deaths, which had been 93,234 and 88,113 in the fourth quarters of 1885 and 1886, further declined last quarter to 83,957.

It appears from returns issued by the Board of Trade that 70,736 emigrants embarked during last quarter from the various ports of the United Kingdom at which emigration officers are stationed. Distributing 2049 whose nationality was undistinguished, and excluding 18,729 foreigners, the emigrants of British origin were 52,007, including 36,030 English, 6,691 Scotch, and 9,286 Irish. The numbers of British emigrants in the two preceding corresponding quarters were 40,490 and 45,990 respectively. The proportion of emigrants last quarter to a million of the estimated population in the three divisions of the United Kingdom was 1276 from England, 1676 from Scotland, and 1913 from Ireland. Compared with the corresponding quarters of recent years the proportional amount of emigration showed a further increase in each division of the United Kingdom.

Prices and Pauperism.

The average price of wheat during the three months ending with December last was 30*s.* 2*d.*, showing a further decline from the mean prices in the preceding quarters of the year. The mean wholesale prices of beef and of mutton were $4\frac{4}{8}$*d.* and 5*d.* per lb. respectively; compared with the mean prices in preceding quarters the price of beef showed a further slight increase, and that of mutton a further decline. The average price of the best sea-borne coal in the London market, put in barge from the collier in the Thames, was 15*s.* 2*d.*, against 13*s.* 11*d.* in the preceding quarter, and against 15*s.* 0*d.* in the fourth quarter of 1886. The mean price of Consols was $102\frac{3}{8}$*l.*, which, after correction for the value of the accruing dividend, showed an increase of $\frac{5}{8}$*l.* on the mean price in the preceding quarter. The minimum annual rate of discount charged at the Bank of England, which had been raised to 4*l.* per cent. on 1st September, remained unchanged throughout last quarter.

The average number of paupers (exclusive of lunatics in asylums, and vagrants) relieved in England and Wales on the last day of each week in the quarter was

728,916, of whom 189,055 received in-door and 539,861 out-door relief. The proportion of the population in receipt of pauper relief during the three months ending with December was per 25·8 1000, against 25·9 and 25·8 in the two preceding corresponding quarters.

Meteorology.

The remarks upon the Meteorology of the quarter at the Royal Observatory Greenwich, and at the various other stations of observation, furnished by Mr. James Glaisher, F.R.S., with accompanying Tables, will be found on pages 65–72. The mean reading of the barometer was 29·707 inches, and was ·039 of an inch below the mean reading for the corresponding periods of 46 years; the mean reading showed an excess in October, but was below the average both in November and December. The mean temperature of the air during the quarter was 41°·3, and was 2°·4 below the average for the corresponding quarters of 116 years. The mean temperature was considerably below the average in each month of the quarter, the deficiency of temperature being 4°·6 in October, 1°·6 in November, and 1°·0 in December.

The weather during October and November was generally dry and cold. October was fine, but the temperature exceptionally low; the month was indeed colder than any October back to the year 1817, when the same mean temperature prevailed. Between the 15th and 22nd of November very cold weather prevailed. December was for the most part fine, and the temperature was below the average after the 4th of the month. At 33 stations of observation the mean temperature during the quarter ranged from 38°·9 in Halifax and 39°·1 in Wolverhampton, to 44°·9 in Truro, 45°·5 in Guernsey, and 48°·2 in Barnstaple.

The amount of rain measured at Greenwich during the quarter was 6·28 inches, and was 0·84 of an inch below the average amount in the corresponding periods of 72 years. The rainfall was considerably below the average in October and December, whereas it showed a marked excess in November. Rain was measured on 11 days in October, 20 in November, and 16 days in December; or on 47 of the 92 days of the quarter. The rainfall of the year was but 19·86 inches, and was 5·36 inches below the average amount in 72 years. The amounts measured during last quarter at 33 stations of observation ranged from 4·09 inches in Nottingham and 4·21 in Cambridge, to 12·89 inches in Truro, and 14·12 in Guernsey.

The number of hours of bright sunshine recorded during the quarter at the Royal Observatory, Greenwich, was 126·3, and was 14·2 below the average amount recorded in the corresponding periods of the ten years 1877–86.

Deaths.

During the three months ending with December last 133,792 deaths were registered in England and Wales, corresponding to an annual rate of 18·8 per 1000 of the estimated population. This death-rate was 1·0 below the mean rate in the fourth quarters of the ten years 1877-86, although it was 0·3 above the rate recorded in the last quarter both of 1884 and of 1885. The lowest county rates during the quarter were 14·4 in Surrey (extra-metropolitan), 14·5 in Sussex, and 15·0 in Shropshire; while the highest rates were 19·7 in Monmouthshire, 19·9 in Cumberland, 20·4 in the West Riding of Yorkshire, 20·5 in Northumberland, and 22·2 in Lancashire.

The 133,792 deaths included 68,082 of males, and 65,710 of females. The annual death-rate among males was 19·7, and among females 18·0 per 1000 estimated to be living of each sex. In equal numbers living the deaths of males were 109 to 100 of females; in the corresponding quarters of 1884, 1885, and 1886 the proportions were respectively 108, 110, and 111 of males to 100 of females.

Urban and Rural Mortality.—In the registration districts and sub-districts having the largest proportion of urban population (see Table III.), and containing

an estimated population of about eighteen millions, the death-rate was 19·8 per 1000; in the remaining and chiefly rural population of a little more than ten millions, the rate was 16·9. The urban rate was 0·5, and the rural rate 0·2, below the mean rates in the fourth quarters of the six years 1881–86. In equal numbers living, the deaths were 117 in the urban to 100 in the rural population, against 119 to 100 in the fourth quarters of the six years 1881–86.

In the twenty-eight great towns, including London, and having an estimated population of rather more than nine millions, the annual death-rate was 21·1, which exceeded the general urban rate by 1·3. The death-rate was 20·0 in London, and averaged 22·0 in the twenty-seven provincial towns. The lowest rates in the large provincial towns were 16·3 in Brighton, 17·2 in Hull, and 18·3 in Norwich; while the highest rates were 26·6 in Bolton, 27·4 in Manchester, 28·6 in Blackburn, and 28·8 in Preston, all being Lancashire towns.

In fifty other large town districts, with an aggregate population estimated at nearly three millions, the death-rate was 19·2, which was 0·6 below the general urban rate, and 1·9 below the rate in the twenty-eight great towns. The lowest rates in these fifty town districts were 13·0 in Maidstone, 13·1 in Lincoln, 13·7 in Darlington, and 14·0 in Burton-upon-Trent; the rates in the other towns ranged upwards to 23·5 in Warrington and in Ipswich, 23·7 in Macclesfield, and 25·5 in St. Helens and in Wigan.

Mortality at different Ages.—The deaths last quarter included 29,567 of infants under one year, 66,097 of persons aged between one and 60 years, and 38,128 of persons aged upwards of 60 years.

The rate of infant mortality, or the proportion of deaths under one year to registered births, was 136 per 1000, the mean proportion in the corresponding periods of the ten years 1877–86 having been 141 per 1,000. The lowest county rates were 64 in Huntingdonshire, 67 in Rutlandshire, 77 in Dorsetshire, and 83 in Oxfordshire; while the highest were 151 in Leicestershire, 153 in Staffordshire, 157 in Nottinghamshire, 160 in the West Riding of Yorkshire, 163 in Lancashire, and 169 in Durham.

In the twenty-eight great towns the deaths of infants were in the proportion of 154 per 1000 registered births. The lowest rates in these towns were 111 in Brighton, 123 in Norwich, and 127 in Birkenhead; while the highest were 198 in Oldham, 217 in Bolton, and 233 in Blackburn, all Lancashire towns. In fifty other large town districts the mean rate was 149, while the rate ranged from 87 in Oxford, 91 in Reading, and 100 in Chester, to 201 in Barrow-in-Furness, 203 in Worcester, 204 in Bury, and 216 in Warrington.

Among persons aged between one and 60 years the deaths corresponded to an annual rate of 10·3 per 1000 persons estimated to be living at those ages, against an average of 11·1 in the ten preceding fourth quarters. In the twenty-eight great towns the deaths at these ages corresponded to an annual rate of 12·6, the rates ranging from 8·5 in Brighton, 8·8 in Norwich, and 9·8 in Hull, to 16·3 in Bolton, 16·8 in Blackburn, 17·1 in Preston, and 17·4 in Manchester.

The deaths among persons aged upwards of 60 years were equal to an annual rate of 72·6 per 1000 persons estimated to be living at those ages, which exceeded by 2·1 the mean rate in the ten preceding corresponding quarters. In the twenty-eight great towns the rate at these ages was 79·4, and was 6·8 above the general English rate. In London the rate at these ages was 73·1, while in the twenty-seven provincial towns it was 85·2; the rate ranged from 60·9 in Leicester, 64·2 in Hull, and 70·4 in Norwich, to 105·8 in Birkenhead, 111·4 in Manchester, and 119·4 in Preston.

The death-rates of infants and of persons aged between one and 60 years were, respectively, 3·5 and 7·2 per cent. below the mean rates in the ten preceding corresponding quarters, while the death-rate of persons aged upwards of 60 years exceeded the average by 3·0 per cent.

Zymotic Diseases.—The 133,792 deaths from all causes included—

3104	attributed to	measles,
2921	,,	scarlet fever,
2464	,,	whooping-cough,
1914	,,	diarrhœa,
1835	,,	fever,
1563	,,	diphtheria,
and 358	,,	small-pox.

Thus 14,159 deaths were ascribed to these zymotic causes, corresponding to an annual rate of 1·99 per 1000 persons living, the average annual rate in the ten preceding fourth quarters having been 2·44.

The rate was 0·52 in Rutland, 0·55 in Herefordshire, 0·68 in Wiltshire, and 0·71 in Bedfordshire; while it ranged upwards to 2·64 in Lancashire, 2·72 in Derbyshire, and 3·54 in Monmouthshire. In the twenty-eight great towns the rate was 2·50, ranging from 1·09 in Brighton, 1·14 in Plymouth, and 1·24 in Hull, to 4·50 in Blackburn, 4·61 in Derby, 4·86 in Bolton, and 4·92 in Sheffield. In fifty other considerable towns the rate was 2·05, the highest rates being 4·63 in Reading, 4·66 in Northampton, 6·13 in Cheltenham, and 6·72 in St. Helens. In the remainder of England and Wales, after excluding the seventy-eight towns, the rate was 1·69.

The 3104 deaths attributed to *measles* corresponded to an annual rate of 0·44 per 1000, against a mean of 0·42 in the ten preceding fourth quarters. The death-rate from measles last quarter, however, although slightly above the ten-years' average showed a further decline from the high rates that prevailed in the last quarters both of 1885 and 1886. No death from this disease was registered in Rutlandshire or in Westmorland, and the rate was below 0·10 in Bedfordshire, Norfolk, Wiltshire, Cornwall, Somersetshire, and Herefordshire; while it ranged upwards to 1·04 in Gloucestershire, 1·16 in Cumberland, 1·35 in Monmouthshire, and 1·48 in Derbyshire. In the twenty-eight great towns the rate was 0·41; and whereas no fatal case was recorded in Portsmouth, Norwich, Huddersfield, Hull, or Sunderland, the highest rates were 1·38 in Bradford, 1·48 in Blackburn, 1·58 in Birmingham, 2·43 in Bolton, and 3·67 in Derby. In fifty other considerable towns the rate was 0·61, and half as high again as in the larger towns; the highest rates were 2·28 in Ipswich, 2·67 in Colchester, 3·63 in Reading, and 5·34 in Cheltenham. In the remainder of England and Wales the rate was 0·43, and slightly above the rate in the twenty-eight great towns. Measles showed marked excess of mortality in Broad Clist, Tewkesbury, Shardlow, Runcorn, Aspull, Atherton, Farnworth (Bolton), Horwich, Skipton, Darfield, Ormesby, Whitehaven, Egremont, Abergavenny, Aberystruth, Margam, Llanelly (Crickhowell), and Carnarvon registration sub-districts.

The 2921 deaths from *scarlet-fever* corresponded to an annual rate of 0·41 per 1000, against a mean rate of 0·64 in the ten preceding fourth quarters; the rate, however, exceeded that which was recorded in the last quarter of each of the three years 1884, 1885, and 1886. No death from this disease was registered in Rutlandshire, and the death-rate was but 0·02 in Leicestershire and 0·03 in Herefordshire, while it ranged upwards to 0·64 in Cheshire and in South Wales, 0·70 in Gloucestershire and in Lancashire, and 0·85 in Monmouthshire. In the twenty-eight great towns the rate was 0·62, being 0·63 in London and 0·61 in the twenty-seven provincial towns; among the latter the rates ranged from 0·00 in Leicester and in Derby, to 1·10 in Salford, 1·26 in Oldham, 1·53 in Preston, 1·65 in Blackburn, and 2·10 in Birkenhead. In fifty other considerable towns the rate was only 0·29, although it was 1·27 in St. Helens, 1·30 in Accrington, 1·36 in Northampton, and 1·81 in Macclesfield and in Swansea. In the remainder of England and Wales the rate was 0·30. The mortality from this disease showed a marked excess in St. George (Barton Regis), Chesterfield, Eckington (Chesterfield), Walton (West Derby), Keighley, Todmorden, Barnsley, Ormesby, Hamsterley, Aberystruth, Milford (Haverfordwest), Llangattock, and Llanelly (Crickhowell) registration sub-districts.

The 2464 deaths from *whooping-cough* corresponded to an annual rate of 0·35 per 1000, against a mean rate of 0·36 per 1000 in the ten preceding fourth quarters. No death from this disease was registered in Huntingdonshire and the rate did not exceed 0·02 in Cambridgeshire, and 0·03 in Herefordshire, while it ranged upwards to 0·50 in Leicestershire, 0·56 in Nottinghamshire, 0·60 in Cumberland, and 0·76 in Essex. In the twenty-eight great towns the rate was 0·55, ranging from 0·00 in Preston, 0·07 in Blackburn, 0·08 in Cardiff, and 0·09 in Bristol, to 0·63 in Oldham, 0·74 in Wolverhampton, 0·76 in Leicester, and 0·79 in London. In fifty other considerable towns the rate was 0·34, the highest rates being 1·51 in Gateshead, 1·88 in St. Helens, 2·28 in Carlisle, and 3·10 in Warrington. In the remainder of England and Wales the rate was 0·24. The mortality from this disease showed marked excess in Raunds and in Ilkeston subdistricts.

The 1914 deaths from *diarrhœa* corresponded to an annual rate of 0·26 per 1000, against a mean rate of 0·47 in the ten preceding fourth quarters, and was lower than that in the corresponding quarter of any year on record. This low rate was doubtlessly due to the exceptionally low temperature in October, the mean temperature of that month, at Greenwich, being no less than 4°·6 Fahrenheit below the average in 16 years. The lowest county rates were 0·09 in Oxfordshire, 0·12 in Westmorland, and 0·13 in Wiltshire; in the other counties the rate ranged upwards to 0·42 in Lancashire and in Monmouthshire, 0·47 in Huntingdonshire, and 0·49 in Staffordshire. In the twenty-eight great towns the rate was 0·27, ranging from 0·08 in Derby and 0·11 in Halifax, to 0·54 in Manchester, 0·57 in Salford, 0·75 in Blackburn, and 0·97 in Bolton. In fifty other considerable towns the rate was 0·34, the highest rates being 0·83 in Worcester and in Dudley, 0·96 in West Bromwich, and 1·01 in Wigan. In the remainder of England and Wales the rate was 0·26.

The 1835 deaths from *fever*, including typhus, enteric fever, and simple and ill-defined forms of continued fever, corresponded to an annual rate of 0·26 per 1000, against a mean rate of 0·36 in the ten preceding fourth quarters; this rate was with one exception (in 1885) lower than that in the last quarter of any year on record. No death from this cause was registered in Herefordshire or in Rutlandshire, and the death-rate was but 0·04 in Dorsetshire and in Shropshire, and 0·06 in North Wales; the rate ranged upwards in the other counties, to 0·38 in Lancashire, 0·41 in Leicestershire and in Cheshire, and 0·47 in Nottinghamshire. In the twenty-eight great towns the rate was 0·31, being 0·25 in London and 0·36 in the twenty-seven provincial towns; in the latter towns the rates ranged from 0·10 in Brighton, 0·12 in Birkenhead, and 0·13 in Norwich, to 0·53 in Sunderland, 0·55 in Blackburn, 0·56 in Leeds, 0·71 in Bolton, and 1·22 in Preston. In fifty other considerable towns the rate was 0·28, the highest rates being 0·53 in Cheltenham, 0·54 in Barrow-in-Furness, 0·55 in Gateshead, 0·74 in Stockport, 0·77 in Yarmouth, 1·03 in St. Helens, and 1·27 in Chester. In the remainder of England and Wales the rate was 0·22. The rate from this cause also showed marked excess in Great Grimsby, Greasley, Runcorn, Burnley, and Pontypridd subdistricts.

The 1563 deaths ascribed to *diphtheria* corresponded to an annual rate of 0·22 per 1000, the mean rate in the ten preceding fourth quarters having been 0·16. Excepting the fourth quarter of 1884 when the same rate was recorded, the death-rate from diphtheria last quarter was considerably higher than that in any quarter of any year since 1870, when the deaths from the principal zymotic diseases were first published in the Quarterly Return. No death from this disease was registered in Rutlandshire, and the rate was but 0·06 in Gloucestershire and in Westmorland, and 0·07 in Herefordshire and in Staffordshire; the highest rates were 0·50 in Cambridgeshire, 0·60 in Monmouthshire, and 0·64 in Buckinghamshire. In the twenty-eight great towns the rate was 0·23, being 0·31 in London, and 0·16 in the twenty-seven provincial towns; in the latter towns the rates ranged from 0·00 in Blackburn, 0·01 in Leeds, and 0·02 in Nottingham, to 0·33 in Oldham, 0·35 in Preston, 0·48 in Brighton, and 0·71 in Huddersfield. In fifty other considerable towns the rate was 0·15, the highest rates being 0·51 in Middlesbrough, 0·71 in Cambridge, and 1·51 in Chatham. In the remainder of England and Wales the

rate was 0·22, the mortality from the disease showing a marked excess in Havant, Enfield, Aylesbury, Willingham (Chesterton), Walthamstow, Dorchester, Sutton Coldfield, Blackwell, Burnley, and Tredegar sub-districts.

The returns from the local registrars show that the deaths certified as due to diphtheria are frequently accompanied by an abnormal number of deaths ascribed to croup or laryngitis. For instance in Oldbury sub-district, 3 deaths were referred to diphtheria and 14 to croup; in Barton-upon-Irwell sub-district, 6 deaths were referred to diphtheria and 5 to croup; in Stansted sub-district, only 1 death was referred to diphtheria while 4 were attributed to croup and laryngitis; and in Brill sub-district, 3 were referred to diphtheria and 5 to croup.

The deaths from *small-pox*, which were 30, 47, and 70 in the first three quarters of the year, increased to 358 in the fourth quarter, and corresponded to a rate of 0·05 per 1000, the mean rate in the ten preceding corresponding quarters having been 0·04; the rate last quarter exceeded that recorded in any quarter since the third of 1885. Of the 358 deaths, no fewer than 230 occurred within the borough of Sheffield, 50 in other parts of the West Riding of Yorkshire, and 35 in or around Bristol, while there were only 43 in the remainder of England and Wales. Only 3 deaths from small-pox occurred among the inhabitants of London.

The following Table shows the relative mortality from each of the above-mentioned zymotic diseases in England and Wales, in the twenty-eight great towns, in the fifty other considerable town districts, and in the remainder of the country:—

ANNUAL DEATH-RATE per 1,000 from several ZYMOTIC DISEASES during the Fourth Quarter of 1887.

	Principal Zymotic Diseases.	Small-pox.	Measles.	Scarlet Fever.	Diph-theria.	Whoop-ing-cough.	Fever.	Diar-rhœa.
Cols.	1.	2.	3.	4.	5.	6.	7.	8.

England and Wales, less the 78 Towns -	1·69	0·02	0·43	0·30	0·22	0·24	0·22	0·26

CERTIFICATION OF CAUSES OF DEATH.—The causes of 121,850, or 91·1 per cent., of the 133,792 deaths in England and Wales were duly certified by medical practitioners, and of 7679, or 5·7 per cent., by coroners after inquest. The causes of the remaining 4263, or 3·2 per cent., of the deaths were not certified. The proportion of uncertified deaths did not exceed 1·0 per cent. in London, whereas it was 3·6 per cent. in the rest of England and Wales. The per-centage of uncertified deaths was only 0·7 per cent. in Wiltshire, and in the extra-metropolitan portion of Middlesex, while it ranged upwards in the other English counties, to 4·7 in the West Riding, 4·9 in Derbyshire, 5·4 in Westmorland and in Durham, and 5·5 in Herefordshire. In Wales 6·9 per cent. of the causes of death were uncertified, the proportions being 8·6 in North Wales and 6·1 in South Wales. In the twenty-eight great towns the proportion of uncertified deaths was 2·2 per cent.; and while it was but 1·0 in London, it was 3·2 per cent. in the twenty-seven provincial towns. The per-centage of uncertified deaths in these provincial towns ranged from 0·4 and 0·7 in Portsmouth and in Norwich, to 5·0 in Liverpool, 5·1 in Hull, 6·4 in Sheffield, and 9·1 in Halifax.

VIOLENT DEATHS.—The deaths referred to different forms of violence were 4272, and corresponded to an annual rate of 0·60 per 1000 of the estimated population

they were equal to 3·2 per cent. of the total deaths, against a mean per-centage of 3·3 in the ten preceding corresponding quarters. The death-rates from violence ranged from 0·25 in Buckinghamshire, 0·28 in Oxfordshire, and 0·31 in Westmorland, to 0·77 in South Wales, 0·78 in Northumberland, 0·80 in Kent (extra-metropolitan), and 1·03 in Huntingdonshire. The high rate in Kent was due to a collision at sea, off Dover, which caused 26 of the deaths registered in that town. In the twenty-eight great towns the deaths from violence corresponded to an annual rate of 0·72 per 1000, the rates ranging from 0·30 in Halifax, 0·31 in Huddersfield, and 0·35 in Norwich, to 0·94 in Manchester, 1·00 in Newcastle-upon-Tyne, 1·10 in Liverpool, and 1·19 in Cardiff.

Inquests.—Inquests were held in 7679, or 5·7 per cent. of the total deaths; the mean proportion in the ten preceding fourth quarters having been 5·4 per cent. In the twenty-eight great towns the proportion of inquest cases to total deaths was 6·9 per cent., the percentages ranging from 2·3 in Halifax, 2·5 in Huddersfield, and 2·6 in Blackburn, to 8·2 in Manchester, 9·1 in Birmingham, 9·9 in Cardiff, and 12·5 in Leicester.

Deaths in Public Institutions.—The deaths registered in workhouses, hospitals, and public lunatic asylums numbered 14,718, and were equal to 11·0 per cent. of the total deaths; the mean proportion in the ten preceding corresponding quarters having been 10·1 per cent. In the twenty-eight great towns 8135, or 16·7 per cent., of the registered deaths occurred in these public institutions, the percentages ranging from 5·1 in Bolton, and 5·3 in Blackburn, to 17·8 in Liverpool, 18·5 in Manchester, 19·3 in Brighton, and 21·5 in London.

Health of Colonial and Foreign Cities.

A summary of the Weekly Returns, with which the Registrar-General is favoured by various local authorities abroad, shows that the average annual death-rate during the quarter ending with December last in twenty-nine Colonial and Foreign cities, having an aggregate population of nearly sixteen millions of persons, was 23·9 per 1000.

In the twenty-one European cities the mean rate was 22·7 per 1000, against 21·1 in the twenty-eight large English towns. Among the twenty-nine Colonial and Foreign cities the lowest death-rates were 17·6 in Brussels, 18·1 in Baltimore, 18·4 in Philadelphia, 18·9 in Stockholm, and 19·0 in Berlin and in Dresden; in the other towns the rates ranged upwards to 28·1 in Hamburg and in Buda-Pesth, 29·7 in Trieste, 39·2 in Alexandria, 45·2 in Madras, and 50·3 in Cairo.

The death-rate in Paris was 21·2, against 20·0 in London; the deaths from diphtheria and "fever" showed an increase upon the numbers in the preceding quarter, whereas the 79 deaths from small-pox showed a decline. The death-rate from enteric or typhoid fever was nearly three times as high in Paris as in London. Small-pox caused 142 deaths in Trieste, 94 in Prague, 31 in Buda-Pesth, 15 in Vienna, and 12 in St. Petersburg and in Turin. Measles showed the largest proportional mortality in Copenhagen, Christiania, and Rotterdam; and scarlet fever in Copenhagen, Christiania, and Prague. The deaths from diphtheria showed more than the usual excess in the German and Austrian cities, and were also exceptionally numerous in Christiania, Copenhagen, Stockholm, St. Petersburg. Fever mortality was markedly excessive in Hamburg, St. Petersburg, Prague, Philadelphia, Cairo, and Alexandria. The death-rate from diarrhœal diseases showed a marked excess in St. Petersburg, Stockholm, in most of the German cities, and in Cairo and Alexandria.

The Year 1887.

During the four quarters of 1887, 886,017 births and 530,577 deaths were registered in England and Wales. The *natural* increase of population during the year by excess of births over deaths was 355,440, showing a further decline from 375,922 in 1884, 371,520 in 1885, and 366,590 in 1886. The increase of population, estimated on the hypothesis that the rate of increase that prevailed during the last intercensal period (1871–81) has been maintained since 1881, was 379,109, and 23,669 more than the excess of births over deaths. According to returns issued by the Board of Trade, 286,969 British emigrants (of whom 172,334 were English, 35,039 Scotch, and 79,596 Irish), left the various ports of the United Kingdom, at which emigration officers are stationed, during the year. The amount of emigration from each division of the United Kingdom showed a further increase upon that recorded in 1885 and 1886; the increase was proportionally largest in Scotland, as had also been the case in 1886.

The birth-rate in England and Wales in 1887 was 31·4, and the death-rate 18·8 per 1000 of the estimated population in the middle of the year. The birth-rate was lower than in any previous year since 1838, when birth-registration was undoubtedly defective, and was 2·6 below the mean annual rate in the ten years 1877–86. The death-rates which had ranged in the six preceding years from 18·9 in 1881 to 19·6 in 1882, declined last year to 18·8, a lower rate than has prevailed in any year since the commencement of civil registration in 1837. The death-rate recorded in each of the seven years 1881–87 has been lower than that recorded in any year prior to 1881. The mean annual death-rate in the first seven years of the current decennium (1881–90) did not exceed 19·2, and was 2·2 below the mean rate in the preceding ten years 1871–80. This marked and continued reduction in the death-rate implies that more than 400,000 persons in England and Wales were alive at the end of those seven years whose deaths would have been recorded therein had the mean rate of mortality equalled that which prevailed during the ten years 1871–80.

The 530,577 deaths in 1887 included 128,436 of infants under one year of age, and 146,945 of persons aged upwards of 60 years. The rate of infant mortality, measured by the proportion of deaths under one year to registered births, was equal to 145 per 1000, against 138 and 149 in the two preceding years. The proportion of infant mortality, which averaged 149 per 1000 births in the ten years 1871–80, fell to 141 in the seven years 1881–87. The rate of mortality during 1887 among persons aged upwards of 60 years, was 70·5 per 1000 persons estimated to be living at those ages; in the three preceding years the death-rates at those ages were 67·3, 70·9, and 72·3 per 1000 respectively.

The deaths from all causes during the year included 19,502 from diarrhœa, 16,297 from measles, 10,661 from whooping-cough, 7719 from scarlet fever, 5653 from "fever" (typhus, enteric, and simple or ill-defined), 4339 from diphtheria, and 505 from small-pox. Thus, 64,676 deaths were referred to the principal zymotic diseases, showing a further increase upon the numbers in 1885 and 1886; they were equal to a rate of 2·29 per 1000, against 2·19 and 2·36 in the two preceding years. The mean annual death-rate from these zymotic diseases, which had been 3·96, 4·15, and 3·40 per 1000 respectively in the three decennial periods 1851–60, 1861–70, and 1871–80, did not exceed 2·42 in the first seven years of the current decennium 1881–90.

Compared with the numbers returned in 1886, the deaths referred last year to measles, scarlet fever, diphtheria, and small-pox showed an increase, whereas those referred to diarrhœa, whooping-cough, and "fever" had declined. The death-rate from measles was equal to 0·58 per 1000, against 0·53 and 0·43 in the two preceding years, and exceeded the rate in any year of which record exists since 1840. The rate from scarlet fever was 0·27, which, although somewhat exceeding the unprecedentedly low rates in 1885 and 1886, was considerably below the recorded rate in any previous year on record; the mean rate from this disease in the last

seven years (1881–87) was 0·38, against 0·97 and 0·72 in the two decennia 1861–70, and 1871–80. The death-rate from diphtheria was 0·15; it corresponded with the rate in 1886, but was below the rate recorded in each of the three preceding years. The rate from small-pox was 0·02, against a mean rate of 0·07 in the six preceding years 1881–86; it showed, however, an increase upon the unprecedentedly low rate in 1886. Diarrhœa caused a rate of 0·69, against 0·97, 0·49, and 0·89 in the three preceding years. The rate from whooping-cough was 0·38, against 0·48 and 0·46 in the two preceding years, and was lower than in any previous year of which record exists. The death-rate from "fever" was 0·20, against 0·20 and 0·21 in the two preceding years, and was lower than that recorded in any previous year, of which record exists, since the beginning of civil registration. The mean death-rate from "fever," which was 0·91, 0·89, and 0·50 in the three preceding decennial periods, did not exceed 0·25 in the first seven years of the current decennium.

During the year 29,595 inquest cases were registered, equal to 5·6 per cent. of the total deaths, showing a slight increase upon the mean percentage in recent years. The causes of 17,465, or 3·3 per cent. of the total deaths, were not certified either by registered medical practitioners or by coroners. The proportion of uncertified deaths declined steadily from 4·7 per cent. in 1879 to 3·3 per cent. in 1887.

The reported deaths from different forms of violence were 17,429, and showed a further increase upon the numbers in recent years; they were equal to 3·3 per cent. of the deaths from all causes, and to a rate of 0·62 per 1000 of the population, against 0·63 in 1885 and in 1886.

The foregoing statistics for 1887 are derived from a summary of the Returns furnished to the Registrar-General by the local registrars at the close of each quarter of the year. The figures are, therefore, subject to revision when the causes of death and other details are finally classified and tabled for publication in the Registrar-General's Annual Report for 1887.

PRELIMINARY TABLES.

TABLE I.—**Marriages, Births,** and **Deaths** registered in **England** and **Wales** in the Years **1877–87,** and in each Quarter of those Years.

* Furnished by the Chief Cashier of the Bank of England.
† As published by the Comptroller of Corn Returns to the Board of Trade.
‡ These are the average prices at which the best seaborne Newcastle, Sunderland, and Hartlepool coals are put in barge from the collier in the Thames; the difference between these prices and those charged to the consumer represents the cost of distribution and merchant's profit. These figures are derived from returns with which the Registrar-General has been favoured by Mr. Richard Meade of the Mineral Statistics Department, Home Office.

572	Carlisle - - - - M† -	43,513	321	247	29·3	22·5	3·37	199	St. Cuthbert & St. Mary Sub-dists.
	XI.—Monmouthsh. & Wales.								
585	Newport (Monmouth) M† -	36,742	369	163	39·8	17·6	1·51	133	Newport Sub-district.
587	Ystradyfodwg - L. G. D.†	55,893‡	495	256	35·1	18·2	1·14	143	Ystradyfodwg Sub-dist. of Pontypridd.
588	Merthyr Tydfil - - P -	89,849	682	446	30·1	19·7	1·81	145	Lower and Upper Merthyr Tydfil and Aberdare Sub-districts.
592	Swansea - - - M -	96,217	782	433	32·2	17·9	2·52	136	Llangafelach, Swansea, and Llansamlet Sub-districts.

Note.—The letter M or P affixed to the name of each Town denotes whether the limits, which the district or sub-districts named in the last column approximately represent, are Municipal or Parliamentary. Imp^{t} D. signifies an Improvement District, and L. G. D. a Local Government District.

† The rates of mortality for these towns have been corrected by the exclusion of a proportional number of deaths occurring in County Hospitals and Lunatic Asylums, situate within the districts or sub-districts here taken as representing the towns, or by the exclusion or addition of a proportion of the deaths in Union Workhouses in cases where only a portion of the Union is embraced by the area taken, or where the Workhouse is situated outside that area.

‡ The rate of increase of population in Barrow-in-Furness and in Ystradyfodwg was so abnormally large between 1871 and 1881 as to preclude the probability of the rate being maintained between 1881 and 1891. The present population of these towns has therefore been estimated from special returns of inhabited houses with which the Registrar-General has been favoured by the local authorities.

§ The 187 deaths registered in Dover include 26 of persons drowned in consequence of a collision between two steamships. Excluding these deaths the death-rate would be 16·9.

TABLE VIII.—GREATER LONDON.—**Population, Births,** and **Deaths** in the **Fourth Quarter of 188**

[a] The *Registration* or *Union Counties* consist of groups of Superintendent Registrars' Districts, which are generally co-extensive with the Poor Law Unions. Those Districts which extend into two or more Counties (proper) are included entirely in that County in which the principal town of the district, or the greater part of the population, is located. The boundaries of Registration or Union Counties therefore differ more or less from the boundaries of Counties (proper).

[b] The averages of Marriages and Births are given only for the Eleven Divisions and for Registration Counties.

[c] See page 14, note [b].

NOTE.—*The Registrars alone must be considered responsible for the accuracy of the figures shown in their Returns, and for the opinions expressed in the foot notes.*

REGISTRATION COUNTIES, and SUPERINTENDENT REGISTRARS' DISTRICTS of ENGLAND. of INFANTS under one year of Age, and of PERSONS aged 60 years and upwards from WHOOPING-COUGH, FEVER, DIARRHŒA, CHOLERA, and VIOLENCE, also INQUEST CASES and in the DIVISIONS, REGISTRATION COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and of ENGLAND.

[a] The *Superintendent Registrars' Districts*, 632 in number, are collections of contiguous Parishes or Places, combined for purposes connected with the Registration of Births, Deaths, and Marriages, and are nearly always identical with the Poor Law Unions of the same names; they are here arranged topographically under the Registration Counties.

[b] These areas, which were partly revised by the Ordnance Survey Department, are the same as those published in the Census Report of 1881. They do not include space occupied by foreshore or tidal water of rivers and creeks.

[c] See page 14, note b.

II.—SOUTH EASTERN COUNTIES.—Superintendent Registrars' Districts—*continued.*

No.	Superintendent Registrars' Districts.	Area in Statute Acres.	Enumerated Population, 1881.	Marriages: Registered in Quarter ending 30 Sept. 1887.	Births: Registered in Quarter ending 31 Dec. 1887. [a] The *Registration Sub-districts* (2134 in number) are sub-divisions of the *Superintendent Registrars' Districts* in which the Births and Deaths are registered by Registrars severally appointed for that purpose. The letter *W* denotes that the Sub-district contains within its limits a Workhouse belonging to the District or Union; *w* indicates that a Workhouse Establishment receiving inmates from other Districts than the one in which it stands is included; *H* indicates Hospital or Infirmary; and *L* Lunatic Asylum.

[b] For London, the numbers of Births and Deaths, as well as the details given under "Infants under 1 year of age" and the twelve subsequent headings in this Table, are derived from the Weekly Returns made by the Registrars, and relate to 13 weeks ending 31st December 1887.

I.—LONDON.—Registration Sub-districts—*continued.*

[e] 627 : 1.—Of the 17 deaths from measles, 8 occurred in Llanllyfni, 4 in Llandwrog, 3 in Llanwnda, and 2 in Clynnog parishes.
[f] 627 : 3.—The 17 deaths from measles occurred in Carnarvon Urban Sanitary District.
[g] 629 : 1.—Of the 4 deaths from diphtheria, 2 occurred in the parish of Caerhûn, and 2 in the parish of Llanbedr-y-Cennin.

METEOROLOGY OF ENGLAND.

Remarks on the Weather during the Quarter ending December 31st, 1887.

By James Glaisher, Esq., F.R.S., *&c.*

The weather in October was generally fine but very cold. The temperature of the air was below its average on nearly every day, particularly so from the 11th to the 18th, and from the 22nd to the 26th. The month was colder than any October back to the year 1817, when it was of the same temperature. The minimum temperature of the month at Greenwich, 25°·3, was lower than any previous reading at Greenwich; at many of the stations the temperature was still lower, at Truro it was 23°, at Salisbury 16°, at Whitchurch 22°, Blackheath 24°, at Barnet 20°, at Cardington 23°, at Cambridge 25°·2, at Rugby 20°·7, at Wolverhampton 22°·7, at Leicester 23°·6, at Nottingham 22°·3, at Stonyhurst 23°·2, and at Carlisle 21°·5. These low readings in October are of very rare occurrence. The atmospheric pressure was above its average till the 8th, and from the 15th to the 27th, and was below on the remaining 10 days. The fall of rain was less than the average at all the stations, the soil was in consequence very dry, and streams were generally low, the wind was chiefly from the N.W., and a gale was blowing at the end of the month.

The month of November was dry and cold. The temperature of the air did not differ much from the average till the 15th day, very cold weather then set in and continued to the 22nd. The atmospheric pressure was below the average till the 10th, and from the 18th. The fall of rain was above the average at some stations and below at others. The wind was chiefly from the N.E., and was strong at both the beginning and towards the end of the month. Dense fogs prevailed on the 20th and 21st.

The month of December was fine and rather cold. The temperature of the air was a little above the average till the 4th, and was below from the 5th. The atmospheric pressure was above the average till the 5th, and from the 29th. The rain was generally less than the average. The wind was mostly from the N.W. It was a fine winter month.

About London the mean daily temperature of the air was below its average on nearly every day throughout October and till the 25th day of November, the mean daily deficiency for these 56 days was 5°·4; from November 26th to December 4th it was above the average, the mean daily excess was 1°·4; from December 5th to the 31st was generally below the average, mean daily deficiency was 3°·8.

The mean temperature of the air for October was 45°·0, being 4°·6 and 5°·0 below the average of 116 years and 46 years respectively; it was 8°·3, 1°·1, and 3°·9, lower than in 1886, 1885, and 1884 respectively.

The mean temperature of October was lower than that of any October back to the year 1817, the following are all the cases of a temperature as low or lower back to the year 1771:—

In the year 1784 it was 43°·9
1786 „ 44°·7
1817 „ 45°·0

The mean temperature of the air for November was 40°·8, being 1°·6 and 2°·7 below the average of 116 years and 46 years respectively; it was 3°·2, 2°·5, and 1°·6 lower than in 1886, 1885, and 1884 respectively, and lower than any November back to 1879, when it was 38°·3.

The mean temperature of the air for December was 38°·1, being 1°·0 and 1°·8 below the average of 116 years and 46 years respectively; it was 1°·6 higher than in 1886, 0°·8 and 2°·9 lower than in 1885 and 1884 respectively.

The mean high day temperature of the air in October was 52°·6, being 5°·3 below the average of 46 years; it was 7°·9 lower than in 1886, 0°·2 higher than in 1885, and 3°·9 lower than in 1884 respectively.

The mean high day temperature of the air in November was 45°4, being 3°·4 below the average of 46 years; it was 4°·1, 2°·7, and 2°·2 lower than in 1886, 1885, and 1884 respectively.

The mean high day temperature of the air in December was 42°·1, being 2°·5 below the average of 46 years; it was 0°·7 higher than in 1886, 0°·8 and 3°·0 lower than in 1885 and 1884 respectively.

The mean low night temperature of the air in October was 38°·3, being 5°·2 below the average of 46 years; it was 8°·8, 1°·8, and 3°·3 lower than in 1886, 1885, and 1884 respectively.

The mean low night temperature of the air in November was 36°·0, being 1°·4 below the average of 46 years; it was 2°·0, 1°·8, and 0°·8 lower than 1886, 1885, and 1884 respectively.

The mean low night temperature of the air in December was 33°·4, being 1°·7 below the average of 46 years; it was 2°·2 higher than in 1886, 0°·6 lower than in 1885, and 3°·1 lower than in 1884 respectively.

Therefore the days and nights were cold throughout the quarter.

The mean daily range of temperature in October was 14°·3, being 0°·2 smaller than the average. In November it was 9°·4, being 2°·1 smaller than the average, and in December it was 8°·7, being 0°·7 smaller than the average.

The mean temperature in October was 9°·0 colder than in September; in November it was 4°·2 colder than in October; in December it was 2°·7 colder than in November.

(From the preceding 46 years' observations the decrease of temperature from September to October is 7°·1; the decrease from October to November is 6°·5; and the decrease from November to December is 3°·6.)

From September to October at stations south of 51° there was a decrease of temperature of 7°·7, between 51° and 53° to 8°·6; between 53° and 54° to 7°·2; and north of this parallel 8°·8.

From October to November there was a decrease of 3°·8 at stations south of 52°; between 52° and 53° to 4°·0; between 53° and 54° to 4°·6; and stations north of this parallel 4°·3.

From November to December there was a decrease of 2°·8 at stations south of 51°; between 51° and 52° to 2°·5; between 52° and 53° to 3°·7; between 53° and 54° to 2°·3; and north of this parallel to 3°·1.

The mean reading of the barometer at the height of 159 ft. above the level of the sea for the month of October was 29·916 ins., being 0·208 in. above the average of 46 years, 0·296 in., 0·386 in., and 0·021 in. higher than in 1886, 1885, and 1884 respectively.

The mean reading of the barometer in November was 29·530 ins., being 0·212 in. below the average of 46 years; 0·202 in., 0·191 in., and 0·448 in. lower than in 1886, 1885, and 1884 respectively.

NOTE.—In reading this table it will be borne in mind that the plus sign (+) signifies *above* the average, and the minus sign (−) signifies *below* the average.

Average duration of the different directions of the wind referred to eight points of the compass, and duration in days of each direction in each month in the quarter, were as follows:—

Direction of Wind.	October. 1887.	October. Average.	October. Departure from Average.	November. 1887.	November. Average.	November. Departure from Average.	December. 1887.	December. Average.	December. Departure from Average.
	d.	d.	d.	d.	d.	d.	d.	d.	d.
N.W.	11	2¼	+ 8¾	2	2½	− ½	9	2½	+ 6½
N.	6	3½	+ 2½	6	4½	+ 1½	3	3	0
N.E.	2	3	− 1	9	4	+ 5	2	2½	− ½
E.	1	1½	− ½	0	2½	− 2½	2	2	0
S.E.	0	2	− 2	2	2½	− ½	1	2	− 1
S.	1	4	− 3	3	4	− 1	3	3½	− ½
S.W.	8	10	− 2	7	8½	− 1½	9	11	− 2
W.	2	4½	− 2½	1	2½	− 1½	2	4½	− 2½

The sign (+) denotes excesses over averages; the numbers affected by this sign in October are opposite to N.W. and N.; in November to N.E. and N.; and in December to N.W.

The sign (−) denotes deficiencies below averages. In October this sign is opposite to S., W., S.W., and S.E.; in November to E., S.W., and W.; in December to W. and S.W.

The mean reading of the barometer in December was 29·676 ins., being 0·113 in. below the average of 46 years; 0·154 in. higher than in 1886; 0·355 in. and 0·014 in. lower than in 1885 and 1884 respectively.

The mean reading of the barometer in October was 0·157 in. higher than in September; in November was 0·386 in. lower than in October; in December was 0·146 in. higher than in November.

From September to October there was an increase of atmospheric pressure at all stations; at those south of 51°, to 0·17 in.; between 51° and 53° to 0·16 in.; between 53° and 54° to 0·18 in.; and at stations north of this parallel to 0·22 in.

From October to November there was a decrease at all stations; at those south of 51° to 0·43 in.; between 51° and 52° to 0·40 in.; and at stations north of this parallel to 0·38 in.

From November to December there was an increase at all stations; at those south of 51° to 0·20 in.; between 51° and 52° to 0·15 in.; between 52° and 53° to 0·12 in.; between 53° and 54° to 0·08 in.; and at stations north of this parallel to 0·06 in.

About London the barometric pressure was above its average till the 8th; the average daily excess was 0·33 in.; from October 9th to the 14th it was below its average, the mean daily deficiency being 0·21 in.; it was above its average from the 15th to the 27th by 0·41 in. daily; from October 28th to November 10th it was below its average, the mean daily deficiency was 0·43 in.; it was above its average from the 11th to the 17th, the mean daily excess was 0·12 in.; from the 18th to the 30th it was below its average by 0·18 in. daily; it was above its average for five days ending December 5th by 0·23 in. daily; from December 6th to the 26th there was a daily deficiency of 0·25 in.; and from the 27th to the 31st there was an excess of average of 0·05 in. daily.

Thunderstorms occurred in October on the 11th at Truro; and on the 30th at Stonyhurst.

In November on the 3rd at Cambridge.

In December on the 17th at Eastbourne; on the 18th at Whitchurch, Llandudno, and Liverpool; and on the 21st at Guernsey.

Thunder was heard but lightning was not seen in October on the 11th, 12th, and 30th at Llandudno.

In November on the 20th at Whitchurch.

In December on the 19th at Stonyhurst.

Lightning was seen but thunder was not heard in October on the 1st at Carlisle; on the 4th at Oxford; on the 10th at Torquay and Stonyhurst; on the 11th at Torquay, Osborne, Barnstaple, Liverpool, and Hull; on the 14th at Stonyhurst; and on the 29th at Truro.

In November on the 3rd at Torquay and Bath; and on the 12th at Salisbury.

In December on the 14th and 15th at Torquay; on the 16th at Guernsey; on the 17th at Guernsey and Cambridge; on the 18th at Oxford, Cambridge, and Halifax; and on the 20th at Stonyhurst.

Solar halos were seen in October on the 9th and 14th at Torquay; on the 20th at Liverpool and Halifax; on the 22nd at Liverpool; on the 23rd at Torquay and Oxford; on the 26th at Torquay and Liverpool; and on the 29th at Torquay.

In November on the 25th and 27th at Torquay; and on the 28th at Torquay and Oxford.

In December on the 5th at Torquay; on the 10th at Halifax; and on the 11th and 17th at Torquay.

Lunar halos were seen in October on the 23rd at Oxford; on the 26th at Torquay; on the 30th at Torquay, Salisbury, and Oxford; and on the 31st at Torquay, Oxford, and Stonyhurst.

In November on the 1st at Torquay and Stonyhurst; on the 2nd at Cambridge, Halifax, and Stonyhurst; on the 21st at Ventnor; on the 24th at Torquay, Bath, Oxford, Cambridge, and Wolverhampton; on the 25th at Torquay and Oxford; on the 27th at Torquay; on the 28th at Leicester, Liverpool, Halifax, and Stonyhurst; and on the 29th at Burslem.

In December on the 5th at Torquay and Oxford; and on the 19th at Halifax.

Snow fell in October on the 8th and 9th at Carlisle; on the 11th at Oxford, Somerleyton, Leicester, Burslem, Llandudno, Liverpool, and Stonyhurst; on the 12th at Torquay, Eastbourne, and in the Midland Counties; on the 13th at Lowestoft and Halifax; on the 14th at Halifax and Bradford; and on the 24th and 25th at Hull.

In November on the 7th at Whitchurch; on the 13th at Bath; on the 14th at Hull; on the 15th at Blackheath, Oxford, Lowestoft, Somerleyton, Halifax, and Hull; on the 16th at Liverpool; on the 18th at Salisbury, Oxford, Royston, and Cambridge; on the 19th at Salisbury, Bath, Whitchurch, Blackheath, Barnet, and Halifax; and on the 20th at Whitchurch and Llandudno.

In December on the 6th at Bath, Whitchurch, Hull, Stonyhurst, and Bradford; on the 7th it was general throughout the country; on the 10th at Bath, Whitchurch, and Blackheath; on the 11th at Whitchurch, Blackheath, and in the Midland and Northern Counties; on the 12th at Burslem; on the 14th at Royston; on the 18th at Oxford, Royston, Cambridge, Bugby, Burslem, Llandudno, Halifax, Hull, Stonyhurst, and Bradford; on the 19th at Torquay and in the Midland and Northern Counties; on the 20th at Eastbourne, Royston, Burslem, Liverpool, Halifax, and Hull; on the 21st at Blackheath, Royston, Cambridge, Lowestoft, Burslem, and Hull; on the 22nd at Carlisle; on the 23rd at Blackheath and Royston; on the 24th at Lowestoft and Hull; on the 25th at Guernsey, Blackheath, Oxford, Cardington, Rugby, Lowestoft, and Leicester; on the 26th at Guernsey, Eastbourne, Oxford, Royston, Cambridge, Somerleyton, Halifax, Hull, Stonyhurst, Bradford, and Carlisle; on the 27th at Guernsey, Osborne, and in the Midland and Northern Counties; on the 28th at Torquay, Eastbourne, Bath, Whitchurch, Blackheath, Barnet, Oxford, Rugby, Burslem, Halifax, and Bradford; on the 30th at Whitchurch, Oxford, Royston, Rugby, and Halifax; and on the 31st at Halifax, Stonyhurst, and Bradford.

[*Continued on page* 71.]

MONTHLY METEOROLOGICAL TABLE FOR THE QUARTER ENDING DECEMBER 31ST, 1887.

The Observations have been reduced to Mean values by Glaisher's Barometrical and Diurnal Range Tables, and the Hygrometrical results have been deduced from the seventh edition of his Hygrometrical Tables.

Names of Stations and Observers.	Height of Station above Sea Level.	Year 1887.	Pressure of Atmosphere in Month.		Temperature of Air in Month.						Mean Temperature.		Vapour.			Mean Degree of Humidity. Sat.=100.	Mean Weight of a cubic foot of Air.	Mean Reading of Thermometer.		Wind.					Mean Amount of Ozone.	Mean Amount of Cloud.	Rain.

The highest temperatures of the air were at Truro, 67°·0; and at Osborne, and the Royal Observatory 64°·1.
The lowest temperatures of the air were at Rugby, 14°·0; at Salisbury, 16°·0; and at Carlisle, 16°·4.
The greatest ranges of temperature were at Truro and Salisbury, 48°·0; and at Carlisle, 46°·1.
The least ranges of temperature were at Liverpool, 31°·4; and at Leeds, 32°·0; and at Bradford, 32°·5.
The greatest number of days of rain were at Guernsey, 66; at Somerleyton, 60; and at Nottingham, 57.
The least number of days of rain were at Cardington 34; at Rugby 37; and at Barnet and Oxford, 38.
The greatest falls of rain were at Guernsey, 14·12 inches; at Truro, 12·89 inches; and at Plymouth, 12·84 inches.
The least falls of rain were at Nottingham, 4·09 inches; at Cambridge, 4·21 inches; and at Cardington 4·60 inches.

Quarterly Meteorological Table for different Parallels of Latitude.

PARALLELS OF LATITUDE, &c.	Mean Pressure of dry Air reduced to the level of the Sea.	Mean of all Highest Readings of the Thermometer.	Mean of all Lowest Readings of the Thermometer.	Mean Range of Temperature in the Quarter.	Mean of all Highest.	Mean of all Lowest.	Mean Monthly Range of Temperature.	Mean Daily Range of Temperature.	Mean Temperature of the Air.	Mean Temperature of the Dew Point.	Mean Elastic Force of Vapour.	Mean Weight of Vapour in a cubic foot of Air.	Mean additional Weight required for saturation	Mean degree of Humidity.	Mean Weight of a cubic foot of Air.	Mean Reading of Maximum in Rays of Sun.	Mean Reading of Minimum on Grass.	Mean Estimated Strength.	Wind. Relative Proportion of N.	Wind. Relative Proportion of E.	Wind. Relative Proportion of S.	Wind. Relative Proportion of W.	Mean Amount of Ozone.	Mean Amount of Cloud.	Rain. Mean Number of Days it fell.	Rain. Mean Amount collected.

INDEX OF SUPERINTENDENT REGISTRARS' DISTRICTS.

The following Index furnishes a reference to the *Number** of each SUPERINTENDENT REGISTRAR'S DISTRICT. In forming the alphabetical arrangement, the principle adopted has been to place compound names in the order in which they are pronounced.

Aberayron, 604.
Abergavenny, 582.
Aberystwith, 605.
Abingdon, 115.
Alcester, 397.
Alderbury (Salisbury), 254.
Alnwick, 563.
Alresford, 105.
Alston, 568.
Alton, 106.
Altrincham, 445.
Alverstoke, 89.
Amersham, 140.
Amesbury, 253.
Ampthill, 173.
Andover, 110.
Anglesey, 630*a*.
Ashborne, 438.
Ashby-de-la-Zouch, 406.
Ashton-under-Lyne, 468.
Aston, 387.
Atcham (Shrewsbury), 351.
Atherstone, 389.
Auckland, 545.
Axbridge, 315.
Axminster, 269.
Aylesbury, 143.
Aylsham, 223.
Aysgarth, 539.

Bakewell, 440.
Bala, 623.
Banbury, 155.
Bangor, 628.
Barnet, 123.
Barnsley, 506.
Barnstaple, 285.
Barrow-in-Furness, 482.
Barrow-upon-Soar, 408.
Barton Regis, 321.
Barton-upon-Irwell, 463.
Basford, 430.
Basingstoke, 108.
Bath, 317.
Battle, 69.
Beaminster, 267.
Bedale, 537.
Bedford, 171.
Bedminster, 319.
Bedwelty, 583.
Belford, 564.
Bellingham, 561.
Belper, 437.
Berkhampstead, 139.
Berwick, 565.
Bethnal Green, 16.
Beverley, 519.
Bicester, 151.
Bideford, 287.
Biggleswade, 172.
Billericay, 191.
Billesden, 402.
Bingham, 434.
Birkenhead, 452.
Birmingham, 386.
Bishop Stortford, 131.
Blaby, 403.
Blackburn, 474.
Blandford, 260.
Blean, 58.
Blofield, 228.
Blything, 216.
Bodmin, 294.
Bolton, 461.
Bootle, 576.
Bosmere, 211.
Boston, 417.
Bourn, 414.
Brackley, 156.
Bradfield, 118.
Bradford-on-Avon, 249.
Bradford (Yorks), 497.
Braintree, 199.
Bramley, 500.
Brampton, 570.
Brecknock, 608.
Brentford, 126.
Bridge, 56.
Bridgend, 589.
Bridgnorth, 348.
Bridgwater, 307.
Bridlington, 525.
Bridport, 268.
Brighton, 77.
Bristol, 320.
Brixworth, 162.
Bromley, 41.
Bromsgrove, 384.
Bromyard, 341.
Buckingham, 146.
Builth, 607.
Burnley, 472.
Burton-upon-Trent, 367.
Bury, 462.
Bury St. Edmunds, 206.

Caistor, 424.
Calne, 245.
Camberwell, 26.
Cambridge, 179.
Camelford, 290.
Cannock, 370.
Canterbury, 57.
Cardiff, 586.
Cardigan, 601.
Carlisle, 572.
Carmarthen, 597.
Carnarvon, 627.
Castle Ward, 553.
Catherington, 103.
Caxton, 177.
